## **Einleitung In Die Ethik Vorlesungen Sommersemester 1920 Und 1924:**

**Self and Other** Dan Zahavi, 2014-11-27 Can you be a self on your own or only together with others Is selfhood a built in feature of experience or rather socially constructed How do we at all come to understand others Does empathy amount to and allow for a distinct experiential acquaintance with others and if so what does that tell us about the nature of selfhood and social cognition Does a strong emphasis on the first personal character of consciousness prohibit a satisfactory account of intersubjectivity or is the former rather a necessary requirement for the latter Engaging with debates and findings in classical phenomenology in philosophy of mind and in various empirical disciplines Dan Zahavi's new book *Self and Other* offers answers to these questions Discussing such diverse topics as self consciousness phenomenal externalism mindless coping mirror self recognition autism theory of mind embodied simulation joint attention shame time consciousness embodiment narrativity self disorders expressivity and Buddhist no self accounts Zahavi argues that any theory of consciousness that wishes to take the subjective dimension of our experiential life serious must endorse a minimalist notion of self At the same time however he also contends that an adequate account of the self has to recognize its multifaceted character and that various complementary accounts must be integrated if we are to do justice to its complexity Thus while arguing that the most fundamental level of selfhood is not socially constructed and not constitutively dependent upon others Zahavi also acknowledges that there are dimensions of the self and types of self experience that are other mediated The final part of the book exemplifies this claim through a close analysis of shame

Phenomenology and Perspectives on the Heart Anthony J. Steinbock, 2022-06-06 This edited collection marks a new wave of international and philosophical scholarship on the heart that rich dimension of our emotional being in the world This text addresses the relation between feeling and knowing and investigates whether or not the heart has its own way of cognition and critique This book takes up the emotional turn in philosophy in general and phenomenology in particular advancing this field through innovative and original perspectives The contributions come from philosophers working in distinctive yet overlapping areas of research

The Existential Husserl Marco Cavallaro, George Heffernan, 2022-10-25 This book examines Husserl's approach to the question concerning meaning in life and demonstrates that his philosophy includes a phenomenology of existence Given his critique of the fashionable philosophy of existence of the late 1920s and early 1930s one might think that Husserl posited an opposition between transcendental phenomenology and existential philosophy as well as that in this respect he differed from existential phenomenologists after him But texts composed between 1908 and 1937 and recently published in *Husserliana XLII Grenzprobleme der Ph nomenologie* 2014 show that the existential Husserl was not opposed but open to the phenomenological investigation of several basic topics of a philosophy of existence A collection of contributions from a team of internationally recognized scholars drawing on these and other sources the present volume offers insights into the relationship between phenomenology and philosophy of existence It does so by 1 delineating the basic outlines of Husserl's

phenomenology of existence 2 reinterpreting the tension between Husserl's transcendental phenomenology and Jaspers's and Heidegger's philosophy of existence as well as Kierkegaard's and Sartre's existentialism and 3 investigating the existential aspects of Husserl's phenomenological ethics Thus focusing on neglected aspects of Husserl's thought the volume shows that there is a consensus between classical phenomenology and existential phenomenology on the urgency of addressing the existential questions that in *The Crisis of the European Sciences and Transcendental Phenomenology* 1936 Husserl calls the questions concerning the meaning or meaninglessness of this entire human existence The Existential Husserl represents a major contribution to the clarification of the historical and philosophical developments from transcendental phenomenology to existential phenomenology The book should appeal to a wide audience of many readers at all levels looking for phenomenological answers to existential questions

*Phenomenology and the Human Positioning in the Cosmos* Anna-Teresa Tymieniecka, 2012-10-24 The classic conception of human transcendental consciousness assumes its self supporting existential status within the horizon of life world nature and earth Yet this assumed absoluteness does not entail the nature of its powers neither their constitutive force This latter call for an existential source reaching beyond the generative life world network Transcendental consciousness having lost its absolute status its

point of reference it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all establishing an original foundation of phenomenology in the primogenital onto-poiesis of life Einleitung in die Ethik ; Vorlesungen Sommersemester (1920 und 1924) Edmund Husserl, 1950 *Feeling and Value, Willing and Action* Marta Ubiali, Maren Wehrle, 2015-01-13 This volume explores the role and status of phenomena such as feelings values willing and action in the domain of perception and social cognition as well as the way in which they are related In its exploration the book takes Husserl's lifelong project *Studien zur Struktur des Bewusstseins* 1909 1930 as its point of departure and investigates these phenomena with Husserl but also beyond Husserl Divided into two parts the volume brings together essays that address the topics from different phenomenological philosophical and psychological perspectives They discuss Husserl's position in dialogue with historical and recent philosophical and psychological debates and develop phenomenological accounts and descriptions with the help of Geiger Heidegger Merleau Ponty Plessner Sartre Scheler Schopenhauer and Reinach Epistemology, Archaeology, Ethics Pol Vandavelde, Sebastian Luft, 2010-06-15 Epistemology Archaeology Ethics Current Investigations of Husserl's Corpus presents fifteen original essays by an international team of expert contributors that together represent a cross section of Husserl Studies today The collection manifests the extent to which single themes in Husserl's corpus cannot be isolated but must be considered in relation to their overlap with each other Many of the accepted views of Husserl's philosophy are currently in a state of flux with positions that once seemed incontestable now finding themselves relegated to the status of one particular school of thought among several Among all the new trends and approaches this volume offers a representative sample of how Husserlian research should be conducted given the current state of the corpus The book is divided into four parts each dedicated to an area of Husserl Studies that is currently gaining prominence Husserlian epistemology his views on intentionality the archaeology of constitution and ethics a relatively recent field of study in phenomenology **The New Yearbook for Phenomenology and Phenomenological Philosophy** Burt C. Subjectivity and Lifeworld in Transcendental Phenomenology Sebastian Luft, 2011-10-31 The purpose of the text is threefold 1 to contribute to the renaissance of Husserl interpretation around a the continuing publication of Husserl's manuscripts and b his unpublished manuscripts 2 to account for the historical origins and influence of the phenomenological project by articulating Husserl's relationship to authors before and after him 3 to argue for the viability of the phenomenological project as conceived by Husserl in his later years In regard to the last purpose Luft's main argument shows that Husserlian phenomenology is not exhausted in the Cartesian early perspective which is indeed its weakest and most vulnerable perspective Husserlian phenomenology is a robust and philosophically necessary perspective when taken from its hermeneutic late perspective And the ultimate point Luft makes in the text is that Husserl's hermeneutic phenomenology is distinct from other hermeneutic philosophers namely Cassirer Heidegger and Gadamer Unlike them Husserl's focus centers on the work the subject must do in order to uncover the prejudices that guide his/her unreflective relationship to the world In making his argument Luft also demonstrates that there is a deep consistency within Husserl's own writings from early to late around the guiding themes of 1 the natural attitude 2 the need and function of the epoch and 3 the split between egos where the transcendental self distinct from the natural self

is seen as the fundamental ability we all have to inquire into the genesis of our tradition laden attitudes toward the world
