Flammarion Of Astronomy:

Popular Astronomy Camille Flammarion, John Ellard Gore, 1897 *Astronomical Myths: Based on Flammarions's "History of the Heavens"* John Frederick Blake, Camille Flammarion, 2020-09-28 The Book which is here presented to the public is founded upon a French work by M Flammarion which has enjoyed considerable popularity It contained a number of interesting accounts of the various ideas sometimes mythical sometimes intended to be serious that had been entertained concerning the heavenly bodies and our own earth with a popular history of the earliest commencement of astronomy among several ancient peoples It was originally written in the form of conversations between the members of an imaginary party at the seaside It was thought that this style would hardly be so much appreciated by English as by French readers and therefore in presenting the materials of the French author in an English dress the conversational form has been abandoned Several facts of extreme interest in relation to the early astronomical myths and the development of the science among the ancients having been brought to light especially by the researches of Mr Haliburton a considerable amount of new matter including the whole chapter on the Pleiades has been introduced which makes the present issue not exactly a translation but rather a book founded on the French author s work It is hoped that it may be found of interest to those who care to know about the early days of the oldest of our sciences which is now attracting general attention again by the magnitude of its recent advances Astronomy also in early days as will be seen by a perusal of this book was so mixed up with all the affairs of life and contributed so much even to religion that a history of its beginnings is found to reveal the origin of several of our ideas and habits now apparently quite unconnected with the science There is matter of interest here therefore for those who wish to know only the history of the general ideas of mankind Astronomy Camille Flammarion, 1914 *Astronomy for Amateurs* Camille Flammarion, 1904 Astronomy for Amateurs Camille Flammarion, Frances Alice Welby, 1903 The Science of Astronomy is sublime and beautiful Noble elevating consoling divine it gives us wings and bears us through Infinitude In these ethereal regions all is pure luminous and splendid Dreams of the Ideal even of the Inaccessible weave their subtle spells upon us The imagination soars aloft and aspires to the sources of Eternal Beauty What greater delight can be conceived on a fine spring evening at the hour when the crescent moon is shining in the West amid the last glimmer of twilight than the contemplation of that grand and silent spectacle of the stars stepping forth in sequence in the vast Heavens All sounds of life die out upon the earth the last notes of the sleepy birds have sunk away the Angelus of the church hard by has rung the close of day But if life is arrested around us we may seek it in the Heavens These incandescing orbs are so many points of interrogation suspended above our heads in the inaccessible depths of space Gradually they multiply There is Venus the white star of the shepherd There Mars the little celestial world so near our own There the giant Jupiter The seven stars of the Great Bear seem to point out the pole while they slowly revolve around it What is this nebulous light that blanches the darkness of the heavens and traverses the constellations like a celestial path It is the Galaxy the Milky Way composed of

millions on millions of suns The darkness is profound the abyss immense See Yonder a shooting star glides silently across the sky and disappears Dreams of an Astronomer Camille Flammarion,1923 *The Flammarion Book of Astronomy* Camille Flammarion,André Danjon,1964 Camille Flammarion's The Planet Mars Camille Flammarion,2014-10-30 Camille Flammarion 1842 1925 began his career at 16 as a human computer under the great mathematician U J J Le Verrier at the Paris Observatory He soon tired of the drudgery he was drawn to more romantic vistas and at 19 wrote a book on an idea that he was to make his own the habitability of other worlds There followed a career as France s greatest popularizer of astronomy with over 60 titles to his credit An admirer granted him a chateau at Juvisy sur l Orge and he set up a first rate observatory dedicated to the study of the planet Mars Finally in 1892 he published his masterpiece La Planete Mars et ses conditions d habitabilite a comprehensive summary of three centuries worth of literature on Mars much of it based on his own personal research into rare memoirs and archives As a history of that era it has never been surpassed and remains one of a handful of indispensable books on the red planet Sir Patrick Moore 1923 2012 needs no introduction his record of popularizing astronomy in Britain in the 20th century equaled Flammarion s in France in the 19th century Moore pounded out hundreds of books as well as served as presenter of the BBC s TV program Sky at Night program for 55 years a world record Though Moore always insisted that the Moon was his chef d oeuvre Mars came a close second and in 1980 he produced a typescript of Flammarion s classic Unfortunately even he found the project too daunting for his publishers and passed the torch of keeping the project alive to a friend the amateur astronomer and author William Sheehan in 1993 Widely regarded as a leading historian of the planet Mars Sheehan has not only meticulously compared and corrected Moore s manuscript against Flammarion s original so as to produce an authoritative text he has added an important introduction showing the book s significance in the history of Mars studies Here results a book that remains an invaluable resource and is also a literary tour de force in which the inimitable style of Flammarion has been rendered in the equally unique style of Moore **Popular Astronomy, a General Description of the Heavens by Camille Flammarion** Camille Flammarion,John Ellard Gore, Studies in Astronomy John Ellard Gore,1904 **Popular Astronomy** Camille Flammarion,1907 **The Flammarion Book of Astronomy** Camille Flammarion,1968 *Essential Novelists - Camille Flammarion* August Nemo,Camille Flammarion,2019-07-03 Welcome to the Essential Novelists book series were we present to you the best works of remarkable authors For this book the literary critic August Nemo has chosen the two most important and meaningful novels of Sara Jeannette Duncan wich are The Imperialist and An American Girl in London Duncan tended to identify as an Anglo Indian a somewhat marginalised group within the British Empire Nine of her novels are set in India and most of her works are in the setting of Anglo Indian society of which she said there is such abundance of material it is full of such picturesque incidence such tragic chance Novels selected for this book The Imperialist An American Girl in LondonThis is one of many books in the series Essential Novelists If you liked this book look for the other titles in the series we are sure
