The Ghetto Underclass American Academy of Political and Social Science, 1989

Dark Ghetto Kenneth B. Clark, 1989-11 Dr Clark social psychologist college professor a Black man who lived in Harlem for forty years and who has recently been associated with its problems from the top level of Haryou takes the role of involved observer to approach the combined problems of the confined African American and the slum The ghetto he analyzes here is the three and one half square miles containing 232 792 people that make up Harlem excluding Spanish Harlem He examines its social dynamics unemployment and menial jobs result in family instability psychology the Black man has a difficult time asserting his manhood in face of white supremacy pathology chronic self perpetuating as the influence of gangs has declined that of drug addiction has increased schools separate but unequal the cultural deprivation approach is seductive if students were expected to learn and so taught they would progress the power structure the effective exercise of power is severely crippled by the inexperience of its own political leaders The strategy for change must be based on the understanding that the Black America s problems are essentially American and on the empathy of outsiders Dr Clark tempers his aims with the re assurance that in contemporary society no one Black or white can be totally free of prejudice yet each race needs the other Most interesting here the insight into the psycho social dilemmas of African Americans the Black response to the wide spectrum of leadership embodied in Adam Clayton Powell and Dr Martin Luther King Jr Review in Kirkus 1965 lightly edited

The Shape of Social Inequality David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller s many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller s programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification

The Farrakhan Phenomenon Robert S. Singh, 1997-07-01 In this penetrating critical analysis

of Louis Farrakhan's ascent to national influence Robert Singh argues that the minister's rise to prominence is a function of race and reaction in contemporary America Singh probes the origins and significance of Farrakhan in American politics Drawing on published and unpublished records personal interviews and Farrakhan's writings and speeches Singh places Farrakhan expressly within the paranoid style of such reactionaries as Jesse Helms and Joseph McCarthy Examining Farrakhan's biographical details religious beliefs political strategies and relative influence Singh argues that Farrakhan is an extreme conservative who exploits both black white divisions and conflicts within the black community for personal advancement Singh proposes that Farrakhan's complex appeal to African Americans is based on his ability to orchestrate the diffuse forces of African American protest against the status quo Paradoxically says Singh Farrakhan has achieved his position in part by positioning himself against most African American political leaders a tactic made possible by the extent to which black American politics now displays the same basic features as American politics in general By stoking the fires of fear and hatred yet effecting no real changes Farrakhan poses a greater threat to black Americans than to whites The Farrakhan Phenomenon is written in a clear accessible style that will appeal to general readers concerned about race relations as well as to scholars of American history and politics It reveals a shrewd opportunist who has capitalized on America's continuing failure to deal with its serious and abiding race problems

The Mediterranean in the Age of Globalization Natalia Ribas-Mateos, 2017-12-02 The Mediterranean in the Age of Globalization is a welcome corrective to the tendency to present globalization as a homogenous concept and the failure to describe how it operates in specific regions Ribas Mateos examines globalization and migration across the Mediterranean using an innovative integrated framework so as to map social places by describing how social political cultural and economic forces are embedded within a globalizing environment The author articulates an original and compelling narrative mapping the Mediterranean as a global place where international and regional forces are intertwined in multiple threads In doing so she identifies two key components of globalization affecting specifically forms of welfare and issues of mobility in the context of a weakening European welfare state and the relocation and reinforcement of Mediterranean borders Nine Mediterranean cities are investigated as gateway cities which shape two major effects of globalization welfare and mobility The book challenges conventional North South perspectives and focuses and systematizes the way international migration should be conceptualized The originality of the book results from the author's fieldwork which is rich in descriptive detail and from a theory centered around global perspectives Seven case studies in Southern Europe Algeciras Athens Barcelona Lisbon Naples Turin and Thrace deal with issues related to migration and the welfare state She also includes two ethnographies that represent two Mediterranean gateways in the North South Mediterranean division Tangiers in Morocco and Durrës in Albania which are mapped as border cities in the global Mediterranean context Because of its intrinsically multidisciplinary nature this superb volume will be of particular interest to academics and social science researchers as well as policymakers and international agencies

Neighborhood Jobs, Race, and Skills Daniel Immergluck, 2018-05-20 Originally published in 1998 *Neighbourhood Jobs Race and Skills* argues that race is a powerful and persistent barrier to employment Analysing existing literature this book outlines how racial discrimination in hiring against African Americans appears to remain a contributor to high unemployment rates in black neighbourhoods The book also discusses how issues such as poor schools and physical and social isolation compound employment problems as well as changes in policy on skill requirements and the location of jobs The book argues that combined this is a major contributor to concentrated urban employment and poverty **European**

characteristic of the city Rural Poverty explores the nature of poverty in rural spaces in Britain and America Setting out key features it highlights the important processes that hide key components of rural poverty The book seeks to challenge dominant assumptions about the spatialities of poverty and the nature of rural spaces in Britain and America Drawing on a broad range of new research material the book challenges dominant assumptions It provides a comprehensive and critical review of the nature of poverty in rural spaces giving particular attention to the scale profile and causes of poverty in rural areas the spatial unevenness and local geographies of rural poverty the experiences of different forms of poverty in rural spaces the shifting governance of rural welfare at central and local spatial scales Demonstrating that poverty represents a significant but neglected feature of rural life in Britain and America this insightful book highlights the processes through which rural poverty remains hidden from the dominant gazes of poverty researchers and policy makers the statistical significance and spatial unevenness of poverty in rural areas the ways in which poverty is experienced in local rural spaces

Lea,2002-07-25 Lea has produced a serious and scholarly contribution of great interest to criminologists whether critical or not to post graduates as well as the more advanced undergraduate This is a book that is well written absorbing thoughtful and thought provoking The British Journal of Criminology Crime control is in crisis Not only have levels of crime risen but more important crime is increasingly regarded as a normal aspect of the social and economic system rather than disruption or deviance The blurring boundaries between the criminal and the normal are evident in a number of areas from the activities of multinational corporations to the life of the inner city In this book John Lea develops a broad historical and sociological overview relating the rise and fall of effective crime control to different types of social structures It traces the process of modernisation and industrialisation from the eighteenth to the mid twentieth centuries which established the social preconditions for effective control and management of criminality In the early years of the present century it is clear that these preconditions are now being progressively undermined as industrial society undergoes profound changes in its direction of development The result is traced through a variety of types of criminality and the progressive debilitation of existing institutions and processes of crime control A major feature of this book is its wide scope and imaginative application of historical and theoretical perspectives on modernisation and capitalist social development to the contemporary problems of controlling a wide variety of crime It represents a significant contribution to the ability of criminology and the sociology of crime to confront the dilemmas and controversies of the twenty first century Dependency Culture Hartley Dean,Peter

Taylor-Gooby,2014-05-22 First published in 1992 In this volume the authors discuss that although the idea that the main object of social security is to regulate the lives of poor people rather than to relieve their poverty which fell into disfavour in the post war heyday of the welfare state that this idea has more recently returned as mass unemployment increases the pressure on welfare budgets and the weakness of the British economy calls into question our ability to maintain social spending The Oxford Handbook of Urban Planning Randall Crane,Rachel Weber,2015 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making

Reading the Homeless Eungjun Min,1999-06-30 As one of our country s major social problems homelessness is often in the news The media tend to portray the homeless as drunk stoned crazy or sick individuals a portrayal that is only partly accurate and represents an obstacle to our understanding of the wider social implications of this complex issue This edited collection examines the various ways both verbal and visual in which the homeless have been portrayed by the media from the 1980s to the present day The contributors apply different frameworks ranging from phenomenology to culture studies to analyze the characteristics implications and consequences of the stories and images disseminated by the media *Islands in*

the Street Martin Sanchez-Jankowski, 1991-04-08 The overall goal of the research in this book was to understand gang phenomenon in the United States In order to accomplish this goal the author investigated gangs in different cities in order to understand what was similar in the way all gangs behaved and what was idiosyncratic to certain gangs The research for this book took place over ten years and five months from 1978 to 1989 and will give the reader a comprehensive overview of gang behavior in the United States in that time period Historical and Geographical Influences on Psychopathology Patricia Cohen, Cheryl Slomkowski, Lee N. Robins, 1998-12 This book discusses the impact of time and geography on the study of psychopathology simultaneously drawing from several disciplines including sociology anthropology economics psychology social policy psychiatry and epidemiology **America's Newcomers and the Dynamics of Diversity** Frank D. Bean, Gillian Stevens, 2003-05-01 The attacks of September 11 2001 facilitated by easy entry and lax immigration controls cast into bold relief the importance and contradictions of U S immigration policy Will we have to restrict immigration for fear of future terrorist attacks On a broader scale can the country's sense of national identity be maintained in the face of the cultural diversity that today's immigrants bring How will the resulting demographic social and economic changes affect U S residents As the debate about immigration policy heats up it has become more critical than ever to examine immigration's role in our society With a comprehensive social scientific assessment of immigration over the past thirty years America's Newcomers and the Dynamics of Diversity provides the clearest picture to date of how immigration has actually affected the United States while refuting common misconceptions and predicting how it might affect us in the future Frank Bean and Gillian Stevens show how on the whole immigration has been beneficial for the United States Although about one million immigrants arrive each year the job market has expanded sufficiently to absorb them without driving down wages significantly or preventing the native born population from finding jobs Immigration has not led to welfare dependency among immigrants nor does evidence indicate that welfare is a magnet for immigrants With the exception of unauthorized Mexican and Central American immigrants studies show that most other immigrant groups have attained sufficient earnings and job mobility to move into the economic mainstream Many Asian and Latino immigrants have established ethnic networks while maintaining their native cultural practices in the pursuit of that goal While this phenomenon has led many people to believe that today's immigrants are slow to enter mainstream society Bean and Stevens show that intermarriage and English language proficiency among these groups are just as high if not higher as among prior waves of European immigrants America's Newcomers and the Dynamics of Diversity concludes by showing that the increased racial and ethnic diversity caused by immigration may be helping to blur the racial divide in the United States transforming the country from a biracial to multi ethnic and multi racial society Replacing myth with fact America's Newcomers and the Dynamics of Diversity contains a wealth of information and belongs on the bookshelves of policymakers pundits scholars students and anyone who is concerned about the changing face of the United States A Volume in the American Sociological Association's Rose Series in

Sociology **Rhetorical and Critical Approaches to Public Relations II** Dr Robert L Heath, Elizabeth L Toth, 2013-11-05

This volume is the first to illustrate the application of rhetorical theory and critical perspectives to explain public relations practices. It provides a systematic and coherent statement of the critical guidelines and philosophical underpinnings of public relations and as such should guide pedagogy and practice. It also supplies pedagogic and critical standards with which to meet the needs of an increasingly sophisticated society that tends to reject all of public relations as propaganda. With the enormous amount of money spent on product publicity and public policy debates, this book gives practitioners a sense of whether their public relations campaigns make a contribution to the organizational bottom line by means of achieving the timeless standards of the art of rhetoric. Immigration, 'Race' and Ethnicity in Contemporary France Alec

Hargreaves, 1995-09-28. First published in 1995. Immigration is one of the most significant and pressing issues in contemporary France. It has stirred up controversies over concepts such as the ghetto and the underclass; it has erupted in flashpoints such as the Islamic headscarf affair, the Gulf War, and the reform of French nationality laws, and it has become central to political debate with the rise of Jean Marie Le Pen's extreme right wing Front National. This is the first comprehensive survey to be published in English covering developments in this field during the last twenty years. Spanning politics and economics, social structures and cultural practices, this authoritative study will be of keen interest to undergraduates and researchers in French studies, migration studies, and ethnic relations, and a wide range of social science disciplines.
