Sources in Mathematics and Statistics Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free The Common Law System in Chinese Context Berry Fong-Chung Hau, 2019-07-25 Under the 1984 Sino British Joint Declaration on the future of Hong Kong the previous capitalist system and life style shall remain unchanged for 50 years This concept has been embedded in the Basic Law of

Hong Kong The future of the Common Law judicial system in Hong Kong depends on the perceptions of it by Hong Kong's Chinese population judicial developments prior to July 1 1997 when Hong Kong passes from British to Chinese control and the Basic Law itself All of these critical issues are addressed in this book It applies survey and statistical analysis to the study of the attitudes toward and the values inherent to the Common Law judicial system in the unique cultural and economic milieu of Hong Kong in transition

**Inside and Out** Robert Forrant, Linda Silka, 2017-03-02 Two overarching questions permeate the literature on universities and civic engagement How does a university restructure its myriad activities maintain its academic integrity and have a transformative impact off campus And who ought to participate in the conversations that frame and guide both the internal restructuring process and the off campus interactions The perspective of this book based on research and projects in the field is that long term sustainable social and economic development requires strategies geared to the scientific technical cultural and environmental aspects of development Much of the work in this volume challenges traditional university practices Universities tend to reproduce a culture that rejects direct interaction across traditional academic department boundaries and beyond the campus Yet interdisciplinary work is important because it more aptly mirrors what is taking place in the regional economy as firms collaborate across manufacturing boundaries and community organizations and neighbourhood groups work to solve common problems What is distinctive within the range of scholarship and practice in this volume is the inclination on the part of increasing numbers of professors on more and more campuses to collaborate across disciplinary lines Universities must persist in the advancement of cross community cross firm and cross institutional learning The learning dynamics and knowledge diffusion generated by collaborative activities and new approaches to teaching can invigorate all phases of learning at the university In this way the university advances its activities beyond an indiscriminate approach to development maximizes the use of its resources and performs an integrative and innovative role in the cultivation of equitable and sustainable regions The chapters in this book illustrate the strikingly different and exciting ways in which universities pursue education for sustainability
