Gothic Architecture Scholasticism:

Gothic Architecture and Scholasticism Erwin Panofsky, 1976 Gothic Architecture and Scholasticism Erwin Panofsky, 2003-01-01 **Scholasticism** Jose Ignacio Cabezon, José Ignacio Cabezón, 1998-05-28 Leading scholars in the field of religious studies show that scholasticism as a comparative category is useful in the analysis of a variety of religious and philosophical traditions and even in the task of cultural criticism **Invisible Cathedrals** Neil H. Donahue, 1995 Invisible Cathedrals places Wilhelm Worringer in the foreground of discussions of Expressionism and German Modernism for the first time These essays not only reveal the complexities of his individual works such as Abstraction and Empathy 1908 and Form Problems of the Gothic 1911 they also examine his lesser known books and essays of the post World War I years the 1920s and beyond Invisible Cathedrals offers both a basic introduction to Worringer's writings and their broad influence and a profound and detailed revisionist analysis of his significance in German and European Modernism It also provides the most comprehensive bibliography to date of his own work and of the scattered criticism devoted to Worringer in different disciplines Worringer's works were provocative widely read and often reprinted and were highly influential among artists and writers in Germany As a result they both raised suspicion in his own academic discipline of art history and excited discussion in other diverse fields such as literary and social theory psychology and film theory Worringer emerges here not solely as a scholarly commentator on the history of art but also as an activist scholar who engaged his historical criticism of other periods directly in the production of culture in his own time Contributors are Magdalena Bushart Neil H Donahue Charles W Haxthausen Michael W Jennings Joseph Masheck Geoffrey Waite and Joanna E Ziegler **Architectures of Occupation in the Australian Short Story** Patrick West, 2024-05-28 Patrick West's Architectures of Occupation in the Australian Short Story cultivates the potential for literary representations of architectural space to contribute to the development of a contemporary politics of Australian post colonialism West argues that the predominance of tropes of place within cultural and critical expressions of Australian post colonialism should be re balanced through attention to spatial strategies of anti colonial power To elaborate the raw material of such strategies West develops interdisciplinary close readings of keynote stories within three female authored pan twentieth century Australian short story collections Bush Studies by Barbara Baynton 1902 Kiss on the Lips and Other Stories by Katharine Susannah Prichard 1932 and White Turtle A Collection of Short Stories by Merlinda Bobis 1999 The capacity of the short story form to prompt creative and politically germinal engagements with species of space associated with architecture and buildings is underscored Relatedly West argues that the recent resurgence of binary thought on local national and international scales occasions an approach to the short story collections shaped by binary relationships like a dichotomy of inside and outside Concluding his argument West connects the literary and architectural critiques of the story collections to the wicked problem linked to ongoing colonial violences of improving Australian Indigenous housing outcomes Innovative and interdisciplinary this book will be of interest

to scholars and students of Literary Architectural and Postcolonial Studies The Spatial Logic of Social Struggle Nikolaus Fogle, 2011-04-07 Pierre Bourdieu's theory of practice is widely regarded as among the most innovative and illuminating fruits of recent social thought. As evidence mounts that the spatial turn in the social sciences and humanities is no mere theoretical fad but rather an enduring paradigm of social and cultural research, Bourdieu's status as a profoundly spatial thinker takes on a renewed importance. *The Spatial Logic of Social Struggle* A Bourdieuan Topology focuses on Bourdieu's philosophy of space, arguing that space is at once a condition for social knowledge, a methodological instrument, and a physical context for practice. By considering Bourdieu's theory of social space and fields alongside his several accounts of socially potent physical spaces, Nikolaus Fogle develops an understanding of the systematic co-determinations between social and physical space. He traces Bourdieu's ideas about the spatiality of social life through his investigations of Algerian peasant villages and Gothic cathedrals as well as spaces of class lifestyle and cultural creation, revealing that social and environmental struggles are only logical insofar as they are topological. He also demonstrates how a Bourdieuan dialectical understanding of social and physical space can be brought to bear on contemporary issues in architecture and urban development. This book will be useful and accessible not only to philosophers but also to architects, geographers, sociologists, and other scholars in the social sciences and humanities who take an interest in the social theory of space. Gothic architecture and scholasticism : Wimmer lecture, 1948 Erwin Panofsky, 1951 *The Architecture of Art History* Mark Crinson, Richard J. Williams, 2018-12-13 What is the place of architecture in the history of art? Why has it been at times central to the discipline and at other times seemingly so marginal? What is its place now? Many disciplines have a stake in the history of architecture: sociology, anthropology, human geography, to name a few. This book deals with perhaps the most influential tradition of all art history, examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years. In this highly original study, Mark Crinson and Richard J. Williams point to a decline in the importance attributed to the role of architecture in art history over the last century, which has happened without crisis or self-reflection. The book explores the problem in relation to key art historical approaches, from formalism to feminism to the social history of art, and in key institutions from the Museum of Modern Art to the journal *October*. Among the key thinkers explored are Banham, Baxandall, Giedion, Panofsky, Pevsner, Pollock, Riegl, Rowe, Steinberg, Wittkower, and Wölfflin. The book will provoke debate on the historiography and present state of the discipline of art history, and it makes a powerful case for the reconsideration of architecture. **The Haskins Society Journal** William North, 2010
Art And Architecture In Medieval France Whitney S. Stoddard, 2018-02-20 This is an English language study on the architecture and art of medieval France of the Romanesque and Gothic periods between 1000-1500. In addition to essays on individual monuments, there are general discussions of given periods and specific problems such as why did Gothic come into being? Whitney Stoddard explores the interrelationship between all forms of medieval ecclesiastical art and characterization.

of the Gothic cathedral which he believes to have an almost metaphysical basis **Art Education, Scholastic and Industrial** Walter Smith,1872 Thinking of the Middle Ages Benjamin A. Saltzman,R. D. Perry,2022-10-13 This book examines how mid twentieth century intellectuals engagement with the Middle Ages shaped politics art and history **The Engineering of Medieval Cathedrals** Lynn Courtenay,2016-12-05 The great cathedrals and churches of the medieval West continue to awe How were they built and why do they remain standing What did their builders know about what they were doing These questions have given rise to considerable controversy which is fully reflected in the papers selected here The first section of the book is concerned with the medieval builders and their design methods the second focuses on engineering issues in the context of the infamous collapse of the choir at Beauvais in 1284 The following papers extend the analysis into the 15th century looking for example at Brunelleschi s dome for Florence Cathedral and deal with the often neglected structures of roofs towers and spires The Premodern Condition Bruce Holsinger,2005-12 Bruce Holsinger identifies and explains an affinity for medievalism and medieval studies among the leading figures of critical theory His book contains original essays by Bataille and Bourdieu translated into English that testify to the strange persistence of medievalisms in French postwar writings **Anthropological and historical sciences. Aesthetics and the sciences of art** Jacques Havet,2019-06-04 No detailed description available for Anthropological and historical sciences Aesthetics and the sciences of art **Medieval Christianity** Kevin Madigan,2015-01-13 An engaging narrative history of the medieval church with new attention to women ordinary parishioners attitudes toward Jews and Muslims and more Publishers Weekly starred review For many the medieval world seems dark and foreign an often brutal and seemingly irrational time of superstition miracles and strange relics The aggressive pursuit of heretics and attempts to control the Holy Land might come to mind Yet the medieval world produced much that is part of our world today including universities the passion for Roman architecture and the development of the gothic style pilgrimage the emergence of capitalism and female saints This new narrative history of medieval Christianity spanning the period 500 to 1500 CE attempts to integrate the familiar with new themes and narratives Elements of novelty in the book include a steady focus on the role of women in Christianity the relationships among Christians Jews and Muslims the experience of ordinary parishioners the adventure of asceticism devotion and worship and instruction through drama architecture and art Kevin Madigan expertly integrates these areas of focus with more traditional themes such as the evolution and decline of papal power the nature and repression of heresy sanctity and pilgrimage the conciliar movement and the break between the old Western church and its reformers Illustrated with more than forty photographs of physical remains this book promises to become an essential guide to a historical era of profound influence Compelling a picture of medieval Christianity that is no less lively for being well informed and carefully balanced Commonweal *Rage and Denials* Branko Mitrović,2015-08-13 In *Rage and Denials* philosopher and architectural historian Branko Mitrović examines in detail the historiography of art and architecture in the twentieth century with a focus on the

debate between the understanding of society as a set of individuals and the understanding of individuals as mere manifestations of the collectives to which they belong The conflict between these two views constitutes a core methodological problem of the philosophy of history and was intensely debated by twentieth century art historians one of the few art historical debates with a wide range of implications for the entire field of the humanities Mitrovi presents the most significant positions and arguments in this dispute as they were articulated in the art and architectural historical discourse as well as in the wider context of the historiography and philosophy of history of the era He explores the philosophical content of scholarship engaged in these debates examining the authors positions the intricacies and implications of their arguments and the rise and dominance of collectivist art historiography after the 1890s He centers his study on the key art historical figures Erwin Panofsky Ernst Gombrich and Hans Sedlmayr while drawing attention to the writings of the less well known Vasilii Pavlovich Zubov Rage and Denials offers a valuable window onto how key aspects of modern research in the humanities took shape over the course of the twentieth century

Theology in Built Environments Sigurd

Bergmann,2017-07-12 Built space is both a physical entity as well as a socially and historically constructed place It constantly interacts with human beings affecting their behavior thinking and feeling Doing religious work in a particular environment implies acknowledging the surroundings to be integral to theology itself The contributors to this volume view buildings scriptures conversations prayers preaching artifacts music and drama and built and natural surroundings as contributors to a contextual theology The view of the environment in which religion is practiced as integrated with theology represents not just a new theme but also a necessity if one is to understand religion s own depth Reflections about space and place and how they reflect and affect religious experience provide a challenge and an urgent necessity for theology This is particularly important if religious practitioners are to become aware of how theology is given expression in the existential spatiality of life Can space set theology free This is a challenging question one that the editor hopes can be answered at least in part in this volume The diversity of theoretical concepts in aesthetics cultural theory and architecture are not regarded as a problem to be solved by constructing one overarching dominant theory Instead this diversity is viewed in terms of its positive potential to inspire discourse about theology and aesthetics In this discourse theology does not need to become fully dependent on one or another theory but should always clearly present its criteria for choosing this or that theoretical framework This volume shows clearly how different modes of design in sacred spaces capture a sense of the religious

Modern Perspectives in Western Art History W. Eugene Kleinbauer,Medieval Academy of America,1989-01-01 A collection of essays that reflect the breadth of twentieth century scholarship in art history Kleinbauer has sought to illustrate the variety of methods scholars have developed for conveying the unfolding of the arts in the Western world Originally published by Holt Rinehart and Winston 1971

Deforming American Political Thought Michael J. Shapiro,2016-02-19 Deforming American Political Thought offers an alternative to the dominant American historical imagination treating issues

that range from the nature of Thomas Jefferson's vision of an egalitarian nation to the persistence of racial inequality. Presenting multifaceted arguments that transcend the myopic scope of traditional political discourses, Michael J. Shapiro summons disparate disciplines and genres—architecture, crime stories, novels, films, and jazz/blues music, among others—to provide approaches to the comprehension of diverse facets of American political thought from the founding to the present. The book's various investigations disclose that there have always been dissenting voices articulated in diverse genres of expression that cast doubt on the moral purpose and exceptionalism of the American mind. This highly anticipated updated second edition features a preface focusing on aesthetic theory and the contributions of artistic genres for political analysis and a completely new chapter on critical thinking about the US western and urban encounters afforded by the two HBO series *Deadwood* and *The Wire* respectively.
