Anthony J Martin, 2017-02-07 Humans have gone underground for survival for thousands of years from underground cities in Turkey to Cold War era bunkers But our burrowing roots go back to the very beginnings of animal life on Earth Many animal lineages alive now including our own only survived a cataclysmic meteorite strike 65 million years ago because they went underground On a grander scale the chemistry of the planet itself had already been transformed many millions of years earlier by the first animal burrows which altered whole ecosystems Every day we walk on an earth filled with an underground wilderness teeming with life Most of this life stays hidden yet these animals and their subterranean homes are ubiquitous ranging from the deep sea to mountains from the equator to the poles Burrows are a refuge from predators a safe home for raising young or a tool to ambush prey Burrows also protect animals against all types of natural disasters Filled with spectacularly diverse fauna acclaimed paleontologist and ichnologist Anthony Martin reveals this fascinating hidden world that will continue to influence and transform life on this planet Life on Matagorda Island Wayne H. McAlister, 2004 When Wayne and Martha McAlister moved to Matagorda Island a wildlife refuge off the central Texas coast they anticipated staying perhaps five years But sent to take up duties with the U S Fish and Wildlife Service Wayne McAlister fell under the island's spell the moment he stepped out of his aging house trailer and met his first Matagorda rattlesnake Seven years later the McAlisters were still observing the flora and fauna of Matagorda Except for the road and some occasional fence posts the island appears untouched by humans In *Life on Matagorda Island* Wayne McAlister shows what life was like amid such isolation Jacket *Life Traces of the Georgia Coast* Anthony J. Martin, 2013 Have you ever wondered what left behind those prints and tracks on the seashore or what made those marks or dug those holes in the dunes *Life Traces of the Georgia Coast* is an up close look at these traces of life and the animals and plants that made them It tells about how the tracemakers lived and how they interacted with their environments This is a book about ichnology the study of such traces and a wonderful way to learn about the behavior of organisms living and long extinct *Life Traces* presents an overview of the traces left by modern animals and plants in this biologically rich region shows how life traces relate to the environments natural history and behaviors of their tracemakers and applies that knowledge toward a better understanding of the fossilized traces that ancient life left in the geologic record Augmented by illustrations of traces made by both ancient and modern organisms the book shows how ancient trace fossils directly relate to modern traces and tracemakers among them insects grasses crabs shorebirds alligators and sea turtles The result is an aesthetically appealing and scientifically grounded book that will serve as source both for scientists and for anyone interested in the natural history of the Georgia coast Sexy Orchids Make Lousy Lovers Martha L. Crump, 2009-11-15 Vampire bats that regurgitate blood for roosting buddies Mosquitoes that filch honeydew droplets from ants Reptiles that enforce chastity on their lovers with copulatory plugs Capuchin monkeys that use millipede secretions as mosquito repellent The natural world is full of unusual relationships and negotiation between life forms striving to survive is evolution at its most diverse entertaining and awe inspiring Picking up where her highly popular

Headless Males Make Great Lovers left off tropical field biologist Marty Crump takes us on another voyage of discovery into the world of unusual natural histories this time focusing on extraordinary interactions involving animals plants fungi and bacteria Sexy Orchids Make Lousy Lovers you need only recall your last sinus infection to understand how that works Throughout Crump brings her trademark spunk and zest to these stories of intimate exchange She introduces readers to penguins that babysit pseudoscorpions that ride and mate under the wings of giant harlequin beetles and parasitic fungi that bend insects to their will A lively companion to Crump s earlier work Sexy Orchids Make Lousy Lovers Other Unusual Relationships captures the bizarre and befuddling aspects of the behavior of animals plants and microbes After this entertaining romp through the world of natural relationships you ll never look at an orchid the same way again **A Field Guide to Southeastern and Caribbean Seashores** Eugene Herbert Kaplan,1988 With more than 750 illustrations including 300 color photographs this guide covers more than 1 000 species such as shoreside plants clams shrimps crabs corals seaweeds sponges and sea urchins as well as all of the common seashore communities found from Cape Hatteras to the Gulf Coast Florida and the Caribbean **Marine Decapod Crustacea of Southern Australia** Gary CB Poore,2004-08-13 This book is a comprehensive guide to the identification of 800 species of decapod and stomatopod crustaceans from southern Australian marine waters It is liberally illustrated with more than 1000 line drawings giving good views of many species as well as diagnostic illustrations Details for each species include the authority year of description sometimes a common name diagnosis size geographical distribution and ecological and depth distribution The chapter on the Stomatopoda is by Shane Ahyong Sections within each chapter are hierarchical species within genera within families often with subfamilies as well Identification is achieved through the use of dichotomous keys adapted from many originally published in the primary literature or developed from scratch Some keys are to all Australian taxa but most are to southern Australian taxa only The information in this book derives from over 200 years of collecting in southern Australian environments from the intertidal to the deep sea and publications in numerous journals in several languages More than 800 of these papers and books are cited Winner of the 2005 Whitley Award for Systematics
