## **Gir National Park And Sanctuary Bibliography:**

**Gir National Park & Sanctuary** Mahesh Singh, 2002      *Indian Ethnobotany: Bibliography of 21st Century (2001-2015)*  
Anita Jain, S.K. Jain, 2016-06-01 Ethnobotany deals with traditional and indigenous associations of people with plants. The subject has been attracting more and more scholars in India and many other countries. Its importance in search for new molecules from ethnomedicinal herbs and useful genes from wild relatives and land races of crops still in use among many native folk for genetic engineering has enhanced the importance of the discipline. The number of books and research papers published each year has been rapidly increasing. Research workers need to know about the work done on their topic of study. Bibliographies reviews greatly help in this and save their valuable time. About 2500 publications are listed in the present book. To facilitate the search of reference on particular region, ethnic groups or use categories, indexes are given for providing clues to such search. Research guides can easily spot gaps in ethnobotanical studies in any ethnic society as also regions of the country. Biographers will find from one source the work done in single or joint authorship by the scientist on whom they are writing. To facilitate this, an index by surname of joint authors is also provided. The book will be an essential reference work for research workers.      *Bibliographic Index*, 2004      **Gir Forest and the Saga of the Asiatic Lion** Sudipta Mitra, 2005      *Bibliography, Wildlife and Protected Area Management in Madhya Pradesh*, 1999      The Story of Asia's Lions Divyabhanushinh, 2005. The Story of Asia's Lions introduces the lion and its present habitat. It examines through written and visual records the interaction between this majestic animal and human beings in Asia from the earliest available historical records to the present day. The censuses conducted in the last hundred years to monitor its population dynamics and the history of the attempts to find a second home for the lion which still continue are documented here. The book finally examines the efforts made for the conservation of the species in the 20th century and records its present status with indications of what the future holds for the lion in India. From the publisher      **Monster of God: The Man-Eating Predator in the Jungles of History and the Mind** David Quammen, 2004-09-17. Rich detail and vivid anecdotes of adventure. A treasure trove of exotic fact and hard thinking. New York Times Book Review. For millennia lions, tigers and their man-eating kin have kept our dark scary forests dark and scary and their predatory majesty has been the stuff of folklore. But by the year 2150 big predators may only exist on the other side of glass barriers and chain link fences. Their gradual disappearance is changing the very nature of our existence. We no longer occupy an intermediate position on the food chain; instead we survey it invulnerably from above so far above that we are in danger of forgetting that we even belong to an ecosystem. Casting his expert eye over the rapidly diminishing areas of wilderness where predators still reign, the award-winning author of *The Song of the Dodo* and *The Tangled Tree* examines the fate of lions in India's Gir forest, of saltwater crocodiles in northern Australia, of brown bears in the mountains of Romania and of Siberian tigers in the Russian Far East. In the poignant and troublesome ferocity of these embattled creatures we recognize something primeval deep within us.
