The growing interest in research on temperament during the last decade has been recorded by several authors e g R Plomin J E Bates from such sources of information as the Social Sciences Citation Index or Psychological Abstracts The editors inquiry shows that the number of cases in which the term temperament was used in the title of a paper or in the paper s abstract published in Psychological Abstracts reveals an essential increase in research on temperament During the years 1975 to 1979 the term temperament was used in the title and or summary of 173 abstracts i e 34.6 publications per year during the next five years 1980-1984 it was used in 367 abstracts 73.4 publications per year whereas in the last five years 1985 to 1989 the term has appeared in 463 abstracts that is in 92.6 publications per year Even if the review of temperament literature is restricted to those abstracts it can easily be concluded that temperament is used in different contexts and with

different meanings hardly allowing any comparisons or general statements One of the consequences of this state of affairs is that our knowledge on temperament does not cumulate despite the increasing research activity in this field This situation in temperament research motivated the editors to organize a one week workshop on The Diagnosis of Temperament Bielefeld Federal Republic of Germany September 1987 **The Times 1000 1998** Martin Barrow, 1998-01-19 This text includes detailed five year analyses of the top 100 UK and top 100 European companies and gives full listings of the top 1000 companies in the UK and the top 1000 companies in Europe plus the top 100 companies in the USA and the Far East Assets turnover profits and numbers of employees are also given The index gives names addresses and telephone and fax numbers for all companies listed **In Vivo Body Composition Studies** K.
