Powell, 1994 When it was first published by D C Heath in 1963 as part of their Problems in European Civilization series this small volume offered readers a broad representation of the scholarly discussion on Pope Innocent III in an accessible

format Now revised and updated this new edition presents recent scholarship on the role of Innocent III in the development of the medieval papacy while enlarging the treatment of the Crusades Innocent III's importance in theology his political life and his pastoral and reform activities Eight new selections have been added along with a revised and expanded introduction At the time of the first edition its title aptly summed up the main lines of discussion about the pontificate of Pope Innocent III Although extreme statements criticising Innocent for claiming secular power or defending his conception of papal authority no longer commanded major support modified versions of these views continued to dominate scholarship to a lesser degree they continue to do so today Yet in the past three decades important studies have emerged that emphasize Innocent's place as theologian his role in the Crusade movement and his involvement in efforts to reform the church and Christian society The papacy as a developing historical institution is now more firmly established in the context of the important changes that were taking place in late 12th and early 13th century Europe If Innocent III is no longer seen by most as pursuing secular dominance he is perhaps more realistically viewed as struggling within the limits of his age to find ways to make a better Christian world Offering a sampling of current and established scholarship on Innocent III this new paperback edition should prove valuable as a supplementary text in both undergraduate and beginning graduate courses in religious studies European history medieval history and the history of Christianity
