## **Fixing Columbine The Challenge To American Liberalism:**

Fixing Columbine Doriane Lambelet Coleman, 2002 *Fixing Columbine* uses the 1999 school shootings at Columbine High School in Littleton Colorado as a metaphor for the much larger and largely silent epidemic of childhood dysfunction that has swept the nation in the last thirty years claiming as its victims approximately 15 to 25 million American children annually Using both a child development lens and comparative analysis the book first describes the causes of the epidemic which include for the affected children absent adults toxic media exposures dysfunctional peers and an anti social educational environment It then tackles the question how to fix it The book argues that classical liberal principles as represented in the constitutional doctrines of parental autonomy and free speech simultaneously enabled the epidemic and impede the most obvious law based solutions It concludes with a partial answer in the public schools as they perform their original and still salient communitarian function

**The Bully Society** Jessie Klein, 2013-08 Choice's Outstanding Academic Title list for 2013 Through interviews and case studies, Klein develops an explanation for bully behavior in America's schools. In today's schools, kids bullying kids is not an occasional occurrence but rather an everyday reality where children learn early that being sensitive, respectful, and kind earns them no respect. Jessie Klein makes the provocative argument that the rise of school shootings across America and childhood aggression more broadly are the consequences of a society that actually promotes aggressive and competitive behavior. *The Bully Society* is a call to reclaim America's schools from the vicious cycle of aggression that threatens our children and our society at large. Heartbreaking interviews illuminate how both boys and girls obtain status by acting masculine, displaying aggression at one another's expense, as both students and adults police one another to uphold gender stereotypes. Klein shows that the aggressive ritual of gender policing in American culture creates emotional damage that perpetuates violence through revenge, and that this cycle is the main cause of not only the many school shootings that have shocked America but also related problems in schools manifesting in high rates of suicide, depression, anxiety, eating disorders, self-cutting, truancy, and substance abuse. After two decades working in schools as a school social worker and professor, Klein proposes ways to transcend these destructive trends, transforming school bully societies into compassionate communities.

**The Relationship Rights of Children** James G. Dwyer, 2006-04-17 This book presents a sustained theoretical analysis of what rights children should possess in connection with state decision making about their personal relationships which the state does in numerous aspects of family law including paternity adoption custody and visitation termination of parental rights and grandparent visitation It examines the nature and normative foundation of adults rights in connection with relationships among themselves and then assesses the extent to which the moral principles underlying adults rights apply also to children It concludes that the law should ascribe to children rights equivalent though not identical to those which adults enjoy and this would require substantial changes in the way the legal system treats children including a reformation of the rules for establishing legal parent child relationships at birth and of the rules for deciding whether to end a parent child relationship
