Giddens Reader:

The Giddens Reader Philip Cassell, 1993-08-10 The Giddens Reader contains a comprehensive selection of readings from the works of the pre eminent social theorist Anthony Giddens A wide range of important theoretical issues are covered including the author s encounter with the writings of Marx Durkheim Weber Parsons and Foucault The Reader also presents elaborations of Giddens own innovative approach to the fundamental questions of social theory His views on power time space and the relationship between action and structure are well represented as are his highly illuminating analyses of the late modern age The readings are prefaced by a straightforward introduction by the editor

The Giddens Reader

Anthony Giddens, 1993 The Giddens Reader contains a comprehensive selection of extracts from the works of the pre eminent social theorist Anthony Giddens A wide range of important theoretical issues are covered including Giddens encounter with the writings of Marx Durkheim Weber Parsons and Foucault The Reader also presents elaborations of Giddens own innovative approach to the fundamental questions of social theory His views on power time space and the relationship between action and structure are well represented as are his illuminating analyses of the late modern age The readings are set out in such a way as to demonstrate the connections between Giddens various writings the uninitiated are thus presented with a framework to enable them to go on to read the complete texts with a knowledge of their position in the greater scheme of his work and are of sufficient length to allow the reader to experience an extended and integrated line of argument and articulation of ideas The readings are prefaced by an informative and straightforward introduction by the editor

The Logos Reader Stephen Eric Bronner, Michael Thompson, 2006-01-01 Founded in 2002 Logos A Journal of Modern Society and Culture was established in response to the increasing erosion of a left political culture and the new possibilities for international political engagement and cooperation produced by the Internet Many of the best known intellectual representatives of what might be termed a rational radicalism soon served as the core group for this new online journal that has reached about four million readers The Logos Reader brings together the most influential and controversial work to appear in the journal In its pages writers of exceptional stature such as Stanley Aronowitz Ulrich Beck Drucilla Cornell Fred Dallmayr Jürgen Habermas Douglas Kellner and Eric Rouleau articulate liberal and socialist values even as they retain theoretical viewpoints influenced by critical theory The contributors deal with some of the most pressing political issues of our age including transnational developments U S foreign policy the Iraqi War the plight of the Palestinians and the domestic concerns currently dominating American politics With themes that speak to the most pertinent and enduring issues of a post 9 11 culture the essays in The Logos Reader represent the best of modern liberal thought and will influence contemporary political discourse

Going to the Countryside Yu Zhang, 2020-03-03 Since the beginning of the twentieth century modern Chinese intellectuals reformers revolutionaries leftist journalists and idealistic youth had often crossed the increasing gap between the city and the countryside which made the act of going to the countryside a distinctively modern experience and a continuous practice in China Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s What then was the special significance of going to the countryside before that era Going to the Countryside deals with the cultural representations and practices of this practice between 1915 and 1965 focusing on individual homecoming rural reconstruction revolutionary journeys to Yan an the revolutionary going down to the people as well as going to the frontiers and rural hometowns for socialist construction As part of the larger discourses of enlightenment revolution and socialist industrialization going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time initiated new means of human communication and interaction generated new forms of cultural production revealed a fundamental epistemic shift in modern China and ultimately created a new aesthetic social and political landscape As a critical response to the urban turn in the past few

decades this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of inquiry in the current state of China studies Chinese modernity has been characterized by a dual process that created problems from the vast gap between the city and the countryside but simultaneously initiated constant efforts to cope with the gap personally collectively and institutionally The process of crossing two distinct geographical spaces was often presented as continuous explorations of various ways of establishing the connectivity interaction and relationship of these two imagined geographical entities Going to the Countryside argues that this new body of cultural productions did not merely turn the rural into a constantly changing representational space most importantly the rural has been constructed as a distinct modern experiential and aesthetic realm characterized by revolutionary changes in human conceptions and sentiments

web neural network using spss statistics performing data analysis using ibm spss dec 15 2020 features easy to follow insight and clear guidelines to perform data analysis using ibm spss performing data analysis using ibm spss uniquely addresses the presented statistical procedures with an example problem detailed analysis and the

can i make same model of neural networks by spss ibm - Mar 04 2022

web problem because neural networks uses random numbers it makes a different model by each execution i want to make the same model of neural network whenever i execute spss i know clementine can make the same model if i used fixed random number i choose set active generator and fixed value on random number generators of

[ibm spss neural networks v27](#) - Jun 19 2023

web the following neural network features are included in spss statistics premium edition or the neural networks option introduction to neural networks neural networks are the preferred tool for many predictive data mining applications because of their power flexibility and ease of use

bringing uncertainty quantification to the extreme edge with - Jun 07 2022

web nov 20 2023 safety critical sensory applications like medical diagnosis demand accurate decisions from limited noisy data bayesian neural networks excel at such tasks offering predictive uncertainty

neural networks ibm - Nov 12 2022

web a neural network can approximate a wide range of predictive models with minimal demands on model structure and assumption the form of the relationships is determined during the learning process if a linear relationship between the target and predictors is appropriate the results of the neural network should closely approximate those of a

advanced data science techniques in spss udemy - Jul 08 2022

web in spss we can train two types of neural network the multilayer perceptron mlp and the radial basis function rbf network we are going to study both of them in detail two step cluster analysis an effective grouping procedure that allows us to identify homogeneous groups in our population

ibm spss neural networks - Feb 15 2023

web in financial analysis you can use spss neural networks to analyze applicants creditworthiness and to detect possible fraud in operational analysis use this new tool to manage cash flow and improve logistics planning

neural network using spss statistics book - Aug 21 2023

web ibm spss statistics 27 step by step apr 23 2022 ibm spss statistics 27 step by step a simple guide and reference seventeenth edition takes a straightforward step by step approach that makes spss software clear to beginners and experienced researchers alike

introduction to neural networks ibm - Sep 22 2023

web neural networks used in predictive applications such as the multilayer perceptron mlp and radial basis function rbf networks are supervised in the sense that the model predicted results can be compared against known values of the target variables

ibm spss neural networks 19 - May 18 2023

web ibm spss statistics is a comprehensive system for analyzing data the neural networks optional add on module provides the additional analytic techniques described in this manual the neural networks add on module must be used with the spss statistics core system and is completely integrated into that system about spss inc an ibm
