

## THE FLOWERING LAND

100 Million Years Ago in the Cretaceous Period

What a change has come upon the world! The air is hot, bristly and sticky. It is not moist and rich as now. We are not surrounded by meadows and tall grassy areas. Here we see a rolling country with masses of oak and hickory. There is the hollow where the meadow was, but not the pale green of alfalfa. And through the darker woods we catch glimpses of ferns. For flowering plants have appeared!

Flowering plants are new to the world, but there is a new world to go with them. It is a different world to us. It is the flowering of ferns. How bright their work of spreading flower pollen was back here, 100 million years ago. They are still here if it takes.

There are dinosaurs here too. But some of the old giants have died out. Brontosaurus, Diplodocus, and Spinosaurus all have vanished. In the white-throated woods elsewhere, perhaps there are not enough green plants left to feed all these long-necked giants. So through the open forest of ferns grow up. They laid their eggs. And at last there were none at all.

Now groups of dinosaurs whose bones are preserved appear now. They cannot run rapidly for protection from hunters. So they have developed thick, bony protection. These dinosaurs were made of stone.

An early armored dinosaur which lived in the Jurassic Period was Spinosaurus. It could be tall. The tall, stiff armor plates standing up from its high-backed, wooden legs back behind head to tail. And we are amazed that just with its heavy scales armor along its back. So some dinosaurs had Spinosaurus armor.

All the armored dinosaurs were first biggest, including Spinosaurus. Its hind legs were long and strong. Making bones were slowly made in its back bone. And though he walked on all fours, his front legs were short, as with some birds today.

Now armored dinosaurs are even more. Ankylosaurus in Cretaceous Period is one. His bones came from his second skin. He had a wide flat body. His back is covered with thick plates of bone. His legs are short, and he is built low to the ground. He is
