Solving Tough Problems Adam Kahane, 2008-12-03 Tough problems usually don t get solved peacefully They either don t get solved at all they get stuck or they get solved by force These frustrating and frightening outcomes occur all the time Families replay the same argument over and over or a parent lays down the law Organizations keep returning to a familiar crisis or a boss decrees a new strategy Communities split over a controversial issue or a politician dictates the answer Countries negotiate to

a stalemate or they go to war Either the people involved in a problem can't agree on what the solution is or the people with power authority money guns impose their solution on everyone else The way we talk and listen expresses our relationship with the world When we fall into the trap of telling and not listening we close ourselves off from being changed by the world and we limit ourselves to being able to change the world only by force But when we talk and listen with an open mind and an open heart and an open spirit we bring forth our better selves and a better world From the Introduction
