**The Ghost with Trembling Wings** Scott Weidensaul,2003      **The Ghost with Trembling Wings** Scott

Weidensaul,2003-06-11 The naturalist author of *Living on the Wind Across the Hemisphere with Migratory Birds* shares stories of the rediscovery of species previously believed extinct discussing such topics as the Indian forest owl the thylacine of Tasmania cloning laboratories and the mysterious black panthers of England      *Birdscapes* ,2003      *Encountering Earth*

Trevor George Hunsberger Bechtel,Matt Eaton,Tim Harvie,2018-05-14 One day Matthew Eaton was walking through an impromptu animal shelter display at his local pet store when suddenly an eight month old kitten dug his claws into Eaton s flesh Eaton recognized that the eyes of this cat and the curve of his claw compelled a response analogous to those found in the writings of Buber Levinas and Derrida And not just Eaton but a whole community of theologians have found themselves in an encounter with particular places and animals that demands rich theological reflection Eaton enlisted fellow editors Harvie and Bechtel to collect the essays in this volume in which theologians listen to horses rats snakes cats dogs and the earth itself who become new theological voices demanding a response In this volume the voice of the more than human world is heard as making theology possible These essays suggest that what we say theologically represents not simply ideas of our own making subsequently superimposed onto the natural world through our own discovery but rather flow from an expressive Earth      **Resurrection Science** M. Science Monitor Top Ten Book of September In a world dominated by people and rapid climate change species large and small are increasingly vulnerable to extinction In *Resurrection Science* journalist M R O Connor explores the extreme measures scientists are taking to try and save them from captive breeding and genetic management to de extinction Paradoxically the more we intervene to save species the less wild they often become In stories of sixteenth century galleon excavations panther tracking in Florida swamps ancient African rainforests Neanderthal tool making and cryogenic DNA banks O Connor investigates the philosophical questions of an age in which we play god with earth s biodiversity Each chapter in this beautifully written book focuses on a unique species from the charismatic northern white rhinoceros to the infamous passenger pigeon and the people entwined in the animals fates Incorporating natural history and evolutionary biology with conversations with eminent ethicists O Connor s narrative goes to the heart of the human enterprise What should we preserve of wilderness as we hurtle toward a future in which technology is present in nearly every aspect of our lives How can we co exist with species when our existence and their survival appear to be pitted against one another

**Stalking the Ghost Bird** Michael K. Steinberg,2008-03-01 When a kayaker thought he spotted an ivory billed woodpecker in 2004 the birding community took notice Two birders traveled to the bayou where the sighting occurred well aware that the last confirmed sighting of an ivory bill had taken place over sixty years ago Both men caught a glimpse of the bird and a team began to search the surrounding swamplands Even after long hours of surveillance and multiple sightings

the scientists cautiously refused to disclose their rediscovery of the extinct bird until they captured it on film. At last armed with a short video and sound clip they published their findings in *Science* triggering a frenzy of media coverage and sparking a controversy among birders and scientists who continue to disagree about whether the bird really still exists. In *Stalking the Ghost Bird* Michael K. Steinberg engages the lengthy debate over the ivory bill's status by examining the reported sightings and extensive efforts to find the rare bird in Louisiana. Louisiana has long been at the center of the ivory bill's story. John James Audubon wrote about the bird and its habitat during his stay in St. Francisville and scientists James Tanner and George Lowery studied the ivory bill in Louisiana in the 1930s and 1940s. More recently bird experts have conducted targeted searches in Louisiana. Steinberg discusses these and other scientific expeditions and he catalogs reported ivory bill sightings since the 1950s using a detailed timeline that includes both dates and specific locations. Interviews with conservation officials, ornithologists, and native Louisianans illuminate the ongoing controversy and explore why the ivory bill more than any other bird arouses so much attention. Steinberg meets elderly residents of the Atchafalaya Basin who saw the ivory bill while hunting in the 1930s and even ate the bird which they called the forest turkey during hard times. He paddles into Two O'Clock Bayou with one wildlife professor and travels to a cypress filled wildlife refuge with the director of Louisiana's Nature Conservancy. His interviews illustrate how expert opinions vary as well as how much local non-experts know. Steinberg also explores in detail the human impact on both the ivory bill and its bottomland forest habitat, explains how forest management practices in the South may pose problems for an ivory bill recovery, and outlines where future searches for the bird should take place. In this absorbing study Steinberg turns his lifelong interest in the majestic ivory billed woodpecker into a tale that encapsulates both the mystery and intrigue surrounding the legendary bird and our fascination with it.

*Lost Animals, Disappearing Worlds* Barbara Allen, 2025-06-12 A moving and motivating collection of portraits of extinct species revealing the profound implications of their disappearance. This book presents thirty-one extinct species through personal portraits. The intimate approach not only highlights each particular species but also explores the broader implications of losing a species forever. How do we honor such a loss? Can we grieve for species we never knew? These animals range from the well-known passenger pigeon, thylacine, and great auk to lesser-known creatures like the Arabian ostrich, Saint Helena earwig, and Bramble Cay melomys. Through her poignant portraits Barbara Allen not only tugs on the heartstrings but also aims to inspire readers to protect vulnerable and endangered species today, motivating us to play a positive role in conserving our planet's biodiversity.

*Flock Together* B.J. Hollars, 2017-02-01 After stumbling upon a book of photographs depicting extinct animals, B.J. Hollars became fascinated by the creatures that are no longer with us, specifically extinct North American birds. How, he wondered, could we preserve so beautifully on film what we've failed to preserve in life? And so begins his yearlong journey to find out. One that leads him from bogs to art museums, from archives to Christmas Counts, until he at last comes as close to extinct birds as he ever will during a behind-the-scenes visit at the Chicago Field Museum. Heartbroken by the birds we've

lost Hollars takes refuge in those that remain Armed with binoculars a field guide and knowledgeable friends he begins his transition from budding birder to environmentally conscious citizen a first step on a longer journey toward understanding the true tragedy of a bird s song silenced forever Told with charm and wit Flock Together is a remarkable memoir that shows how knowing the natural world even just a small part illuminates what it means to be a global citizen and how only by embracing our ecological responsibilities do we ever become fully human A moving elegy to birds we ve lost Hollars s exploration of what we can learn from extinct species will resonate in the minds of readers long beyond the final page Purchase the audio edition Watch a book trailer for Hollars s newest book **Midwestern Strange**

**A World on the Wing: The Global Odyssey of Migratory Birds** Scott Weidensaul, 2021-03-30 New York Times Bestseller Finalist for the Los Angeles Times Book Prize A Library Journal Best Science and Technology Book of the Year An exhilarating exploration of the science and wonder of global bird migration In the past two decades our understanding of the navigational and physiological feats that enable birds to cross immense oceans fly above the highest mountains or remain in unbroken flight for months at a stretch has exploded What we ve learned of these key migrations how billions of birds circumnavigate the globe flying tens of thousands of miles between hemispheres on an annual basis is nothing short of extraordinary Bird migration entails almost unfathomable endurance like a sparrow sized sandpiper that will fly nonstop from Canada to Venezuela the equivalent of running 126 consecutive marathons without food water or rest avoiding dehydration by drinking moisture from its own muscles and organs while orienting itself using the earth s magnetic field through a form of quantum entanglement that made Einstein queasy Crossing the Pacific Ocean in nine days of nonstop flight as some birds do leaves little time for sleep but migrants can put half their brains to sleep for a few seconds at a time alternating sides and their reaction time actually improves These and other revelations convey both the wonder of bird migration and its global sweep from the mudflats of the Yellow Sea in China to the remote mountains of northeastern India to the dusty hills of southern Cyprus This breathtaking work of nature writing from Pulitzer Prize finalist Scott Weidensaul also introduces readers to those scientists researchers and bird lovers trying to preserve global migratory patterns in the face of climate change and other environmental challenges Drawing on his own extensive fieldwork in *A World on the Wing* Weidensaul unveils with dazzling prose the miracle of nature taking place over our heads

**Imagining Extinction** Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public s attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what

is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately Imagining Extinction demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values

**Anthropology and Cryptozoology** Samantha Hurn,2016-11-03 Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour cryptozoology is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures Anthropology and Cryptozoology Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction

**Of Books and Beasts** Matt Bille,2021-12-02 In the controversial field of cryptozoology plagued by long lost accounts and internet fantasies the essential core of usable information is largely maintained in books Science writer and cryptozoology researcher Matt Bille offers 400 reviews of significant books in cryptozoology supporting

sciences like biology and cryptozoological fiction Matt's selections based on 45 years of reading and writing on zoology and cryptozoology favor reliable science and history providing an essential foundation for enthusiasts and skeptics alike The search for unknown animals starts here Looking for a concise but reliable survey of the most noteworthy cryptozoological books past and present Look no further here it is Dr Karl P N Shuker Zoologist *When God Was a Bird* Mark I. Wallace, 2018-11-20 2019 NAUTILUS GOLD WINNER In a time of rapid climate change and species extinction what role have the world's religions played in ameliorating or causing the crisis we now face Religion in general and Christianity in particular appears to bear a disproportionate burden for creating humankind's exploitative attitudes toward nature through unearthly theologies that divorce human beings and their spiritual yearnings from their natural origins In this regard Christianity has become an otherworldly religion that views the natural world as fallen as empty of signs of God's presence And yet buried deep within the Christian tradition are startling portrayals of God as the beaked and feathered Holy Spirit the animal God as it were of historic Christian witness Through biblical readings historical theology continental philosophy and personal stories of sacred nature this book recovers the model of God in Christianity as a creaturely avian being who signals the presence of spirit in everything human and more than human alike Mark Wallace's recovery of the bird God of the Bible signals a deep grounding of faith in the natural world The moral implications of nature based Christianity are profound All life is deserving of humans care and protection insofar as the world is envisioned as alive with sacred animals plants and landscapes From the perspective of Christian animism the Earth is the holy place that God made and that humankind is enjoined to watch over and cherish in like manner Saving the environment then is not a political issue on the left or the right of the ideological spectrum but rather an innermost passion shared by all people of faith and good will in a world damaged by anthropogenic warming massive species extinction and the loss of arable land potable water and breathable air To Wallace this passion is inviolable and flows directly from the heart of Christian teaching that God is a carnal fleshy reality who is promiscuously incarnated within all things making the whole world a sacred embodiment of God's presence and worthy of our affectionate concern This beautifully and accessibly written book shows that Christian animism is not a strange oxymoron but Christianity's natural habitat Challenging traditional Christianity's self definition as an otherworldly religion Wallace paves the way for a new Earth loving spirituality grounded in the ancient image of an animal God **Woody's Last Laugh** James Christopher Haney, 2021-11-26 When I was appointed Co chair of the U S Fish and Wildlife Service team charged with preparing a preliminary recovery plan for the Ivory billed Woodpecker I had naive notions about the work ahead Dr Haney's book would have been an immense help in navigating the many strange behaviors misconceptions and bitter disagreements that ensued Woody's Last Laugh reveals that I too fell to faulty thinking about the Ivory bill and the question of its continued existence or extinction I highly recommend this book for anyone involved in endangered species recovery as a way to avoid the many cognitive biases that we all face Jon Andrew Co chair of Ivory billed Woodpecker Recovery Team retired Woody's

Last Laugh explores a simmering controversy amid scientists conservationists birders and the media the supposed extinction of American ivory billed woodpecker Among the first to identify rampant mental errors inside conservation and environmental professions the book identifies 53 distinct kinds of cognitive blunders psychological biases and logical fallacies on both sides of the woodpecker controversy Few species have ever provoked such social rancor Why are rumors of its persistence so prevalent unlike other near or recently extinct animals Why are we so bad mannered with each other about a mere bird How is it that we cannot agree even on whether a mere bird is alive or dead Woody s Last Laugh uncovers why such mysteries so mess with our heads By exploring uncharted borders between conservation and mental perception new ways of evaluating truth and accuracy are opened to everyone Author Dr J Christopher Haney is a biologist conservation scientist and lifelong birder For 12 years he was Chief Scientist at Defenders of Wildlife In 2010 following the Deepwater Horizon oil blowout the U S Fish Wildlife Service invited him to lead the largest pelagic study of marine birds ever conducted in the Gulf of Mexico Since 2013 he has been president of Terra Mar Applied Sciences an independent public interest conservation research firm which he founded If there is one lesson Dr Haney hopes his book delivers it is to not overvalue our thinking skills Human reason is fallible even among scientists and technical experts To improve our essential relationship with nature conservation practices will need to devote as much attention to the unbridled thoughts as the unswerving sentiments Dead or alive however the ivory bill got the last laugh on us all      *Vancouver Island Scoundrels, Eccentrics and Originals* Stephen Ruttan,2014-04-01 Found on the history shelves of the Greater Victoria Public Library these twenty true stories are brought to life by Stephen Ruttan They draw a picture of the life of a city with a recent past that s both unconventional and colourful From Miss Wilson and her famous parrot Louis to Jimmy Chicken Island named after a man who acquired his surname from his habit of stealing chickens to the Pig War when Britain and the United States nearly came to blows over the San Juan Islands to the rise and fall of Francis Rattenbury one of Victoria s best known architects these stories reveal a lively history of a West Coast capital city Archival illustrations newspaper clippings and modern photos help make Vancouver Island Scoundrels Eccentrics and Originals a delightful and illuminating read      *The Life of the Skies* Jonathan Rosen,2008-12-23 Aerial delights A history of America as seen through the eyes of a bird watcher John James Audubon arrived in America in 1803 when Thomas Jefferson was president and lived long enough to see his friend Samuel Morse send a telegraphic message from his house in New York City in the 1840s As a boy Teddy Roosevelt learned taxidermy from a man who had sailed up the Missouri River with Audubon and yet as president presided over America s entry into the twentieth century in which our ability to destroy ourselves and the natural world was no longer metaphorical Roosevelt an avid birder was born a hunter and died a conservationist Today forty six million Americans are bird watchers The Life of the Skies is a genre bending journey into the meaning of a pursuit born out of the tangled history of industrialization and nature longing Jonathan Rosen set out on a quest not merely to see birds but to fathom their centrality historical and literary

spiritual and scientific to a culture torn between the desire both to conquer and to conserve Rosen argues that bird watching is nothing less than the real national pastime indeed it is more than that because the field of play is the earth itself We are the players and the spectators and the outcome since bird and watcher are intimately connected is literally a matter of life and death

**The Giant Squid in Transatlantic Culture** Otto Latva, 2023-09-30 This book builds upon the extensive study of the historical relationship between sea animals and humans in transatlantic culture during the eighteenth and nineteenth centuries It exposes the present understanding of the human relationship with the giant squid not only as too simplistic but also as historically inaccurate For instance it redefines the earlier understanding that humans and especially seafarers have understood giant squid as horror evoking and ugly creatures since the dawn of history and explains the origins of mythical sea monsters such as the Kraken The book is however more than a critical response to previous work It will point out that animals such as cephalopods which have largely been defined in biological contexts in recent times have a fascinating and multivariate past entangled with the history of humans in many remarkable ways Hence

this book is not just about perceptions of giant sized squid or cephalopods but a historical inquiry into the transatlantic culture from the late eighteenth century to the turn of the twentieth century It will provide new knowledge about the history of mollusc studies seafaring culture and more broadly of the relationship between humans and animals during the period

World War Zoos John M. Kinder, 2025-04-22 A new and heartbreaking history of World War II as told through the shocking experiences of zoos across the globe As Europe lurched into war in 1939 zookeepers started killing their animals On September 1 as German forces invaded Poland Warsaw began with its reptiles Two days later workers at the London Zoo launched a similar spree dispatching six alligators seven iguanas sixteen southern anacondas six Indian fruit bats a fishing cat a binturong a Siberian tiger five magpies an Alexandrine parakeet two bullfrogs three lion cubs a cheetah four wolves and a manatee over the next few months Zoos worldwide did the same The reasons were many but the pattern was clear The war that was about to kill so many people started by killing so many animals Why And how did zoos nevertheless not just survive the war but play a key role in how people did too A harrowing yet surprisingly uplifting chronicle Kinder's World War Zoos traces how zoos survived the deadliest decades of global history from the Great Depression through the terrors of World War II to the dawn of the Cold War More than anything before or since World War II represented an existential threat to the world's zoological institutions Some zoos were bombed others bore the indignities of foreign occupation Even zoos that were spared had to wrestle with questions rarely asked in public What should they do when supplies ran low Which animals should be killed to protect the lives of others And how could zoos justify keeping dangerous animals that might escape and run wild during an aerial attack Zoos in wartime reveal the shared vulnerabilities of humans and animals during periods of social unrest and environmental peril World War II era zoos offered people ways to think about and grapple with imprisonment powerlessness and degradation Viewed today the story of zoos during World War II can be read as an allegory of twenty first century crises as the effects of climate change threaten all life across the planet A one of a kind history World War Zoos is the story of how the world's zoos survived the deadliest conflict of the twentieth century and what was lost along the way
