John Ruskin and the Fabric of Architecture Anuradha Chatterjee, 2017-10-02 Through the theoretical lenses of dress studies gender science and visual studies this volume analyses the impact John Ruskin has had on architecture throughout the nineteenth and twentieth centuries It explores Ruskin's different ideologies such as the adorned wall veil which were instrumental in bringing focus to structures that were previously unconsidered John Ruskin and the Fabric of Architecture examines the ways in which Ruskin perceives the evolution of architecture through the idea that architecture is surface The creative act in architecture analogous to the divine act of creation was viewed as a form of dressing By adding highly aesthetic features to designs taking inspiration from the veil of women's clothing Ruskin believed that buildings could be transformed into meaningful architecture This volume discusses the importance of Ruskin's surface theory and the myth of feminine architecture and additionally presents a competing theory of textile analogy in architecture based on morality and gender to counter Gottfried Semper's historicist perspective This book would be beneficial to students and academics of architectural history and theory gender studies and visual studies who wish to delve into Ruskin's theories and to further understand his capacity for thinking beyond the historical methods The book will also be of interest to architectural practitioners particularly Ruskin's theory of surface architecture

The Art and Culture of Scandinavian Central Europe, 1550-1720 Kristoffer Neville, 2019-08-08 Politically and militarily powerful early modern Scandinavia played an essential role in the development of Central European culture from the sixteenth to the eighteenth century In this volume Kristoffer Neville shows how the cultural ambitions of Denmark and Sweden were inextricably bound to those of other Central European kingdoms Tracing the visual culture of the Danish and

Swedish courts from the Reformation to their eventual decline in the eighteenth century Neville explains how and why they developed into important artistic centers He examines major projects by figures largely unknown outside of Northern Europe alongside other more canonical artists including Cornelis Floris Adriaen de Vries and Johann Bernhard Fischer von Erlach to propose a more coherent view of this part of Europe one that rightly includes Scandinavia as a vital component The seventeenth century has long seemed a bleak moment in Central European culture Neville's authoritative and unprecedented study does much to change this perception showing that the arts did not die in the Reformation and Thirty Years War but rather flourished in the Baltic region
