Giraldus Odonis Ofm Opera Philosophica V2 De Intentionibus:

Giraldus Odonis O.F.M.: Opera Philosophica Rijk,2005-07-01 This volume contains the first critical edition of Giraldus Odonis d 1349 De intentionibus in which the author deals with the multifarious problems around conceptualization with which philosophers and theologians from around 1300 were faced when attempting to bridge the gap between thought and reality Giraldus appears to have been an unyielding defender of the realistic position holding that our variously articulated concepts intentiones are representative of as many distinctions in Reality The main target of his severe criticism upon contemporaneous views of the matter is Hervé de Nelles who was the first to write a monograph De intentionibus which betrays his adherence to a moderate realism The editor's extensive study of the intentionality debate of those years focusses on the development of the cognition theory in the period between Thomas Aquinas and Peter Auriol d 1322 *Giraldus Odonis O.F.M.: Opera Philosophica* L.M. de Rijk,2021-10-25 This volume contains the first critical edition of the Logica written by Giraldus Odonis a 14th century anti occamist Franciscan master who was minister general of the Order 1329-42 and died of the plague in 1349 as patriarch of Antioch He is mainly known as the author of an influential commentary on Aristotle's Ethics Venice 1500 Despite the fact that the well known medievalist Dr Anneliese Maier regarded him as one of the most original and most courageous philosophers of the 14th century most of his other works are still unedited The three parts of Giraldus's Logica demonstrate his original approach to common logical and metaphysical doctrines The third tract on demonstrative argument is of singular importance Throughout his Logica Giraldus's view on the relationship between logico semantics and metaphysics come to the fore **Giraldus Odonis O. F. M.** Odonis Geraldus,1997 This volume contains the first critical edition of Giraldus Odonis d 1349 De intentionibus Giraldus discusses the problems of conceptualization that the philosophers and theologians around 1300 were faced with in their attempts to show that the various concepts intentiones we use to describe the outside world reliably represent Reality The text edition is prefaced by an extensive study of the intentionality debate around 1300 This debate is described in terms of what is nowadays called cognitive psychology and epistemology **Gerald Odonis, Doctor Moralis and Franciscan Minister General** William Duba,Christopher David Schabel,2009 Famous for his role as Minister General of the Franciscan Order after the flight of Michael of Cesena and company Geraldus Odonis ca 1285-1348 has in recent years attracted attention for his scholarly work At an increasing pace studies of specific areas of Odonis's thought reveal another side to the man often portrayed as Pope John XXII's creature a philosopher and theologian who held unique often controversial positions and defended them with zeal and integrity whose impact extended beyond the religious and chronological confines of medieval Christendom Building on the recent scholarship of Bonnie Kent Christian Trottman and especially L.M. de Rijk this volume gathers together studies by other specialists on Odonis covering his ideas in economics logic metaphysics ethics natural philosophy theology and politics in works written over the entire span of his career Contributors are Paul J.J.M. Bakker Sander W. de Boer Stephen F. Brown Giovanni Ceccarelli

William Duba Roberto Lambertini Sylvain Piron Camarin Porter Chris Schabel and Joke Spruyt *Medieval Philosophy as Transcendental Thought* Jan Aertsen, 2012-03-02 The origin of transcendental thought is to be sought in medieval philosophy This book provides for the first time a complete history of the doctrine of the transcendentals and shows its importance for the understanding of philosophy in the Middle Ages

Metaphysics Through Semantics: The Philosophical Recovery of the Medieval Mind Joshua P. Hochschild, Turner C. Nevitt, Adam Wood, Gábor Borbély, 2023-04-27 More than any other living scholar of medieval philosophy Gyula Klima has influenced the way we read and understand philosophical texts by showing how the questions they ask can be placed in a modern context without loss or distortion The key to his approach is a respect for medieval authors coupled with a commitment to regarding their texts as a genuine source of insight on questions in metaphysics theology psychology logic and the philosophy of language as opposed to assimilating what they say to modern doctrines or using medieval discussions as a foil for new and improved conceptual schemes Jack Zupko University of Alberta

Gyula Klima is widely recognized as one of the world's leading experts on thirteenth and fourteenth century Latin philosophy with his own distinctive analytic approach which brings out both the similarities and differences between medieval and contemporary logic and semantics John Marenbon Trinity College University of Cambridge Gyula Klima has been a towering figure in the field of medieval philosophy for decades His influence comprises not only the scholarly results of his work but also intense and generous mentorship of students and junior colleagues This volume is a perfect reflection of the esteem that he enjoys around the world collecting excellent pieces by established as well as up and coming scholars of medieval philosophy Catarina Dutilh Novaes Vrije Universiteit Amsterdam For four decades now Gyula Klima has been setting the standard among medievalists for philosophical sophistication and historical rigor This collection of wide ranging studies from leading scholars in the field offers a worthy tribute to that legacy Robert Pasnau University of Colorado Boulder Gyula Klima is Professor of Philosophy at Fordham University and Senior Research Fellow Consultant and the Director of Institute for the History of Ideas of the Hungarian Research Institute in Budapest In 2022 the President of Hungary awarded him the Knight's Cross of the Hungarian Order of Merit in recognition of his outstanding academic career significant research work and exemplary leadership In this volume colleagues collaborators and students celebrate Klima's project with new essays on Plotinus Anselm Aquinas Buridan Ockham and others exploring specific questions in philosophy of mind philosophy of language metaphysics and logic No contemporary surpasses Kripke and Klima in semantics and metaphysics but only Gyula Klima's thought ranges flawlessly over classical philosophy as well The volume is a fitting tribute to the master David Twetten Marquette University

A Companion to the Responses to Ockham, 2016-02-02 This volume collects twelve chapters that present the multifaceted responses to the works of the William of Ockham in Oxford Paris Italy and at the papal court in Avignon in the 14th century and it assembles contributions on philosophers and theologians who all have criticized Ockham's works at different points In individual case studies it gives an exemplary overview over the reactions the Venerable

Inceptor has provoked and also serves to better understand Ockham's thought in its historical context. The topics range from ontology psychology theory of cognition epistemology and natural science to ethics and political philosophy. This volume demonstrates that the reactions to Ockham's philosophy and theology were manifold but one particular kind of reception is missing: unanimous approval. Contributors include Fabrizio Amerini, Stephen F. Brown, Nathaniel Bulthuis, Stefano Caroti, Laurent Cesalli, Alessandro D. Conti, Thomas Dewender, Isabel Iribarren, Isabelle Mandrella, Aurélien Robert, Christian Rode, and Sonja Schierbaum. *Atomism in Late Medieval Philosophy and Theology* Christophe Grellard, Aurélien Robert, 2009. Drawing a new portrait of late medieval conflicts between atomists and anti-atomists, this book offers a new outlook on the fourteenth century's development of sciences. *Giraldus Odonis O.F.M.: Opera Philosophica* de Rijk, 1997. This volume contains the first critical edition of Giraldus Odonis d. 1349 *De intentionibus* in which the author deals with the multifarious problems around conceptualization with which philosophers and theologians from around 1300 were faced when attempting to bridge the gap between thought and reality. Giraldus appears to have been an unyielding defender of the realistic position holding that our variously articulated concepts/intentions are representative of as many distinctions in Reality. The main target of his severe criticism upon contemporaneous views of the matter is Hervé de Nelles who was the first to write a monograph *De intentionibus* which betrays his adherence to a moderate realism. The editor's extensive study of the intentionality debate of those years focusses on the development of the cognition theory in the period between Thomas Aquinas and Peter Auriol d. 1322. **2005** Massimo Mastrogregori, 2009-12-22. Annually published since 1930, the International Bibliography of Historical Sciences (IBOHS) is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times. The IBOHS is thus currently the only continuous bibliography of its kind covering such a broad period of time, spectrum of subjects, and geographical range. The works are arranged systematically according to period, region, or historical discipline and alphabetically according to authors' names or, in the case of anonymous works, by the characteristic main title word. The bibliography contains a geographical index and indexes of persons and authors. *Philosophical Debates at Paris in the Early Fourteenth Century* Stephen F. Brown, Thomas Dewender, Theo Kobusch, 2009-05-20. This collection of essays/papers originally delivered at conferences in Bonn and Boston show in a detailed way the tone and nature of philosophical and theological issues and arguments at the University of Paris in the early fourteenth century. They touch on a large number of authors and a broad spectrum of subjects and present these discussions with regard to the intellectual framework set by the earlier Parisian generation of Thomas Aquinas, Henry of Ghent, and Godfrey of Fontaine. It becomes evident that the principal contributors to the new intellectual energy in early fourteenth-century discussions at Paris are Meister Eckhart, John Duns Scotus, Hervaeus Natalis, Durandus of St. Pourçain, Walter Burley, and Petrus Aureoli. *Natural Final Causality and Scholastic Thought* Corey Barnes, 2024-08-13. This book examines scholastic conceptions of final causality through the

methods and concerns of historical theology It argues the history of final causality is most profitably understood according to the interplay of regularity order and intentionality as interpretive categories Within this analytic framework the author explores the history and theological implications of final causality from Aristotle to Nicole Oresme utilizing shifts in the dominant interpretive category to clarify how final causality could change from one of four co equal explanatory strategies in Aristotle to the cause of causes in Avicenna to a merely metaphorical cause in Walter Chatton Theological debates ranging from questions of creation the relationship of primary and secondary causality and of the ultimate good to secondary goods the autonomy or instrumentality of nature and the compatibility of chance with providence motivated many of these changes The chapters examine final causality in Aristotle and the commentorial tradition from late antiquity to medieval Arabic sources and then consider in detail various scholastic understandings and uses of final causality The book will be of particular interest to scholars of historical theology systematic theology scholastic thought and medieval philosophy

Rethinking the History of Skepticism Henrik Lagerlund,2010 This book aims at beginning the rewriting of the history of skepticism by highlighting the medieval sources of the modern skeptical discussions It shows through seven newly written essays how epistemological and external world skepticism was developed and discussed particularly in the fourteenth century up to sixteenth century Paris Medieval Greek Commentaries on the Nicomachean Ethics Charles Barber,David Jenkins,2009-02-23 Given the enduring importance of Aristotle s Nicomachean Ethics it is remarkable to find that there is no extensive surviving commentary on this text from the period between the second century and the twelfth century This volume is focused on the first of the medieval commentaries that produced in the early twelfth century by Eustratios of Nicaea Michael of Ephesus and an anonymous author in Constantinople This endeavor was to have a significant impact on the reception of the Nicomachean Ethics in Latin and Catholic Europe For in the mid thirteenth century Robert Grosseteste translated into Latin a manuscript that contained these Byzantine commentators Both Albertus Magnus and Bonaventure then used this translation as a basis for their discussions of Aristotle s book Contributors are George Arabatzis Charles Barber Linos Benakis Elizabeth Fisher Peter Frankopan Katerina Ierodiakonou David Jenkins Anthony Kaldellis and Michele Trizio *etiam realis scientia* Caroline Gaus,2008-11-30 Research on the medieval doctrine of the transcendentals is still characterized by one debate its characteristic peculiarity vs its structural correspondence to the modern concept of transcendentality The present study on Peter Aureol s 1322 doctrine of transcendentals offers a contribution to that discussion by delimiting from both directions by developing Aureol s position in contrast to the contemporary position of a scotist orientated formalistic realism it sheds light on the innovative traits in his doctrine On the other hand Aureol s logico semantical revision of metaphysics is presented as an intentional affirmation of tradition so that a revised view can be taken of Aureol s role within the development of a modern metaphysics of the object as such Absolute Beginners Wouter Goris,2007-11-30 Absolute Beginners adopts a variety of approaches to study the Absolute as the ultimate source of

knowledge in medieval philosophy From a historical perspective it examines a forerunner of Spinoza's departure from the Absolute in the Ethics the doctrine of God as a first object in the generation of knowledge as formulated by Henry of Ghent 1293 and Richard Conington 1330 Methodologically it offers a case study in the construction of an historical object calling into question the self evident and spontaneous way in which elements in the history of philosophy its concepts and theories are presented as primary givens In a systematic sense this study includes a reflection on structural indeterminacy as pervading and stabilizing the differential system of exclusions which makes up the doctrine of God as a first object in the generation of knowledge *Das 'Super'-Transzendente und die Spaltung der Metaphysik* Sabine Folger-Fonfara, 2007-12-31 The history of modern metaphysics is essentially marked by its splitting up into a metaphysica generalis and a metaphysica specialis a well known distinction especially within Christian Wolff's systematic conception of metaphysics This study investigates the actual origins of this significant development which can be already found at the beginning of the 14th century On the basis of a fundamentally revised doctrine of transcendentals the Franciscan theologian Francis of Marchia 1290 1344 introduces for the first time a dissociation of the primum cognitum of the human intellect from the subject of metaphysics according to which metaphysics is no longer one science in the sense of a scientia transcendens as most of his predecessors claimed in the 13th century but rather twofold ontology and theology Homo animal nobilissimum Theodor W. Köhler, 2007-10-31 This monograph deals with the philosophical approach of thirteenth century masters to concrete practical manifestations of quantum ad naturalia in human lives in their commentaries on Aristotle's works on natural philosophy both his genuine works and those then considered genuine It inquires into what they deemed worthy of philosophical debate regarding this topic and how they tackled it The first of the two volumes describes the cultural surroundings the scholars way of approaching the topic and their discourses on the peculiarity singularity unity consistency of humankind and on its internal differentiation according to gender stage of life social stratification and differences due to ethnic status or geographic climatic diversity This is the first comprehensive source based study of the subject it draws heavily on unedited texts *The Art and Logic of Ramon Llull* Anthony Bonner, 2007 This book attempts to explain the functioning of the combinatorial semi mechanical demonstrative techniques of Ramon Llull's Art how it began as an apologetic instrument how it developed through two main stages and how it ended trying to reformulate key aspects of medieval Aristotelian logic Intentionality, Cognition, and Mental Representation in Medieval Philosophy Gyula Klima, 2015-02-02 It is commonly supposed that certain elements of medieval philosophy are uncharacteristically preserved in modern philosophical thought through the idea that mental phenomena are distinguished from physical phenomena by their intentionality their intrinsic directedness toward some object The many exceptions to this presumption however threaten its viability This volume explores the intricacies and varieties of the conceptual relationships medieval thinkers developed among intentionality cognition and mental representation Ranging from Aquinas Scotus Ockham and Buridan

through less familiar writers the collection sheds new light on the various strands that run between medieval and modern thought and bring us to a number of fundamental questions in the philosophy of mind as it is conceived today
