Feldman, Sheila B. Roberts, Helen Northen, 1976 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Tokyo District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers **Theory and Practice of Community Social Work** Samuel H. Public Program Analysis

Ronald Forthofer, 2012-12-06 The past two decades have witnessed a dramatic increase in the demand for analyses of health and public affairs program data Governments at the federal and state levels have stimulated if not mandated much of this increased demand and spawned numerous not for profit and quasi public organizations research groups lobbying organizations consulting firms who actively use analytic techniques Program analysis is a broad term that encompasses activities such as program planning and prediction program assessment and program evaluation Though purposes differ and techniques vary the common denominator for all applications is the attempt to use quantitative techniques to provide comprehensive and objective analyses Program analysis in public health and public affairs shares another common feature In many cases the data collected for these applications are categorical in nature that is discrete information represented by categories Whether a defendant in a criminal trial is convicted yes no the number of times a person visits a community health center in a month 0 1 2 3 how a person feels about a proposed program agree disagree not sure no opinion these are

examples of categorical data This book describes a multivariate categorical data analysis technique the weighted least squares WLS approach developed by Grizzle Starmer and Koch GSK applied to program analysis in health and public affairs It is written for in service professionals who desire an introduction to applied categorical data analysis and for preservice students who are studying quantitative methods *Use of Groups in Social Work Practice* Bernard Davies, 2024-10-30 First Published in 1975 *Use of Groups in Social Work Practice* seeks to encourage caseworkers to use groups as an integral part of their professional practice and assumes that no one book could entirely meet this need The present book adopts an interactionist approach It discusses crucial themes like group work in the British social work tradition the North American experience what is a group group work and social work's strategic purposes tactical goals for group work the self as a social product the ingredients of group activity the authority of the group worker and the future for group work This is a must read for students of social work

Social Work and Sustainability in Asia Alice M. L. Chong, Iris Chi, 2019-01-22 The rapid trend of globalization has brought with it a variety of sustainability challenges including global climate change biodiversity loss poverty and social inequalities which are problems with unclear boundaries complicated interrelated components undefined parameters contradictory values and no single solution Social work has a long standing tradition of emphasizing the interaction of people and their environment For this reason the field of social work is one of the best placed academic disciplines for studying the impact of environmental change on social systems and should play an important role in developing strategies for mitigating and adapting to these environmental challenges However traditional social work tends to lack sustaining work and neglect globally interconnected social problems Combining case studies and country reports from around Asia with a theoretical framework for understanding sustainability concerns this book aims to show how social work can play a valuable role in mitigating and adapting to environmental challenges and social sustainability For social work to develop a meaningful and viable profession that addresses contemporary sustainability issues it requires changes and transformation in paradigm theories strategies social policy and social services that will facilitate a sustainable future for all mankind
