A Head Start on Science William C. Ritz,2007-06 For the littlest scientists the whole wide world can be a laboratory for learning Nurture their natural curiosity with A Head Start on Science a treasury of 89 hands on science activities specifically

for children ages 3 to 6. The activities are grouped into seven stimulating topic areas the five senses weather physical science critters water and water mixture seeds and nature walks. Because the activities have been field tested by more than a thousand Head Start teachers over 10 years you'll find this collection unusually easy to use in a variety of settings including elementary schools pre K programs and day care. In addition to clear background and a helpful materials list you get step by step procedures and help preparing for comments and questions children may pose. Each activity ends with a reproducible Family Science Connection in both English and Spanish to send home so the whole family can share a learning experience that's both simple and pleasant. Thanks to a focus on the fun of exploration and discovery children probably won't be the only ones who find these activities irresistible. As Editor Bill Ritz writes in the Introduction We hope your own sense of wonder will be heightened as you observe children and as their curiosity leads them to answer their own questions about everything they see hear smell and touch.

Educación para la ciudadanía y convivencia, El enfoque de la Educación Emocional

Rafael Bisquerra Alzina, 2008 La Educación para la Ciudadanía es una propuesta de los gobiernos de diversos países que tiene el propósito de educar para una ciudadanía activa efectiva y responsable que haga posible la convivencia en democracia. Por ello la Ley Orgánica de Educación la incorpora como una asignatura más. Ante este hecho se han producido diversas reacciones desde los que piensan que puede ser un adoctrinamiento político o los que piensan que no debe ser una asignatura evaluable sino estar presente en la educación como un tema transversal hasta los que la ven como una fantástica oportunidad. Por ello aporta elementos de reflexión para avanzar hacia una puesta en práctica que tenga las mayores probabilidades de lograr el objetivo de una convivencia pacífica en democracia que haga posible el bienestar personal y social. Para conseguir ese objetivo es necesario desarrollar unas competencias que contribuyan a hacerlo posible: habilidades sociales, respeto y tolerancia, prevención y resolución positiva de conflictos, competencias emocionales, etc. Este libro será de gran utilidad para desarrollar dichas competencias porque además desarrolla una línea de investigación centrada en el diseño y aplicación y evaluación de programas para la prevención de la violencia ya que la violencia constituye uno de los graves obstáculos para la convivencia.
