Racialization Karim Murji, John Solomos, 2005 Racialization has become one of the central concepts in the study of race and racism It is widely used in both theoretical and empirical studies of racial situations There has been a proliferation of texts that use this notion in quite diverse ways It is used broadly to refer to ways of thinking about race as well as to institutional processes that give expression to forms of ethno racial categorization An important issue in the work of writers such as Robert Miles for example concerns the ways in which the construction of race is shaped historically and how the usage of that idea forms a basis for exclusionary practices The concept therefore refers both to cultural or political processes or situations where race is invoked as an explanation as well as to specific ideological practices in which race is deployed It is evident however that despite the increasing popularity of the concept of racialization there has been relatively little critical analysis exploring its theoretical and empirical usages It is with this underlying concern in mind that Racialization Studies in Theory and Practice brings together leading international scholars in the field of race and ethnicity in order to explore both the utility of the concept and its limitations

Between Winnicott and Lacan Lewis A. Kirshner, 2011-03-25 D W Winnicott and Jacques Lacan two of the most innovative and important psychoanalytic theorists since Freud are also seemingly the most incompatible And yet in different ways both men emphasized the psychic process of becoming a subject or of developing a separate self and both believed in the possibility of a creative reworking or new beginning for the person seeking psychoanalytic help The possibility of working between their contrasting perspectives on a central issue for psychoanalysis the nature of the human subject and how it can be approached in analytic work is explored in this book Their differences are critically evaluated with an eye toward constructing a more effective psychoanalytic practice that takes both relational and structural linguistic aspects of subjectivity into account The

contributors address the Winnicott Lacan relationship itself and the evolution of their ideas and provide detailed examples of how they have been utilized in psychoanalytic work with patients Contributors Jeanne Wolff Bernstein James Gorney Andre Green Mardi Ireland Lewis Kirshner Deborah Luepnitz Mari Ruti Alain Vanier Francois Villa
