Barrow,2011-04-15 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in Nature s Ghosts the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson s day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them Nature s Ghosts offers an unprecedented view of what we ve lost and a stark reminder of the hard work of preservation still ahead *Ghost, Android, Animal* Tony M. Vinci,2019-11-19 Ghost Android Animal challenges the notion that trauma literature functions as a healing agent for victims of severe pain and loss by bringing trauma studies into the orbit of posthumanist thought Investigating how literary representations of ghosts androids and animals engage traumatic experience this book revisits canonical texts by William Faulkner and Toni Morrison and aligns them with experimental and popular texts by Shirley Jackson Philip K Dick and Clive Barker In establishing this textual field the book reveals how depictions of non human agents invite readers to cross subjective and cultural thresholds and interact with the impossible pain of others Ultimately this study asks us to consider new practices for reading trauma literature that enlarges our conceptions of the human and the real *The Children's Ghost Story in America* Sean

Ferrier-Watson,2017-04-25 Ghost stories have played a prominent role in childhood Circulated around playgrounds and whispered in slumber parties their history in American literature is little known and seldom discussed by scholars This book explores the fascinating origins and development of these tales focusing on the social and historical factors that shaped them and gave birth to the genre Ghost stories have existed for centuries but have been published specifically for children for only about 200 years Early on supernatural ghost stories were rare authors and publishers fearing they might adversely affect young minds presented stories in which the ghost was always revealed as a fraud These tales dominated children s publishing in the 19th century but the 20th century saw a change in perspective and the supernatural ghost story flourished

The Ghosts Of Evolution Connie Barlow, 2008-08-05 A new vision is sweeping through ecological science The dense web of dependencies that makes up an ecosystem has gained an added dimension the dimension of time Every field forest and park is full of living organisms adapted for relationships with creatures that are now extinct In a vivid narrative Connie Barlow shows how the idea of missing partners in nature evolved from isolated curious examples into an idea that is transforming how ecologists understand the entire flora and fauna of the Americas This fascinating book will enrich and deepen the experience of anyone who enjoys a stroll through the woods or even down an urban sidewalk But this knowledge has a dark side too Barlow's ghost stories teach us that the ripples of biodiversity loss around us now are just the leading edge of what may well become perilous cascades of extinction

Doing Animal Studies with Androids, Aliens, and Ghosts David P. Rando, 2023-04-06 Exploring what can be learnt when literary critics in the field of animal studies temporarily direct attention away from representations of nonhuman animals in literature and towards liminal figures like androids aliens and ghosts this book examines the boundaries of humanness Simultaneously it encourages the reader both to see nonhuman animals afresh and to reimagine the terms of our relationships with them Examining imaginative texts by writers such as Octavia Butler Philip K Dick Kazuo Ishiguro Jeanette Winterson and J M Coetzee this book looks at depictions of androids that redefine traditional humanist qualities such as hope and uniqueness It examines alien visions that unmask the racist and heteronormative roots of speciesism And it unpacks examples of ghosts and spirits who offer posthumous visions of having been human that decenter anthropocentrism In doing so it leaves open the potential

for better relationships and futures with nonhuman animals
