Fire,1991 Although many people may want to know how plastics bum the question of how plastics bum is only a part of a much larger question How does anything bum To examine the burning process of plastics in isolation does not make any sense and may lend credence to the idea that plastics are a special material with a special hazard An analogy would be to study how carbonless carbon paper bums and then to relate the burning characteristics and combustion products of this single type of paper to all other types of paper and even to other wood products and to wood itself The testing of one type of product from a very large family of products that are physically similar and the relation of these test results to all other members of that family has no basis in the scientific method Those who do so are ignorant of science unless they have some hidden reason for wanting to ascribe certain properties to all related materials *Encyclopedia of PVC, Second Edition* Leonard I. Nass,1992-08-28 Revised and updated throughout this second edition

covers significant changes and advances in PVC science and technology Volume 3 examines such diverse subjects as PVC compounding equipment compounding process control solid and liquid compound process development compound and product specifications test methods with an interpretation of test results environmental and occupational safety and melt processing Providing over 700 literature references volume 3 is intended for polymer plastics physical organic surface and colloid chemists plastics chemical materials mechanical and manufacturing engineers and technical personnel and graduate and postgraduate students in these disciplines
