The Episteme of the Gallic Past Lisa Regazzoni, 2024-12-02 This book aims to reconceive the field of knowledge of the Gallic past in French discourse of the eighteenth and early nineteenth centuries by focusing on the monument as an object capable of underpinning insights into that past the evolution of the concept and the epistemic practices used to produce it Through monuments the book redirects our gaze toward the French provinces where material and immaterial evidence of the Gallic past was discovered and transformed into epistemic objects This perspective results in a provincialization of Paris as a site of knowledge production and sheds light on the crucial role of provincial scholarship not only in the invention of the Gallic past but also in methodological and epistemological renewal The result is a revision of recent historiography which interpreted the narrative of an autochthonous pre Roman Gallic past as nation building This volume offers a pioneering contribution toward new directions in historical epistemology focused on the historicity of the species of evidence of each epoch

Knowledge tells the story of three generations of Church of England chaplains who served the English Levant Company in Syria during the seventeenth and eighteenth centuries. Reconstructing the careers of its protagonists in the cosmopolitan city of Ottoman Aleppo, Simon Mills investigates the links between English commercial and diplomatic expansion and English scholarly and missionary interests: the study of Middle Eastern languages, the exploration of biblical and Greco-Roman antiquities, and the early dissemination of Protestant literature in Arabic. Early modern Orientalism is usually conceived as an episode in the history of scholarship. By shifting the focus to Aleppo, *A Commerce of Knowledge* brings to light the connections between the seemingly separate worlds, tracing the emergence of new kinds of philological and archaeological enquiry in England back to a series of real-world encounters between the chaplains and the scribes, booksellers, priests, rabbis, and sheikhs they encountered in the Ottoman Empire. Setting the careers of its protagonists against a background of broader developments across Protestant and Catholic Europe, Mills shows how the institutionalization of English scholarship and the later English attempt to influence the Eastern Christian churches were bound up with the international struggle to establish a commercial foothold in the Levant. He argues that these connections would endure until the shift of British commercial and imperial interests to the Indian subcontinent in the second half of the eighteenth century fostered new currents of intellectual life at home.

New Approaches to Naples c.1500-c.1800 Helen Hills, 2016-04-22

Early modern Naples has been characterized as a marginal, wild, and exotic place on the fringes of the European world and as such an appropriate target of attempts by Catholic missionaries and others to civilize the city. Historiographically bypassed in favour of Venice, Florence, and Rome, Naples is frequently seen as emblematic of the cultural and political decline in the Italian peninsula and as epitomizing the problems of southern Italy. Yet as this volume makes plain, such views blind us to some of its most extraordinary qualities and limit our understanding not only of one of the world's great capital cities but also of the wider social, cultural, and political dynamics of early modern Europe. As the centre of Spanish colonial power within Europe during the vicerealty and with a population second only to Paris in early modern Europe, Naples is a city that deserves serious study. Further, as a Habsburg dominion, it offers vital points of comparison with non-European sites which were subject to European colonialism. While European colonization outside Europe has received intense scholarly attention, its cultural impact and representation within Europe remain under-explored. Too much has been taken for granted, too few questions have been posed. In the sphere of the visual arts, investigation reveals that Neapolitan urbanism, architecture, painting, and sculpture were of the highest quality during this period while differing significantly from those of other Italian cities. For long ignored or treated as the subaltern sister of Rome, this urban treasure house is only now receiving the attention from scholars that it has so long deserved. This volume addresses the central paradoxes operating in early modern Italian scholarship. It seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history. Those developments showcased here include both

Travel Narratives, the New Science, and Literary Discourse, 1569-1750 Judy A. Hayden, 2016-03-03 The focus of this volume is the intersection and the cross fertilization between the travel narrative literary discourse and the New Philosophy in the early modern to early eighteenth century historical periods Contributors examine how in an historical era which realized an emphasis on nation and during a time when exploration was laying the foundation for empire science and the literary discourse of the travel narrative become intrinsically linked Together the essays in this collection point out the way in which travel narratives reflect the anxiety from changes brought about through the discoveries of the new knowledge and the way this knowledge in turn provided a new and more complex understanding of the expanding world in which the writers lived The worlds in this text are many for no world is monomial from the antipodes to the New World from the heavens to the seas and from fictional worlds to the world which contains and or constructs one s nation and empire All of these essays demonstrate the manner in which the New Philosophy dramatically changed literary discourse

A Historical Approach to Casuistry Carlo Ginzburg, Lucio Biasiori, 2018-12-27 Casuistry the practice of resolving moral problems by applying a logical framework has had a much larger historical presence before and since it was given a name in the Renaissance The contributors to this volume examine a series of case studies to explain how different cultures and religions past and present have wrestled with morality's exceptions and margins and the norms with which they break For example to what extent have the Islamic and Judaic traditions allowed smoking tobacco or gambling How did the Spanish colonization of America generate formal justifications for what it claimed Where were the lines of transgression around food money lending and sex in Ancient Greece and Rome How have different systems dealt with suicide Casuistry lives at the heart of such questions in the tension between norms and exceptions between what seems forbidden but is not A Historical Approach to Casuistry does not only examine this tension but re frames casuistry as a global phenomenon that has informed ethical and religious traditions for millennia and that continues to influence our lives today
