the phenomena that we call ghosts or spirits Only one of the people shown in four pictures on this back book cover is unlikely to be known to the curious reader The other three are well known historic personages It may not be so easy to work out who may be represented here when these images are looked at for the first time but they are all ghosts of a kind By using special photographic techniques developed by a psychic medium and combining these techniques with some theoretical ideas based in mainstream physics and evolutionary biology the authors are able to demonstrate for the first time exactly how the paranormal actually works It is a story of great importance to every person whether they believe in ghosts or not since what is being revealed by these images also show what happens after death and that both religion and science are in fact correct in their worldviews
