*The Concept of Contraction in Giordano Bruno's Philosophy* Leo Catana, 2017-09-08 Through the concept of contraction Giordano Bruno 1548 1600 endeavoured to explain the relationship of God to his Creation in a way that conformed with his pantheistic view of nature as well as his heterodox view of man s relationship to God The concept of contraction is twofold In the ontological sense it denotes the way in which the One or God descends to multiplicity In the noetic sense it accounts for the ways in which the individual human soul ascends towards God through a reversed process of contemplation Bruno denied the efficacy of the several psychical psychological and medical states traditionally thought to aid contemplation and noetic ascent towards God In his view the only means was philosophical contemplation the use of memory being one important form Philosophical contemplation elevated the mind from the fragmented multiplicity of sense impressions to an understanding of the principles governing the sensible world This publication is the first book length study dedicated to concept of contraction in Bruno s philosophy Moreover it explores his sources for this concept Traditionally Ficino s translation of Plotinus dating from the second half of the fifteenth century has been seen as a key source to the Neoplatonism informing Bruno s philosophy In *The Concept of Contraction in Giordano Bruno s Philosophy* another Neoplatonic source is considered namely the pseudo Aristotelian *Liber de Causis* Book of causes which has not yet been examined in the context of Renaissance Neoplatonism This work probably written in Arabic in the ninth century was translated into Latin in the twelfth century and remained well known to many late Medieval and Renaissance philosophers Catana argues that this work may have prepared for Ficino s translation of Plotinus and that in some instances it provided a common source to Renaissance philosophers Bruno and Nicholas of Cusa 1401 1464 being

Fernández,2025-04-07 Understanding the soul s essence is an elusive pursuit rendering any attempt to write about it akin to grasping at a mirage As a sublime subject the soul has captivated human thought for centuries How do we approach it How can we define its boundaries This exploration offers an experimental investigation into the soul s complexities during one of Spain s most turbulent periods the dawn of modernity Set against the spiritual backdrop of the 17th century these reflections examine how materiality ensnared individuals in artifice often neglecting expansionism s social and political consequences The Twelve Years Truce 1609 and the Thirty Years War 1618 1648 marked critical moments of instability further compounded by economic depression and social turmoil In this landscape of despair the Spanish soul sought refuge inwardly and through indulgence in worldly pleasures Through metaphysical inquiry emotional depth and the role of animated matter in art and theater this book reflects on existence amid the illusions of early modern Spain      **Christ and the Human Soul**

Rudolf Steiner,2023-07-05 10 Lectures in Copenhagen and Norrköping May 23 30 1912 July 12 16 1914 CW 155 Spiritual science does not want to replace Christianity rather it aims to be the instrument through which the meaning of Christianity can be grasped And one thing that will become particularly clear through spiritual science is that the being whom we call Christ must be recognized as the center of life on earth and that what we call the Christian faith is the ultimate religion the eternal religion for the future of the earth Rudolf Steiner July 13 1914 This collection of lectures from 1912 and 1914 offers a deepened understanding of the being of Christ the divine Logos in his connection with individual human souls From religious figures such as John the Baptist and Saint Francis to the twentieth century poet Christian Morgenstern these lectures reveal how Christ works with and through all who seek him The Pauline statement Not I but Christ in me becomes an inner guide by which each human soul can find a way to intimate union with the Christ being It is he who has the power to make our ideals and goals in life if they are worthy into true seeds of future reality The time of faith has come and gone Christ needs our conscious striving our effort to understand within the heart s deep core his ongoing presence and activity in the further

evolution of our spiritual Earth and in our journey toward humanness These lectures are a comfort and a signpost for the soul to walk the inner path of communion with Christ for the healing and redemption of the earth We may be able in the end to redeem the karma accrued by our own individual souls but for our spiritual work to be fruitful for all humanity it must be brought into connection with Christ What we take into ourselves in such a way that it is done from the perspective of Not I this is what Christ makes into a common possession for all humanity July 14 1914 To know Christ means to undergo the school of selflessness Under the influence of materialism the selflessness of humanity was lost in a way as will be understood in future ages of humanity However through absorption in the Mystery of Golgotha the penetration of the knowledge of the Mystery of Golgotha with our whole feeling and soul being we can once again acquire a culture of selflessness We can come to understand that what Christ did for the development of the Earth is contained in the fundamental impulse of selflessness and that what he can become for the conscious development of the human soul is the school of selflessness Rudolf Steiner June 1 1914 To read these lectures is to strike out on the heart's path of fellowship with the living Christ This book is a translation from German of *Christus und die Menschliche Seele* by den Sinn des Lebens Theosophische Moral Anthroposophie und Christentum GA 155 3rd ed Rudolf Steiner Verlag Dornach Switzerland 1994 Cover image Salvator Mundi 1499 1510 by Leonardo da Vinci     Sonnets William Shakespeare,1890     **What the world is made of** Helmut Friedrich Krause,2024-12-04 Some quotes Man is part of Creation and because this is so all the laws of Creation must also become effective in him all the secrets of Creation must be discoverable in him The celestial bodies like all created things are subject to the law of becoming and passing away All celestial bodies created from one building material space energy decay starting from the core of the celestial body into space energy again in the purest absolute form The most important neighboring star for our earth the sun like all other stars radiates space energy in its purest form originating from the matter decay in its core The interaction between the radiation fields of the sun and the earth results in changes in the state of the fields a slowing down of the energy due to compression As a result of the density of the nuclear radiation and the force of the counteraction of the fields the space energies which are apparently waveless in absolute form are compressed and transformed the energies take on wave form and in the process that process takes place which appears to our eye as light and which with sufficient intensity as with the sun is also perceived by us as heat The waxing and waning of a celestial body results in an increasing intensity of core radiation for the ascending phase of cosmic development and a steadily decreasing intensity for the descending phase With increasing intensity the cosmic radiation i.e. the space energies that reach us from other celestial bodies must steadily intensify so that the energy rays generated in this process experience an amplification in the direction of long energy waves ultra red or infrared The energy ray scale thus experiences a shift via ultra red in the upward course of development and a shift via ultra violet in the downward course of the celestial body     **Walter Pater and Persons** Stephen Cheeke,2024-07-12 Walter Pater and Persons investigates the vital concept of the Person in the work of

there was a revival of this theory in the time of the early German Romanticism whereas the concept of the anima mundi had been rejected in the earlier classical period of European philosophy early and mature Enlightenment The presentation and analysis starts from the Leibnizian Wolffian school generally hostile to the theory and covers classical eighteenth century physico theology also reluctant to accept an anima mundi Next it discusses early modern and modern Christian philosophical Cabbala B hme and tinger an intellectual tradition which to some extent tolerated the idea of a soul of the world The philosophical relationship between Spinoza and Spinozism on the one hand and the anima mundi theory on the other is also examined An analysis of Giordano Bruno s utilization of the concept anima del mondo is the last step before we give an account of how and why German Romanticism especially Baader and Schelling asserted and applied the theory of the Weltseele The purpose of the work is to prove that the philosophical insufficiency of a concept of God as an ens extramundanum instigated the Romantics to think an anima mundi that can act as a divine and quasi infinite intermediary between God and Nature as a locum tenens of God in physical reality

A Psychology with a Soul Jean Hardy,2016-06-10 A comprehensive approach to self realization psychosynthesis was developed between 1910 and the 1950s by the Italian psychiatrist Roberto Assagioli Assagioli like Jung diverged from Freud in order to develop an understanding of human nature that took account of spiritual dimensions This book originally published in 1987 is an exploration of psychosynthesis and the depth of mystical and scientific ideas behind it It will be of great value to all those interested in personal integration and spiritual growth in general and psychosynthesis in particular Focusing on psychosynthesis as transpersonal psychology Jean

Hardy describes how the ideas behind psychosynthesis spring both from scientific study of the unconscious and from the long mystical tradition of both the Eastern and Western world. She shows how the roots of a modern spiritual or transpersonal psychology lie in a split tradition within the Western world while psychology aspires to be scientific religion or mystical knowledge is currently studied within the discipline of theology. The two have up till now been very little related and the special achievement of psychosynthesis as a therapy is that it relates the soul and theology to the personality and psychology and perceives personal and developmental patterns as a microcosm of larger social and historical patterns.

*God the Known and God the Unknown* Samuel Butler, 2019-12-03 In *God the Known and God the Unknown* Samuel Butler embarks on an exploration of the divine juxtaposing traditional theological perspectives with his own innovative ideas. Employing a blend of philosophical inquiry and literary wit, Butler delves into the complexities of human understanding of God, illuminating the contrasts between the God of established religion and the more personal ineffable deity. The text is marked by Butler's incisive clarity and skepticism, reflecting the broader intellectual currents of the late 19th century as he navigates the tension between faith and reason amid an increasingly secularized society. Samuel Butler was a multifaceted thinker acclaimed not only as a novelist but also as an insightful essayist and critic. His background in both literature and philosophy combined with his own wrestles with conventional belief systems provided fertile ground for his reflections on spirituality. Butler's keen observation of contemporary debates surrounding science and religion informs his writings as he seeks to reconcile the known and unknown aspects of the divine in a manner that challenges prevailing notions. This thought-provoking work is highly recommended for readers interested in theology, philosophy, and literature. Butler's eloquence and critical perspective invite readers to engage in self-reflection about their own beliefs and perceptions of the divine, making it an essential read for those looking to navigate the delicate interplay between faith and reason.

*Shakespeare's Possible Worlds* Simon Palfrey, 2014-05-22 New methods are needed to do justice to Shakespeare. His work exceeds conventional models past and present for understanding playworlds. In this book, Simon Palfrey goes right to the heart of early modern popular drama, revealing both how it works and why it matters. Unlike his contemporaries, Shakespeare gives independent life to all his instruments and to every fraction and fragment of the plays. Palfrey terms these particles formations, theatre-specific forms that move with their own action and passion. Palfrey's book is critically daring in both substance and format. Its unique mix of imaginative gusto, thought experiments, and virtuosic technique generates piercing close readings of the plays. There is far more to playlife than meets the eye. Influenced by Leibniz's visionary original model of possible worlds, Palfrey opens up the multiple worlds of Shakespeare's language, scenes, and characters as never before.
