

PARRIS AFTON BONDS

A man with dark hair and a woman with long red hair are shown in a close embrace. The man is on the left, looking down at the woman on the right. They are outdoors at sunset, with a warm orange glow in the background and a silhouette of a tree on the right. The man is wearing a dark jacket, and the woman is wearing a dark top.

Lau,2024-07-31 Learn the basics and more of nanoscale computation and communication in this emerging and interdisciplinary field The field of nanoscale computation and communications systems is a thriving and interdisciplinary research area which has made enormous strides in recent years A working knowledge of nanonetworks their conceptual foundations and their applications is an essential tool for the next generation of scientists and network engineers Nanonetworks The Future of Communication and Computation offers a thorough accessible overview of this subject rooted in extensive research and teaching experience Offering a concise and intelligible introduction to the key paradigms of nanoscale computation and communications it promises to become a cornerstone of education in these fast growing areas Readers will also find Detailed treatment of topics including network paradigms machine learning safety and security Coverage of the history applications and important theories of nanonetworks research Examples and use cases for all formulas and equations Nanonetworks is ideal for advanced undergraduate and graduate students in engineering and science as well as practicing professionals looking for an introductory book to help them understand the foundations of nanonetwork systems *Machine Learning for Cloud Management* Jitendra Kumar,Ashutosh Kumar Singh,Anand Mohan,Rajkumar Buyya,2021-11-25 Cloud computing offers subscription based on demand services and it has emerged as the backbone of the computing industry It has enabled us to share resources among multiple users through virtualization which creates a virtual instance of a computer system running in an abstracted hardware layer Unlike early distributed computing models it offers virtually limitless computing resources through its large scale cloud data centers It has gained wide popularity over the past few years with an ever increasing infrastructure a number of users and the amount of hosted data The large and complex workloads hosted on these data centers introduce many challenges including resource utilization power consumption scalability and operational cost Therefore an effective resource management scheme is essential to achieve operational efficiency with improved elasticity Machine learning enabled solutions are the best fit to address these issues as they can analyze and learn from the data Moreover it brings automation to the solutions which is an essential factor in dealing with large distributed systems in the cloud paradigm Machine Learning for Cloud Management explores cloud resource management through predictive modelling and virtual machine placement The predictive approaches are developed using regression based time series analysis and neural network models The neural network based models are primarily trained using evolutionary algorithms and efficient virtual machine placement schemes are developed using multi objective genetic algorithms Key Features The first book to set out a range of machine learning methods for efficient resource management in a large distributed network of clouds Predictive analytics is an integral part of efficient cloud resource management and this book gives a future research direction to researchers in this domain It is written by leading international researchers The book is ideal for researchers who are working in the domain of

cloud computing Application and Theory of Petri Nets and Concurrency Elvio Amparore, Łukasz Mikulski, 2025-06-07 This book constitutes the proceedings of the 46th International Conference on Application and Theory of Petri Nets and Concurrency PETRI NETS 2025 held in Paris France during June 22 27 2025 The 21 full papers and 1 short paper included in this book were carefully reviewed and selected from 48 submissions They deal with topics such as composition and synthesis workflow nets process mining model checking communication timed and stochastic Petri nets etc The proceedings also include one invited talk in full paper length Deception Robert W. Mitchell, Nicholas S. Thompson, 1986-01-01 Mitchell and Thompson have compiled the first interdisciplinary study of deception and its manifestations in a variety of animal species Deception is unique in that it presents detailed explorations of the broadest array of deceptive behavior ranging from deceptive signaling in fireflies and stomatopods to false alarm calling by birds and foxes to playful manipulating between people and dogs to deceiving within intimate human relationships It offers a historical overview of the problem of deception in related fields of animal behavior philosophical analyses of the meaning and significance of deception in evolutionary and psychological theories and diverse perspectives on deception philosophical ecological evolutionary ethological developmental psychological anthropological and historical The contributions gathered herein afford scientists the opportunity to discover something about the formal properties of deception enabling them to explore and evaluate the belief that one set of descriptive and perhaps explanatory structures is suitable for both biological and psychological phenomena Toward Humanoid Robots: The Role of Fuzzy Sets Cengiz Kahraman, Eda Bolturk, 2021-04-04 This book offers a comprehensive reference guide for modeling humanoid robots using intelligent and fuzzy systems It provides readers with the necessary intelligent and fuzzy tools for controlling humanoid robots by incomplete vague and imprecise information or insufficient data where classical modeling approaches cannot be applied The respective chapters written by prominent researchers explain a wealth of both basic and advanced concepts including fuzzy control metaheuristic based control neutrosophic control etc To foster reader comprehension all chapters include relevant numerical examples or case studies Taken together they form an excellent reference guide for researchers lecturers and postgraduate students pursuing research on humanoid robots Moreover by extending all the main aspects of humanoid robots to its intelligent and fuzzy counterparts the book presents a dynamic snapshot of the field that is expected to stimulate new directions ideas and developments *Recent Trends in Swarm Intelligence Enabled Research for Engineering Applications* Siddhartha Bhattacharyya, Mario Köppen, Debashis De, Bijaya Ketan Panigrahi, 2024-07-13 With the advent of data intensive applications the elimination of redundancy in disseminated information has become a serious challenge for researchers who are on the lookout for evolving metaheuristic algorithms which can explore and exploit the information feature space to derive the optimal settings for specific applications Swarm intelligence algorithms have developed as one of the most widely used metaheuristic techniques for addressing this challenge in an effective way Inspired by the behavior of a swarm of bees these swarm intelligence techniques emulate the

corresponding natural instincts to derive optimal solutions for data intensive applications Recent Trends in Swarm Intelligence Enabled Research for Engineering Applications focuses on the recent and most up to date technologies combining other intelligent tools with swarm intelligence techniques to yield robust and failsafe solutions to real world problems This book aims to provide audiences with a platform to learn and gain insights into the latest developments in hybrid swarm intelligence It will be useful to researchers engineers developers practitioners and graduate students working in the major and interdisciplinary areas of computational intelligence communication systems computer networks and soft computing Introduces the theory underpinning hybrid swarm intelligence enabled research as well as the leading applications across the fields of communication networking and information engineering Presents a range of applications research including signal processing communication engineering bioinformatics controllers federated learning systems blockchain and IoT Includes case studies and code snippets in applications chapters
