The Chairs for Women in Science and Engineering Program Caroline D'Amours, Hannah Young, Catherine Mavriplis, 2024-04-10 This book describes the origins and evolution of Canada's 30 year Natural Sciences and Engineering Research Council Chairs for Women in Science and Engineering Program The book starts literally with a bang right as Montreal and all of Canada were rocked by the 1989 Ecole Polytechnique Massacre of 14 women describing how the Chair program took on a frenetic pace as a single

Chairholder Monique Frize tried to respond to an entire country's concerns about women in engineering both as students and as professionals. The authors first cover the program from 1989 through 1997 when the program was expanded to five regional Chairs of which there have been over three generations by now. The book then provides synopses of each Chairholder's comprehensive regional program to recruit, retain, and advance girls and women in STEM, organized by generation, providing a unique historical view of the changing landscape for research and outreach programs to increase the participation of women in male-dominated scientific fields. Readers will find an effective model for national programs addressing equity, diversity, and inclusion in STEM and be inspired by the 16 strong role models who pioneered blended careers in STEM and gender equity advocacy.

These original essays challenge a host of traditional assumptions by integrating women into the Russian past. Using recent advances in the study of gender, the family, class, and the status of women, the authors examine various roles of Russian women and offer a broad overview of a vibrant and growing field. By ignoring gender issues, historians have failed to understand how efforts to control women and women's reactions to these efforts have shaped political and social institutions and thus influenced the course of Russian and Soviet history. Women Athletes and Entrepreneurs Ph. D. Melissa L. Greer, 2009-02. Sports athletes are connected to business entrepreneurship due to the relationships of business strategies, psychological, and motivational characteristics according to authoritative research. Barrel racing has become a limitless opportunity for success, becoming the second favorite event in the rodeo. However, the barrel racing cowgirl faces criticisms, perhaps due to a psychic prison that society continues to live from the lack of knowledge of this type of culture. It is debated this industry is not an efficient entrepreneurship endeavor. However, the woman barrel racer is a sports athlete who participates in her own activity to obtain capital, self-actualization, and achievement. It is further acknowledged she is responsible for her own financial resources to pay for business expenses in order to continue the venture. Cowboys have been studied and confirmed to be entrepreneurs, so why would women barrel racers be different? The purpose of this study was to compare and contrast Women Barrel Racers, also referred to as World Athlete Entrepreneurs with Women Business Entrepreneurs, and determine if there is an association between women who race and women who have their own businesses. The main areas of concern were business strategies, psychological traits, and motivational characteristics. This study also investigated the Birth Theory and the Only or Eldest Daughter Syndrome. Finally, barriers experienced by World Athlete Entrepreneurs and Women Business Entrepreneurs were analyzed.
