The articles collected in this volume were written for a Colloquium on Fifty Years of Quantum Mechanics which was held at the University Louis Pasteur of Strasbourg on May 2 4 1974 in commemoration of the original work by De Broglie in 1924 It is our hope that this volume will convey to the reader the idea that quantum mechanics besides being a fundamental tool for scientific workers today is also a source of a number of questions and thoughts about the interpretation of the foundation of quantum mechanics itself This gives rise to problems of a philosophical and logical character and has repercussions on other domains such as the theory of gravitation Besides the papers presented at the Colloquium an article has been included by D Bohm and B Hiley This compensates perhaps for the article of S Kochen whose manuscript unfortunately did not reach us in time for inclusion in his volume A few months after this Colloquium we learned of the death of Professor Jauch who had taken a lively and crucial part in its discussions We have been extremely saddened by the news of his death and would like to express our long standing indebtedness to him as a physicist **The American Catalogue** ,1908 *The Publishers Weekly* ,1877
