Saltman, 1997-01-24 The notion of a fixed health budget seems self evident a public or private payer sets a time tied ceiling on expenditures Such a definition while correct is nonetheless far from sufficient In actual practice the key issues revolve around not only the what but also the who and the how of establishing and maintaining periodic health care expenditure ceilings The design and implementation of fixed budgets in health systems not to mention their success varies considerably between countries within countries and between health sub sectors *Fixing Health Budgets Experience from Europe and North America* reviews the impact of financial reform on the quality and delivery of health care in Austria Canada Germany the Netherlands Sweden the UK and the USA It outlines how far countries have moved to adopt fixed budgets and how management on a macro meso and micro level of the various systems is coping with the challenges and conflicts between the providers patients community and society Its message has relevance for health care providers public policy analysts and health economists worldwide as well as providers of health education and social services
