## **Good Times Hard Times The Past And The Future In Elizabeth:**

Inequality in Australia Alastair Greig, Frank Lewins, Kevin White, 2003-02-17 This text seeks to analyse and explain inequality challenging traditional conceptions and providing a new critical perspective The authors provide a comprehensive historical account of inequality and show how that account no longer adequately explains the new and different forms of inequality experienced in recent decades As society has changed they argue new forms of inequality have emerged conditioning the subject's very experience of identity embodiment and politics The book is at once a critical overview of contemporary inequality and a thorough going textbook suitable for undergraduates *Good Times, Hard Times* Mark Peel, 1995 *Good Times Hard Times* is local history with a difference Mark Peel presents a passionate view of a place where ordinary Australians built a new community and new lives only to see them undermined by the profound economic and social changes that have accompanied our transition from the relative prosperity of the 1960s to the uncertainties of the 1990s The South Australian town of Elizabeth stands as a powerful example for all such communities throughout Australia Founded as a model town in the 1950s Elizabeth has experienced the most important changes of modern Australia the hopes and failures of postwar town planning and reconstruction the flow of migrants and working people into new suburbs on the fringes of Australian cities the impact of economic downturns on these people's fortunes in the 1970s and 1980s the growth and decay of manufacturing the changing attitudes of governments and other institutions to inequality and poverty Mark Peel examines the structural roots of these changes and his insight into the often devastating human consequences of economically driven decision making gives the book its power BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Population, Migration and Settlement in Australia and the Asia-Pacific** Natascha Klocker, Olivia Dun, 2018-12-07 The chapters in this book reflect on the work of seminal Australian geographer the late Professor Graeme Hugo Graeme Hugo was widely respected because of his impressive contributions to scholarship and policy in the fields of migration population and development which spanned several decades This collection of works contains contributions from authors whose own research has been influenced by Hugo and includes numerous authors who worked closely with Hugo throughout his career The collection provides an opportunity to reflect on Hugo's legacy and also to foreground contemporary scholarship in his key areas of research focus The chapters are organised into two thematic threads Part I contains works relating to Population Migration and Settlement in Australia while Part II focuses on Labour and Environmental Migration in the Asia Pacific Together these two thematic threads provide broad coverage of Graeme Hugo's key areas of research focus The chapters also serve as a reminder of Hugo's steadfast concern with producing careful scholarship for the public good and seek to prompt continued work in this vein The chapters originally published in special issues in *Australian Geographer* **Sociology Australia** Judith Bessant, 2020-07-16 Sociology gives us the tools we need to understand our life and the lives of the people around us It reveals that our commonsense view of the world isn't always right

and enables us to find out what actually shapes our experiences In this widely used and very readable introductory text Judith Bessant and Rob Watts show us how to develop a sociological perspective on what is happening in Australia today Rapid and far reaching social changes are taking place which affect us all globalisation is impacting on our economy and culture technological developments increase the pace of life and many people worry about the decline of traditional values and about environmental and personal security Using a sociological perspective we can explain why different groups of people experience these changes as exciting unsettling or devastating Sociology Australia is structured around six key questions What is sociology Who are we and how do we come to be who we are How do we know the world in which we live Can we make our lives as we want them Who makes the decisions that shape our society What changes are taking place in Australia today Sociology Australia is an ideal introduction to the discipline of sociology and to the dynamics of Australian society today This third edition of Sociology Australia has been substantially revised and updated and includes new chapters on religion education and sustainability *Fatness, Obesity, and Disadvantage in the Australian Suburbs* Megan Warin, Tanya Zivkovic, 2019-03-18 This ethnography takes the reader into the Australian suburbs to learn about food eating and bodies during the highly political context of one of Australia's largest childhood obesity interventions While there is ample evidence about the number of people who are overweight or obese and an abundance of information about what and how to eat obesity remains a problem in high income countries such as Australia Rather than rely on common assumptions that people are making all the wrong choices this volume reveals the challenges of eating healthy when money is scarce and how different versions of being fat and doing fat happen in everyday worlds of precarity Without acknowledgement of the multiple realities of fatness and obesity interventions will continue to have limited reach *Cities of Difference* Ruth Fincher, Jane Margaret Jacobs, 1998-03-20 By adopting an approach that is sensitive to issues of difference as well as to the role of the state Cities of Difference considers the fragmentation of city life and the complex relationship between identity power and place **A Concise History of Australia** Stuart Macintyre, 2009-06-29 Australia is the last continent to be settled by Europeans but it also sustains a people and a culture tens of thousands years old For much of the past 200 years the newcomers have sought to replace the old with the new This book tells how they imposed themselves on the land and brought technology institutions and ideas to make it their own It relates the advance from penal colony to a prosperous free nation and illustrates how as a nation created by waves of newcomers the search for binding traditions was long frustrated by the feeling of rootlessness until it came to terms with its origins The third edition of this acclaimed book recounts the key factors social economic and political that have shaped modern day Australia It covers the rise and fall of the Howard government the 2007 election and the apology to the stolen generation More than ever before Australians draw on the past to understand their future **Urban Regeneration in Australia** Kristian Ruming, 2018-02-20 Drawing together leading urban academics this book provides the first detailed and cohesive exploration of contemporary urban regeneration in

Australian cities It explores the multiple aspects and processes of regeneration including planning policy strategic and regulatory development financing sustainability remediation and transport The book puts forward a unique and innovative scaled analysis of urban regeneration which positions urban regeneration as more than just large scale redevelopment projects It examines the processes of urban change which occur outside inner suburbs which contribute to regenerating the city as a whole The book moves beyond the planning and economic considerations of the regeneration process to describe the social and cultural aspects of regeneration In doing so it focuses on the management of higher density environments culture as a trigger for regeneration and community opposition to the regeneration process Urban Regeneration in Australia would benefit academics students and professionals of urban geography and planning as well as those with a particular interest in Australian urbanism

Reimagining Class in Australia Henry Paternoster, 2017-09-21 This book re evaluates New Left and Marxist texts from the 1980s in order to explore problems facing the study of class which have emerged within Australian and international theories The author contrasts the popular ideas of Connell Bourdieu and the Death of Class thesis with those of lesser known texts concluding that no single definition can account for the various historical meanings of class Instead loosely following Castoriadis the concept of class can best be understood as creatively imagined and institutionalised Paternoster proposes that class is best studied through historical phenomenology which can be used to link political economy cultural sociology and anthropological ethnographies This approach allows the contributions of Marxist and New Left authors to be reintegrated with contemporary theories Doing so highlights the significance of labour populism while cautioning against the ahistorical applications of texts such as Bourdieu s Distinction Reimagining Class in Australia will be of interest to students and scholars across a range of disciplines including sociology history political economy and anthropology

Qualitative Urban Analysis Paul J. Maginn, S. Thompson, Matthew Tonts, Christopher Pole, 2008-02-18 Advocates a pragmatic renaissance within qualitative research a systematic approach to conducting qualitative research and representing the findings This book includes chapters that showcase the utility of qualitative research by providing theoretical methodological and empirical insights into real life research

Connecting Lives and Learning Brenton Prosser, Bill Lucas, Alan Reid, 2010 Connecting Lives and Learning is a project dedicated to connecting learning to student lives connecting teachers with the latest middle years research and better connecting primary and secondary schools to keep students at school longer Based in Adelaide s lower socio economic northern urban fringe the project helps teachers use students everyday experience and expertise to develop new ways of teaching and learning that involve students in intellectually challenging tasks This book tells the stories of real teachers in real classrooms making real attempts for change and not always succeeding It is a book about teachers making a difference in difficult times and tough places But most importantly this book reaffirms that being an educator is inherently about adopting socially just practices building community capacity and contributing to a more socially sustainable world

Australian Poverty Ruth Fincher, John

Nieuwenhuysen,2016-10-18 The most important effort to measure poverty in post war Australia was the 1975 Royal Commission on Poverty chaired by Professor Ronald Henderson CMG AO of the University of Melbourne Twenty two years later the authors of Australian Poverty Then and Now provide a telling comparison between the findings of Henderson s Commission and the present day The theme of the chapters in the book rests mainly on a description of Henderson s findings and recommendations in 1975 and the changes achievements failings and general comparative conditions today The volume explains the task of assessing the level of poverty in a country which remains lucky for some but not for others The Other Sydney Jock Collins,Scott Poynting,2000 The western and south western suburbs of Sydney are the heart of Sydney s cultural diversity where most of Sydney s immigrants live and which gives it a complex changing character at odds with the often negative stereotypes that dominate the media This set of papers looks behind the stereotype at the social reality The Price of Prosperity Richard Taylor,Peter Saunders,2002 While our leaders celebrate Australia s economic miracle unemployment particularly long term unemployment has become a permanent feature of Australia s economic landscape Its unacceptably high level has proved remarkably resistant in the face of sustained economic growth and increased prosperity The adverse economic and social consequences of high unemployment are likely to leave long term scars on those affected as well as on local communities and the entire fabric of Australian society Yet these effects rarely feature on the policy agenda and the costs of unemployment remain largely invisible An Australian Indigenous Diaspora Paul Burke,2018-07-27 Some indigenous people while remaining attached to their traditional homelands leave them to make a new life for themselves in white towns and cities thus constituting an indigenous diaspora This innovative book is the first ethnographic account of one such indigenous diaspora the Warlpiri whose traditional hunter gatherer life has been transformed through their dispossession and involvement with ranchers missionaries and successive government projects of recognition By following several Warlpiri matriarchs into their new locations far from their home settlements this book explores how they sustained their independent lives and examines their changing relationship with the traditional culture they represent Globalizing Cities Peter Marcuse,Ronald Van Kempen,2011-07-18 This exciting collection of original essays provides students and professionals with an international and comparative examination of changes in global cities revealing a growing pattern of social and spatial division or polarization *Understanding Trust in Government* Scott E. Robinson,James W. Stoutenborough,Arnold Vedlitz,2017-04-28 Growing disenfranchisement with political institutions and policy processes has generated interest in trust in government For the most part research has focused on trust in government as a general attitude covering all political institutions In this book Scott E Robinson James W Stoutenborough and Arnold Vedlitz argue that individual agencies develop specific reputations that may contrast with the more general attitudes towards government as a whole Grounded in a treatment of trust as a relationship between two actors and taking the Environmental Protection Agency as their subject the authors illustrate that the agency s reputation is explained through general demographic and

ideological factors as well as policy domain factors like environmentalism The book presents results from two approaches to assessing trust 1 a traditional attitudinal survey approach and 2 an experimental approach using the context of hydraulic fracturing While the traditional attitudinal survey approach provides traditional answers to what drives trust in the EPA the experimental results reveal that there is little specific trust in the EPA across the United States Robinson Stoutenborough and Vedlitz expertly point the way forward for more reliable assessments of trust while demonstrating the importance of assessing trust at the agency level This book represents a much needed resource for those studying both theory and methods in Public Administration and Public Policy     Diasporas Professor Kim Knott, Doctor Sean McLoughlin, 2013-04-04 Featuring essays by world renowned scholars Diasporas charts the various ways in which global population movements and associated social political and cultural issues have been seen through the lens of diaspora Wide ranging and interdisciplinary this collection considers critical concepts shaping the field such as migration ethnicity post colonialism and cosmopolitanism It also examines key intersecting agendas and themes including political economy security race gender and material and electronic culture Original case studies of contemporary as well as classical diasporas are featured mapping new directions in research and testing the usefulness of diaspora for analyzing the complexity of transnational lives today Diasporas is an essential text for anyone studying working or interested in this increasingly vital subject     Australian Metropolis Robert Freestone, Stephen Hamnett, 2020-03-25 The Australian Metropolis splendidly fills a huge gap in the literature on Australian cities It is the definitive account of the history of Australian cities and the crucial role which planning has played in their genesis and growth Spanning two centuries from the very beginning until the present day it will instantly become a standard work Professor Sir Peter Hall author of *Cities in Civilisation* The Australian Metropolis provides a single volume introduction to the development of urban planning It fills the need for a convenient initial resource for anyone interested in the broad evolutionary sweep of modern planning By setting the evolution of Australian planning within its broader societal context The Australian Metropolis presents a balanced appraisal of the positive negative and ambivalent legacies resulting from attempts to plan Australia's major cities This book is the winner of two Royal Australian Planning Institute Awards for Planning Excellence in 2000 2001 including the New South Wales Division Prize for Planning Scholarship in February 2001     *The Story of Australia* Louise Johnson, Tanja Luckins, David Walker, 2021-09-02 The Story of Australia provides a fresh engaging and comprehensive introduction to Australia's history and geography An island continent with distinct physical features Australia is home to the most enduring Indigenous cultures on the planet In the late eighteenth century newcomers from distant worlds brought great change Since that time Australia has been shaped by many peoples with competing visions of what the future might hold This new history of Australia integrates a rich body of scholarship from many disciplines drawing upon maps novels poetry art music diaries and letters government and scientific reports newspapers architecture and the land itself engaging with Australia in its historical geographical national and global contexts It pays particular attention to

women and Indigenous Australians as well as exploring key themes including invasion colonisation land use urbanisation war migration suburbia and social movements for change Elegantly written readers will enjoy Australia s story from its origins to the present as the nation seeks to resolve tensions between Indigenous dispossession British tradition and multicultural diversity while finding its place in an Asian region and dealing with global challenges like climate change It is an ideal text for students academics and general readers with an interest in Australian history geography politics and culture
