attempted to understand the problems of American cities Using new and forgotten sources Duneier introduces Horace Cayton and St Clair Drake graduate students whose conception of the South Side of Chicago established a new paradigm for thinking about Northern racism and poverty in the 1940s He also discusses the psychological links between slum conditions and black powerlessness the controversy over Daniel Patrick Moynihan s report on the black family and how the debate about urban America changed as middle class African Americans started escaping the ghettos In this sweeping and incisive study Duneier offers a clear eyed assessment of the thinkers and doers who have shaped American ideas about urban poverty and the ghetto The result is a valuable new estimation of an age old concept A New York Times Notable Book Winner of the Z calo Public Square Book Prize

Music, Imagination, and Culture Nicholas Cook,1990 It is a common experience that words are inadequate for music there seems always to be a disparity between how music is experienced and how it is described or rationalized This book is a study of musical imagination Musicians imagine music by means of functional models which determine certain aspects of the music while leaving others open This means that there is inevitably a gap between the image and the experience that it models and this gap can be a source of compositional creativity Different musical cultures embody different ways of imagining sound as music and thus every culture creates its own

distinctive pattern of discrepancies between image and experience discrepancies which are reflected in theoretical thinking about music Drawing on psychological and philosophical materials as well as the analysis of specific musical examples Nicholas Cook makes a clear distinction between the province of music theory and that of aesthetic criticism In doing so he affirms the importance of the ordinary listener in musical culture and the validity of his or her experience of music
