Lövin,2024-01-05 Isabella L vin s The Oceanic Feeling On the Need for a New Narrative is a unique document of a life spent on the front lines of the climate battle and at the negotiating tables where the future of our planet is decided The Swedish investigative journalist who became a member of the European Parliament and then served for seven years in government five of those as Deputy Prime Minister and Climate Minister takes us on a journey behind the scenes of climate and global ocean policy making Some may remember the viral picture of her signing the Swedish climate law in 2017 As Donald Trump just had signed a regressive executive order limiting women s sexual and reproductive rights surrounded by only men she by contrast signed progressive climate legislation surrounded by women Deeply concerned about the shrinking confidence in democracy L vin offers a pedagogic and hopeful account of the fact that change can happen if there is a will and a vision But she also recognizes the main reason why humanity is not acting on the many global crises a narrative of egoism and individualism A truer and much more positive story can be found when we recognize The Oceanic Feeling a deep connection with nature people and the miraculous web of life on the planet putting empathy responsibility and awe at the center of what it is to be human How L vin asks us can we convert the world to this new healthier narrative Connected Roberto J.

**Political Technology** Andrew Wilson, 2023-12-14 Political technology is a Russian term for the professional engineering of politics It has turned Russian politics into theatre and propaganda and metastasised to take over foreign policy and weaponise history The war against Ukraine is one outcome In the West spin doctors and political consultants do more than influence media or run campaigns they have also helped build parallel universes of alternative political reality Hungary has used political technology to dismantle democracy The BJP in India has used it to consolidate unprecedented power Different countries learn from each other Some types of political technology have become notorious like troll farms or data mining but there is now a global wholesale industry selling a range of manipulation techniques from astroturfing to fake parties to propaganda apps This book shows that political technology is about much

more than online disinformation it is about whole new industries of political engineering     [La economía del cáñamo en la España suroriental](#) Hans Folker,2015-05-18 El cáñamo que fue durante siglos una de las principales fibras textiles simboliza el mundo perdido a partir del intenso desarrollo capitalista que representó la era del plástico iniciada en la década de 1960. En claro contraste con las pautas que impuso esta nueva época el cáñamo era el mayor representante de una agricultura que producía una gran variedad de cosechas y que reducía su dependencia de factores externos a los que generaba el mismo ciclo agrario. Implicaba exigencias considerables y duras a la mano de obra pero su aprovechamiento podía beneficiar a grandes unidades de explotación y a modestas economías familiares. De ahí que su cultivo y en general toda la economía artesanal e industrial que se basaba en esta fibra tuviesen muy importantes implicaciones socioculturales y políticas. A comienzos de la década de 1960 hacía mucho que la producción española de cáñamo estaba concentrada en el Bajo Segura en el sur del País Valenciano. Durante las dos últimas cosechas importantes (1962 y 1963) Folker Hansen realizó esta investigación que cumplía un viejo objetivo de su director de tesis el destacado geógrafo y presidente de la Unión Geográfica Internacional Carl Troll que promovió el enfoque del estudio ecológico del paisaje en el que se superaba la división entre factores físicos y sociales. El autor estudió sobre el terreno y con técnicas y planteamientos novedosos la organización social de la economía del cáñamo en las comarcas del sur valenciano. El Bajo Segura, El Vinalopó y La Marina además de una zona del noroeste de la Región de Murcia. Folker Hansen retrató la dinámica en la que se movían aquellas sociedades anteriores a la extinción del campesinado a las que poco después iban a alcanzar de lleno las traumáticas consecuencias de la nueva etapa desarrollista durante la segunda fase de la dictadura de Franco. Su trabajo por tanto es una referencia fundamental que cobra mayor sentido a partir de la necesidad de evaluar de modo crítico las implicaciones históricas del desarrollo de las últimas décadas.
