Fonseca,2016 Ghosts are the only monsters that most people actually believe in A folklorist friend of mine said this to me when I was in the early stages of working on this project His words really colored the scope of this book which in its entries not only explains certain ghost lore and ghost related phenomena but considers the psychological and sociological reasons that representations of the ghost exist almost by necessity in different cultures and

throughout time Of course most of the entries deal with tales and motifs associated with legend and popular culture but readers of this text should be cognizant that despite the nature of these tales such stories of ghosts and hauntings are believed by many This makes the ghost a different sort of monster While there are extensive bodies of folklore about zombies and vampires most people in modern societies do not believe them to be real these same people who rationally deny the possible existence of vampires and zombies are also the same people who will admit in confidence that they experienced what they call a feeling something not quite right while touring a plantation home that is reputed to be haunted or while explaining that they saw a parent s image which appeared to them on the night of his her death The television genre that can be termed paranormal television attests to this belief in ghosts the vast majority of these programs concern ghost hunters who go in search of the truth behind a legend of a haunting or seek to debunk a medium who claims to be able to speak to the dead *Ghosts and Family Legends* Catherine Crowe,2017-08-24 A Volume for Christmas
