Cold War Legacies John Beck, 2016-08-16 From futures research pattern recognition algorithms nuclear waste disposal

The Superpowers Paul Dukes, 2002-01-04 The Superpowers traces the development of the USA and Russia later USSR from 1898 through to 2000 placing the Cold War from inception to ending into the wider social economic and political context This is the first history of the two major participants and their relationship throughout the twentieth century The Superpowers explores the intertwining history of the two powers chronologically and includes discussion of the inheritance of the two great powers and their imperial background World War One and the Russian Revolution Capitalism and Socialism World War Two and its impact the conflicts in Berlin Czechoslovakia Vietnam and Afghanistan Perestroika and the end of the USSR the significance of the events of 1991 and their legacy

On Endings Daniel Grausam, 2011 What does narrative look like when the possibility of an expansive future has been called into question This query is the driving force behind Daniel Grausam's *On Endings* which seeks to show how the core texts of American postmodernism are a response to the geopolitical dynamics of the Cold War and especially to the new potential for total nuclear conflict Postwar American fiction needs to be rethought he argues by highlighting postmodern experimentation as a mode of profound historical consciousness In Grausam's view previous studies of fiction mimetically concerned with nuclear conflict neither engage the problems that total war might pose to narration nor take seriously the paradox of a war that narrative can never actually describe Those few critical works that do take seriously such problems do not offer a broad account of American postmodernism And recent work on postmodernism has offered no comprehensive historical account of the part played by nuclear weapons in the emergence of new forms of temporal and historical experience *On Endings* significantly extends the project of historicizing postmodernism while returning the nuclear to a central place in the study of the Cold War

The Consequences of American Nuclear Disarmament Christine M. Leah, 2017-02-18 This book is about the

future of nuclear weapons geopolitics and strategy It examines the legacy of nuclear weapons on US thinking about some concepts of strategy and geopolitics namely deterrence extended deterrence alliances and arms control The purpose of this is to demonstrate just how fundamentally nuclear weapons have influenced American thinking about these concepts It argues that given the extent of nuclear weapons influence on these concepts and the implications for international security further reductions beyond current Strategic Arms Reduction Talks START levels and the more absolute idea of nuclear disarmament may not necessarily be prudent ideas Nuclear weapons have contributed to the avoidance of major war between states made alliances more credible and last longer and have made arms control relatively easier to conceptualize and manage As such the author argues these concepts may become even more difficult to manage in a world where nuclear weapons are marginalized

Forum for Applied Research and Public Policy ,1999 **Against Apocalypse** Fred Dallmayr,2015-12-24

The book denounces the irresponsible recklessness of some geopolitical agendas which are pushing the world relentlessly toward a major global war and possibly toward nuclear destruction or apocalypse The Bulletin of Atomic Scientists has recently placed the Doomsday Clock at three minutes to midnight Signs pointing toward a possible grand disaster are multiple everywhere one looks in our world today one finds ethnic and religious conflicts bloody mayhem incipient genocide proxy wars and hybrid wars renewal of the Cold War Add to these ills global economic crises massive streams of refugees and the threats posed by global warming and the picture of a world in complete disorder is complete Thus it is high time for humankind to wake up Starting from the portrayal of global anomie the book issues a call to people everywhere to oppose the rush to destruction and to return to political sanity and the quest for peace This is a call to global public responsibility In ethical terms it says that people everywhere have an obligation to prevent apocalypse and to maintain our world or hold the world together in all its dimensions including the dimensions of human and social life natural ecology and human spiritual aspirations or openness to the divine Differently out in lieu of the prevailing disorder and brokenness the book urges us to search for a new wholeness and just peace The book is intercultural and also inter disciplinary Since the aim is holistic to hold the world together the book necessarily has to draw on many disciplines including philosophy theology social science history and literature In terms of Western philosophical and intellectual legacies it draws mainly on the teachings of Nietzsche Heidegger and Derrida It also offers a completely new interpretation of the work of Thomas Hobbes unearthing in this work an ethical demand to exit from the state of perpetual warfare in the direction of a shared commonwealth The text also relies on the teachings of Christian theology both Catholic and Protestant invoking at crucial junctures the works of Karl Barth Raimon Panikkar and others In terms of non Western intellectual and spiritual legacies the book offers new interpretations of leading texts in the Indian and Chinese traditions Thus emphasis is placed on the ideas of world maintenance loka samgraha in Hinduism and of All Under Heaven in classical Chinese thought Although a central thrust of the text is for a new wholeness the goal is not a uniform synthesis where everything would be swallowed up in a bland unity

Rather the issue is how to preserve diversity of the world in its rightful integrity by linking all elements in a complex web of interconnections and relationality **Better Safe Than Sorry** Michael Krepon, 2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9 11 Our worst fears still could be realized at any time but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb Major powers have less use for the Bomb than at any time in the past Thus despite wars crises and Murphy's Law the dark shadows cast by nuclear weapons can continue to recede Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy deterrence containment and arms control As he sees it The United States has stumbled before but America has also made it through hard times and rebounded With wisdom persistence and luck another dark passage can be successfully navigated Conquest, Constitutionalism and Democratic Contestations Joel M. Modiri, 2020-05-21 Two decades since the enactment of South Africa's present constitution the durability and endurance of past inequalities and injustices illustrate that the new South Africa lauded as a miracle nation with the best constitution in the world can no longer be regarded as an unqualified success The legal and constitutional foundations of post 1994 South Africa are in a process of renegotiation that invites new and alternative perspectives and approaches This comprehensive volume explores this process of renegotiation by engaging political and intellectual contestations circulating in South African academic and public discourse relating to continuities and discontinuities between the colonial apartheid past and the post 1994 constitutional present The authors analyse the moral intellectual and political unravelling of post 1994 South African constitutionalism as legal text and political culture and enquire whether it has been able to respond adequately to the fundamental contradictions generated by colonisation and apartheid They also consider how centring the historical problem of European domination and conquest in Africa and South Africa in particular might provide an alternative frame or lens to theorise and understand contemporary South African realities This book marks out a complex field of contestation involving competing histories locations visions and perspectives that raises multifaceted questions regarding law history and politics It is the outcome of a South African Journal of Human Rights colloquium and was originally published as a special issue of the

journal *Superpower Illusions* Jack F. Matlock, 2010-01-05 This persuasive occasionally provocative book corrects a number of pervasive myths about the Cold War from the former U S ambassador to the USSR Publishers Weekly In *Superpower Illusions* Jack F Matlock refutes the enduring idea that the United States forced the collapse of the Soviet Union by applying military and economic pressure with wide ranging implications for U S foreign policy Matlock argues that Gorbachev not Reagan undermined Communist Party rule in the Soviet Union and that the Cold War ended in a negotiated settlement that benefited both sides He posits that the end of the Cold War diminished rather than enhanced American power with the removal of the Soviet threat allies were less willing to accept American protection and leadership that seemed increasingly to ignore their interests Matlock shows how during the Clinton and particularly the Bush Cheney administrations the belief that the United States had defeated the Soviet Union led to a conviction that it did not need allies international organizations or diplomacy but could dominate and change the world by using its military power unilaterally *Superpower Illusions* is a truly remarkable book both wise and provocative telling a sad yet instructive story of how the United States failed to exploit a triumph in the Cold War to build a new international order reflecting U S interests and principles Dimitri Simes President and CEO The Center for the National Interest A well written clearly reasoned and thoroughly informed tour of the past half century of American diplomacy including the roots of its successes and failures led by a superbly qualified participant A brilliant book Sidney Drell Stanford University
