## **Fitting Into Society:**

**A Society Fit for Human Beings** Elie Maynard Adams, 1997-10-31 Argues for a humanistic cultural reformation to counter our materialistic values and science dominated intellectual life and shows how this would affect our lives and transform our society A Society Fit for Human Beings contends that there is a profound incoherence in the foundations of modern Western civilization and that we are on a self destructive course With the quest for wealth and power our dominant concern we find ourselves with a flourishing economy and a supreme military force based on science and technology but with our moral civic and religious culture undermined by our way of comprehending the world Our human identity is problematic the wells of meaning that nourish the human spirit are polluted or drying up and the social order is in disarray This situation E M Adams argues requires nothing less than a historic cultural revolution based on a shift in priorities from wealth and power to humanistic values those grounded in selfhood and lived experience that are essential for human growth meaningful lives and a healthy society Such a shift in our governing values would require a restructuring of our intellectual vision of humankind and the world in terms of humanistic categories This book shows the import of such a humanistic cultural revolution for our human identity morality the social order and our major institutions including the family and community education the economy the government the military and religion It outlines how we can work toward such a cultural revolution and develop a constructive postmodern civilization with a society fit for human beings **Making Capitalism Fit For Society** Colin Crouch, 2014-08-21 Capitalism is the only complex system known to us that can provide an efficient and innovative economy but the financial crisis has brought out the pernicious side of capitalism and shown that it remains dependent on the state to rescue it from its own deficiencies Can capitalism be reshaped so that it is fit for society or must we acquiesce to the neoliberal view that society will be at its best when markets are given free rein in all areas of life The aim of this book is to show that the acceptance of capitalism and the market does not require us to accept the full neoliberal agenda of unrestrained markets insecurity in our working lives and neglect of the environment and of public services In particular it should not mean supporting the growing dominance of public life by corporate wealth The world's most successful mature economies are those that fully embrace both the discipline of the market and the need for protection against its negative outcomes Indeed a continuing unresolved clash between these two forces is itself a major source of vitality and innovation for economy and society But maintenance of that tension depends on the enduring strength of trade unions and other critical groups in civil society a strength that is threatened by neoliberalism's increasingly intolerant onward march Outlining the principles for a renewed and more assertive social democracy this timely and important book shows that real possibilities exist to create a better world than that which is being offered by the wealthy elites who dominate our public and private lives **Public Power, Private Interests and Where Do We Fit In?** Edmund F. Byrne, 1998 All over the world the statues of Mary are miraculously crying In the meantime a journalist in Washington D C is diverted away

from her own personal demons when she takes it upon herself to question why the Vatican is not declaring these occurrences as miracles after witnessing the unexplainable phenomena herself The journalist suspects her nightly barrage of haunting nightmares about the violent murders of countless women from five thousand year old priestesses to women accused of being witches in the seventeenth century may have something to do with the answer as she investigates the biggest story of her life Women all over the world in the 21st century are feeling the awakening as the discovery of ancient artifacts are disproving the beliefs set forth by patriarchal religions for thousands of years When the journalist receives a visitation from a beautiful Goddess who at first appears to be the Virgin Mary she suddenly realizes that an ancient religious and political cover up has grossly distorted some very important historical truths As the journalist investigates and begins to publicly write about what she has uncovered death threats and terror follow next as powerful members of the world's patriarchal religions and the age old male run organizations that support them fight viciously to keep one of the world's oldest and most deceptive societal form of control against women hidden from the world But as intimidation and threats increase so too do the miracles and visitations from the real Sleeping Goddess as she awakens once again to bless and protect the world while igniting the hearts and souls of oppressed women everywhere

*The Equal Society* George Hull, 2015-12-24 Equality is a widely championed social ideal But what is equality And what action is required if present day societies are to root out their inequalities The Equal Society collects fourteen philosophical essays each with a fresh perspective on these questions The authors explore the demands of egalitarian justice addressing issues of distribution and rectification but equally investigating what it means for people to be equals as producers and communicators of knowledge or as members of subcultures and considering what it would take for a society to achieve gender and racial equality The essays collected here address not just the theory but also the practice of equality arguing for concrete changes in institutions such as higher education the business corporation and national constitutions to bring about a more equal society The Equal Society offers original approaches to themes prominent in current social and political philosophy including relational equality epistemic injustice the capabilities approach African ethics gender equality and the philosophy of race It includes new work by respected social and political philosophers

*Monsters, Monstrosities, and the Monstrous in Culture and Society* Diego Compagna, Stefanie Steinhart, 2020-01-28 Existing research on monsters acknowledges the deep impact monsters have especially on Politics Gender Life Sciences Aesthetics and Philosophy From Sigmund Freud's essay The Uncanny to Scott Poole's *Monsters in America* previous studies offer detailed insights about uncanny and immoral monsters However our anthology wants to overcome these restrictions by bringing together multidisciplinary authors with very different approaches to monsters and setting up variety and increasing diversification of thought as guiding patterns Existing research hints that monsters are embedded in social and scientific exclusionary relationships but very seldom copes with them in detail Erving Goffman's doesn't explicitly talk about monsters in his book *Stigma* but his study is an exceptional case which shows that monsters are stigmatized by society because of their

deviations from norms but they can form groups with fellow monsters and develop techniques for handling their stigma Our book is to be understood as a complement and a further development of previous studies The essays of our anthology pay attention to mechanisms of inequality and exclusion concerning specific historical and present monsters based on their research materials within their specific frameworks in order to create engaging constructive critical and diverse approaches to monsters even utopian visions of a future of societies shared by monsters Our book proposes the usual view that humans look in a horrified way at monsters but adds that monsters can look in a critical and even likewise frightened way at the very societies which stigmatize them      **Self Control in Society, Mind, and Brain** Ran Hassin, Kevin Ochsner, Yaacov Trope, 2010-04-12
