## Crisis in the Health Field

*Men, Money, and Medicine.* Eli Ginzberg, with Miriam Ostow. Columbia University Press, New York, 1969. xii + 292 pp. \$8.50.

The \$60-billion health industry now encompassing some 3 million health workers is increasingly described as disorganized and in crisis. Stimulated by a complex technology and the need for extensive paramedical personnel, medical care prices—and particularly the costs of hospital care—have skyrocketed. Increasing government expenditures for medical care—\$9.6 billion in 1969 for the Medicare and Medicaid programs alone—have been significantly absorbed by inflation. With growing organization and militancy among hospital workers, many of whom are from minority groups that have been underpaid for decades, there is little prospect of a change in the cost trend. At the same time, the health industry is faced with growing consumer demands for more and better services, more equitable distribution geographically and in respect to the poor, and better preventive and personalized services generally.

This volume of essays by Eli Ginzberg, a longtime student of manpower problems, with the assistance of Miriam Ostow, critically evaluates the growing educated consensus among professionals concerning the "crisis" in the health field. The authors pose as realists, seeing future developments as occurring within the context of our political system, "which stresses freedom of choice of work, and the realities of our economic system, which places heavy reliance on competition in the market place." Their perspectives are thus limited, but sensitive to the historical and human factors that make radical change so difficult to effect. A pervasive theme throughout the essays is the need to use facilities and human resources more efficiently: eliminating duplication, controlling manpower attrition,

and developing rational hierarchies of health occupations that facilitate job mobility and make efficient use of women, who predominate numerically in the health occupations. Although loosely argued and poorly documented, these essays raise abundant issues and dilemmas, and if the authors' views are at various points carelessly developed they are nevertheless provocative and stimulating.

Access to medical care is increasingly viewed as an inalienable right, and the health sector has witnessed tremendous expansion in recent years. But people's health and welfare are dependent to a much greater extent on the quality of the life they live than on the availability of medical care. As the authors rightly note, medical care is largely supportive and ameliorative, and many of the largest risks to health and life are not subject to significant medical intervention. Medicine makes a difference primarily at the margins, and expenditures for better nutrition, housing, and environmental services may contribute more to health than would further "overdoctoring."

The authors develop certain "realities" that they feel other commentators fail to take into account. They argue that, although sentiments may have some impact, the distribution of services is responsive to the market place and the rich can always command preferred services. Government financing can shift the relative position of various groups, but it cannot equalize the claims of all citizens so that need rather than income will determine who gets what. In their view such controls can only come from direct supervision over health workers, and the authors see this as neither desirable nor politically feasible. In short, in their view equitable distribution of medical care in America is impossible without "profound structural alterations . . . in our free-market economy." At best we can mitigate inequalities by "judicious interferences,"

but the idea that we can solve these problems by more federal money is "social fantasy."

One might regard these essays as a penetrating, if not radical, critique of the inability of our system to provide medical services in response to need, but the authors' repeated testimonies to the historical commitment to "the doctrine of freedom of choice of work" leave them limited options for reform. The basic context of their recommendations is a need for planning and greater efficiency and particularly good hospital management, but they also endorse a variety of specific suggestions that have been advocated for many years. To deal with the maldistribution of health professionals, they suggest federal scholarships tied to a term of service following graduation. They advocate the upgrading of public health nurses to provide primary care in isolated areas. For the urban poor they argue that present facilities be strengthened and be made more efficient, inasmuch as the large hospital outpatient clinics may provide better medical care than do private physicians. Although critical on other matters, they accept without serious questioning the popular myth that the indigent often receive good health care. (As Duff and Hollingshead's study of a distinguished teaching hospital illustrates, technical proficiency is not synonymous with good health care.) They also suggest an urban nursing corps of home visitors and better health programs in the schools. For the middle classes they offer improved "major medical insurance with reasonable deductibles and co-insurance." Although they recognize the tremendous importance of quality controls, they come up with the usual ineffective remedies—"statistical reporting and evaluation through continuing education for doctors and greater efforts to associate every practicing physician with a general hospital"—advocated by those who are unwilling to entertain any intrusions on the doctor's autonomy.

But let us not quibble, for there is much common sense in many of the specific reforms proposed. The overall logic of the authors' approach, however, rests on a set of contradictions which they recognize but neglect. While they note that medical care is largely supportive and primarily effective at the margins, they observe increasing utilization of medical services among those with increased income and better

Ginzberg can readily be thought of as a triptych a career in three parts In his early years Ginzberg s work was dedicated to understanding the history of economics from Adam Smith to C Wesley Mitchell and placing that understanding in what might well be considered economic ethnography His studies took him on travels from Wales in the United Kingdom to California in the United States For example the poignant account of Welsh miners in an era of economic depression and technological change remains a landmark work His report of a cross country trip taken in the first year of the New Deal provides insight and evaluation that can scarcely be captured in present day writings The second period of his career corresponds to Ginzberg s increasing involvement in the practice of economics He deals with issues related to manpower allocation employment shifts and gender and racial changes in the workforce His writing reflects a growing concern for child welfare and education In this period his work increasingly focuses on federal state and city governments and how the public sector impacts all basic social issues His work was sufficiently transcendent of political ideology that seven presidents sought and received his advice and participation After receiving all due encomiums and congratulations for intellectual work and policy research well done Ginzberg then went on to spend the next thirty years of his life carving out a place as a preeminent economist of health welfare services and hospital administration It is this portion of his life that is the subject of Eli Ginzberg The Economist as a Public Intellectual What is apparent in Ginzberg s work of this period is his sense of the growing interaction of all the social sciences pure and applied to develop a sense of the whole The contributors to this festschrift join together to provide a portrait of a figure whose life and work have spanned the twentieth century and yet pointed the way to changes in the twenty first century Eli Ginzberg from the start possessed a strong sense of social justice and economic equality grounded in a Judaic Christian tradition All of these aspects come together in the writings of a person who transcends all parochialism and gives substantive content to the often cloudy phrase public intellectual Irving Louis Horowitz is Hanna Arendt Distinguished Professor Emeritus at Rutgers the State University of New Jersey where he has taught for over thirty years He also serves as Chairman of the Board at Transaction Publishers His writings include *Radicalism and the Revolt Against Reason* *Behemoth Main Currents in the History and Theory of Political Sociology* and *Taking Lives Genocide and State Power* Core Collection Baker Library,1975 **The Book Buyer's Guide** ,1970 **The Critical Issues of Community Mental Health** Harry Gottesfeld,1972 **The Publishers' Trade List Annual** ,1985 Books and Pamphlets, Including Serials and Contributions to Periodicals Library of Congress.
