Girdle Round The Earth Story Of Cable And Wireless:

The ^AInvisible Weapon Daniel R. Headrick, 2012-09-01 A vital instrument of power telecommunications is and has always been a political technology In this book Headrick examines the political history of telecommunications from the mid nineteenth century to the end of World War II He argues that this technology gave society new options In times of peace the telegraph and radio were as many predicted instruments of peace in times of tension they became instruments of politics tools for rival interests and weapons of war Writing in a lively accessible style Headrick illuminates the political aspects of information technology showing how in both World Wars the use of radio led to a shadowy war of disinformation cryptography and communications intelligence with decisive consequences A Victorian Scientist and Engineer Gillian Cookson, Colin Hempstead, 2017-10-19 This title was first published in 2000 In a life of only 52 years Fleeming Jenkin established his reputation as a pioneer in the new world of electrical engineering known for his work on undersea telegraphs and later on the electrical transportation system known as telphegrage Equally at ease in the realms of theory and practice from 1850 until his death in 1885 Jenkin engaged in every field of Victorian engineering As a young adult he worked on intercontinental submarine telegraphy the cutting edge technology of its day which was inextricably bound to the new science of electricity Jenkin was both a scientist and an engineer a prototype of the modern experimental research engineer He was also a distinguished academic professor of engineering in the University of Edinburgh admired as an inspired and innovative teacher and for his interest in the philosophical tenets underpinning his subject Yet in spite of his influence as an early electrical engineer and his other intellectual achievements despite the celebrity of his associates Robert Louis Stevenson Mrs Gaskell and leading engineers of the day were among his close friends and the way that submarine telegraphs seized the Victorian popular imagination Jenkin himself has remained an obscure figure He deserves to be better known The story of Jenkin is of a life lived to the full It illuminates many aspects of Victorian intellectual society and of the organisation of science and engineering in his time The central purpose of this biography is to show Jenkin s achievements in engineering and in other fields and to judge his significance in these diverse activities *The Early Shortwave Stations* Jerome S. Berg, 2013-10-04 In July 1923 less than three years after Westinghouse station KDKA signed on company engineer Frank Conrad began regular simulcasting of its programs on a frequency in the newly discovered shortwave range It was an important event in a technological revolution that would make dependable worldwide radio communication possible for the first time In subsequent years countless stations in practically all countries followed suit taking to shortwave to extend reception domestically or reach audiences thousands of miles away Shortwave broadcasting would also have an important role in World War II and in the Cold War In this his fourth book on shortwave broadcast history the author revisits the period of his earlier work *On the Short Waves 1923 1945* and focuses on the stations that were on the air in those early days The year by year account chronicles the birth and operation of the large international broadcasters as well as the numerous

smaller stations that were a great attraction to the DXers or long distance radio enthusiasts of the time With more than 100 illustrations and extensive notes bibliography and index the book is also a valuable starting point for further study and research

The Tentacles of Progress Daniel R. Headrick,1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment

Regulation, Institutions, and Commitment Pablo Tomas Spiller,Ingo Vogelsang,1994

Imperial Defence Greg Kennedy,2007-11-21 This new collection of essays from leading British and Canadian scholars presents an excellent insight into the strategic thinking of the British Empire It defines the main areas of the strategic decision making process that was known as Imperial Defence The theme is one of imperial defence and defence of empire so chapters will be historiographical in nature discussing the major features of each key component of imperial defence areas of agreement and disagreement in the existing literature on critical interpretations introducing key individuals and positions and commenting on the appropriateness of existing studies as well as identifying a raft of new directions for future research

Uncovering Labour in Information Revolutions, 1750-2000: Volume 11 Aad Blok,Greg Downey,2003-12-15 Discussion of the current Information Revolution tends to focus on technological developments in information and communication and overlooks both the human labour involved in the development maintenance and daily use of information and communication technologies ICTs and the consequences of the implementation of these ICTs for the position and divisions of labour This volume aims to redress this imbalance by exploring the role position and divisions of information and communication labour in the broadest sense through periods of revolutionary technological change

Submarine Telegraphy and the Hunt for Gutta Percha

Helen Godfrey,2018-03-20 In Submarine Telegraphy and the Hunt for Gutta Percha Helen Godfrey traces the connections between submarine telegraphy and the peoples of Singapore and Sarawak Borneo who supplied gutta percha the latex insulating the world network of undersea telegraph cables The book examines the complex inter relationships linking metropolitan and local environments in a trade once described as a matter of interest to the whole civilized world Using previously untapped corporate and official archives trade data and a rich documentary record the study explores the roles of cable producers scientists administrators and local Chinese and indigenous traders It reveals how a global trade may transcend technological geographic and cross cultural challenges even hostilities Motivations and outcomes are more complex than simple commercial gain

Technology of Empire Daqing Yang,2011-04-18 Nearly half a century ago the economic historian Harold Innis pointed out that the geographical limits of empires were determined by communications and

that historically advances in the technologies of transport and communications have enabled empires to grow This power of communications was demonstrated when Japanese Emperor Hirohito's radio speech announcing Japan's surrender and the dissolution of its empire was broadcast simultaneously throughout not only the Japanese home islands but also all the territories under its control over the telecommunications system that had in part made that empire possible In the extension of the Japanese empire in the 1930s and 1940s technology geo strategy and institutions were closely intertwined in empire building The central argument of this study of the development of a communications network linking the far flung parts of the Japanese imperium is that modern telecommunications not only served to connect these territories but more important made it possible for the Japanese to envision an integrated empire in Asia Even as the imperial communications network served to foster integration and strengthened Japanese leadership and control its creation and operation exacerbated long standing tensions and created new conflicts within the government the military and society in general Coconut Colonialism Holger Droessler, 2022-01-11 Samoans had been engaged in economic and cultural exchange long before Germans and Americans arrived on the islands Holger Droessler shows how Samoans adapted their traditions to challenge the new globalization imposed on them by colonialism regaining agency through the efforts of farm workers nurses and traveling entertainers alike *The London and New York Stock Exchanges 1850-1914 (Routledge Revivals)* Ranald Michie, 2012-08-06 First published in 1987 this is a reissue of the first book to offer a detailed comparison of two of the foremost stock exchanges in world before 1914 It is not only an exercise in comparative economic history but it also relates these institutions to wider world markets thereby clarifying their functions and how they related to the general financial and economic framework Students and researchers in economic and social history will welcome the reissue of this groundbreaking account of two historically important institutions in a crucial period of their development Financial practitioners and others will also find much of interest here in terms of both fascinating history and of insights into an era when a global market was rapidly evolving largely free of the twentieth century distortions and hindrances introduced by wars interventionist governments and exchange controls *The Priesthood of Industry* Derek Matthews, Malcolm Anderson, J. R. Edwards, 1998 Documenting the rise of the accountancy profession in Britain the authors of this volume focus on the individual the professional accountant and adopt an economic determinist analysis to explain why such a rise has occurred **The International Business Archives Handbook** Alison Turton, 2017-09-19 The International Business Archives Handbook provides up to date information and guidance on key issues relating to the understanding and management of the historical records of businesses Key features include Chapter contributions from a range of experts in their respective fields Content covering business archive and business history initiatives around the world Practical advice combined with thought provoking discussion on issues hitherto little addressed Useful quick reference tables global case study examples and further reading suggestions The handbook is an invaluable guide for students archive professionals and

business historians alike It is also an important reference tool for business professionals involved in information management more generally

Britain and Denmark Jørgen Sevaldsen, Bo Bjørke, Claus Bjørn, 2003 Since 1815 Denmark and Britain have lived in peace with each other From the last half of the 19th century massive British imports of Danish agricultural products gave Britain a central role in the Danish economy likewise in the 20th century British efforts in the two world wars became of crucial importance to Denmark's position in relation to Germany and later the Soviet Union In the same period the emergence of English as the first foreign language in Denmark facilitated the increasingly closer human and cultural contacts between the two countries Britain and Denmark written by Danish and British historians constitutes the first attempt to provide a comprehensive picture of the roles that these two neighbouring countries have played in the lives of each other during the last two centuries They are different in size and have had very different global and regional orientations So naturally Britain has always loomed larger in Danish life and politics than the other way round In many areas however relations have been close The book covers contacts relating to trade security policies and social and political theory but also touch on mutual influences within the areas of literature music design etc Most treatments of Danish political and cultural relations with the outside world in this period concentrate on Germany for the period up to 1945 and on the Soviet Union and the USA in the post war world In the same way works on British contemporary history rarely devote much space to relations with the Nordic countries The aim therefore of this book is to provide a supplement and perhaps corrective to the existing literature on the international positions of Britain and Denmark in the modern world

Sublime Communication Technologies Rod Giblett, 2008-01-17 This lively new study is a critical cultural history of communication technologies from railways and telegraphy to computers and the Internet in which Rod Giblett argues that these technologies play a pivotal role in the cultural history of modernity and its project of the sublime

The British Empire at its Zenith A. J. Christopher, 2018-03-16 This title originally published in 1988 examines the network of states and the political and economic systems which bound the British Empire together This book examines each country and how the empire made its mark in the shape of urban form public buildings and rural land patterns An overall assessment of the Imperial heritage is attempted as a pointer to the unity which existed between the many diverse lands for a brief period in their history

Engineering Empires B. Marsden, C. Smith, 2004-12-07 Engineers are empire builders Watt Brunel and others worked to build and expand personal and business empires of material technology and in so doing these engineers also became active agents of political and economic empire This book provides a fascinating exploration of the cultural construction of the large scale technologies of empire

The Undersea Network Nicole Starosielski, 2015-03-02 In our wireless world it is easy to take the importance of the undersea cable systems for granted but the stakes of their successful operation are huge as they are responsible for carrying almost all transoceanic Internet traffic In The Undersea Network Nicole Starosielski follows these cables from the ocean depths to their landing zones on the sandy beaches of the South Pacific bringing them to the surface of media

scholarship and making visible the materiality of the wired network In doing so she charts the cable network s cultural historical geographic and environmental dimensions Starosielski argues that the environments the cables occupy are historical and political realms where the network and the connections it enables are made possible by the deliberate negotiation and manipulation of technology culture politics and geography Accompanying the book is an interactive digital mapping project where readers can trace cable routes view photographs and archival materials and read stories about the island cable hubs

The Transit of Venus Enterprise in Victorian Britain Jessica Ratcliff,2016-09-12 In the nineteenth century the British Government spent money measuring the distance between the earth and the sun using observations of the transit of Venus This book presents a narrative of the two Victorian transit programmes It draws out their cultural significance and explores the nature of big science in late Victorian Britain

Media and the British Empire C. Kaul,2006-03-28 The only true history of a country wrote Thomas Macaulay is to be found in its newspapers This book explores how the media shaped and defined the economic social political and cultural dynamics of the British Empire by viewing it from the perspective of the colonised as well as the colonisers

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
