Development of a Permanently Fire-resistant Cotton Fabric by Reaction with Organoboron Compounds R. Winston Liggett, George Bosmajian, 1961 An evaluation of 50 organoboron compounds as durable flame resistant finishes for cotton fabric was made Some were effective for imparting initial flame resistance but none produced flame resistant effects that would withstand even mild laundering Approximately 100 preparations of organoboron compounds were carried out Treatments were applied to 4 forms of the cotton fabric as essentially pure cellulose as alkali cellulose as aminocellulose and as cellulose amine complexes The ranges of organoboron compounds and of cellulose modifications made it possible to explore the hydrolytic stability of a variety of types of chemical and physical linkages as well as the effects of various side groups In no case were

any flame resistant or washfast effects observed that would indicate any advantage of the organoboron compounds over the ordinary boric acid boric oxide mixtures *Wellington Sears Handbook of Industrial Textiles* Sabit Adanur,1995-10-06 The Wellington Sears Handbook of Industrial Textiles has been a widely used textile industry reference for more than 50 years Now a completely updated new edition has been published It was prepared by a team of industrial textile specialists at Auburn University to provide both technical and management personnel with a comprehensive resource on the current technology and applications of today s industrial textiles All aspects of industrial textiles are covered man made and natural materials manufacturing and finishing methods and all applications There are also sections on properties testing waste management computers and automation and standards and regulations The appendices provide extensive reference data properties specifications manufacturers and trade names mathematical equations and measurement units The text is organized for easy reference and well illustrated with hundreds of schematics and photographs *Flame - Retardant Polymeric Materials* Menachem Lewin,S.
