Good Science Roof Bks:

Other Richard Caddel, Peter Quartermain, 1999 The most significant US anthology of innovative poetries from the UK and Ireland in over 25 years When most Americans think of contemporary British poetry they think of such mainstream poets as Ted Hughes Philip Larkin and Geoffrey Hill Yet there is a vibrant diverse alternative poetry movement in the UK inspired in large measure by the work of such significant mentors as Basil Bunting and J H Prynne There is growing interest in this work in the United States as alternative American poetries express increasingly transnational concerns and yet almost none of it is available here OTHER is a highly focused anthology bringing together several important strands of English language poetry that are not otherwise so readily accessible It includes work by 55 poets among them Cris Cheek Brian Coffey Fred d Aguiar Allen Fisher Ulli Freer Randolph Healy Linton Kwesi Johnson Wendy Mulford Tom Raworth Denise Riley Catherine Walsh a critical introduction addressing such topics as the interaction of British and American poetic traditions and brief biographical and bibliographical notes on each poet The Oxford Handbook of Contemporary British and Irish Poetry Peter Robinson, 2013-09-26 The Oxford Handbook of Contemporary British and Irish Poetry offers thirty eight chapters of ground breaking research that form a collaborative guide to the many groupings and movements the locations and styles as well as concerns aesthetic political cultural and ethical that have helped shape contemporary poetry in Britain and Ireland The book s introduction offers an anthropological participant observer approach to its variously conflicted subjects while exploring the limits and openness of the contemporary as a shifting and never wholly knowable category The five ensuing sections explore a history of the period s poetic movements its engagement with form technique and the other arts its association with particular locations and places its connection with and difference from poetry in other parts of the world and its circling around such ethical issues as whether poetry can perform actions in the world can atone redress or repair and how its significance is inseparable from acts of evaluation in both poets and readers Though the book is not structured to feature chapters on authors thought to be canonical on the principle that contemporary writers are by definition not yet canonical the volume contains commentary on many prominent poets as well as finding space for its contributors enthusiasms for numerous less familiar figures It has been organized to be read from cover to cover as an ever deepening exploration of a complex field to be read in one or more of its five thematically structured sections or indeed to be read by picking out single chapters or discussions of poets that particularly interest its individual readers *The Language Of Environment* George Myerson, Yvonne Rydin, 2014-03-05 First published in 1996 Environment challenges modern knowledge and its institutions academic disciplines research groups journals and presses syllabuses and texts professions and data banks media experts and policy advisors The language of environment makes no policy proposals it is not prescriptive But it is an attempt to think about the cultural context of all proposals and prescriptions the cultures of authority and expertise in our time How is knowledge made to count and how do all the different claims connect or collide **10 Greate Books of the Science**
