**Gothic Revival Worldwide** Timothy Brittain-Catlin, Jan De Maeyer, Martin Bressani, 2017-01-18 Pugin's global influence on church architecture and material reform. The year 2012 marked the bicentenary of the gothic revival architect A W N Pugin. His influence as a designer not only spread fast globally but also played a leading part in the transformation of material culture from the mid nineteenth century onwards. Pugin's work has been comprehensively reevaluated over the last decade. In this volume sixteen leading scholars from across the globe discuss Pugin's direct influence on church architecture and furnishing. Beautifully illustrated with a large selection of new photography Gothic Revival Worldwide the successor to the volume Gothic Revival published in 2000 reveals how Pugin's ideas played a profound role in the changing face of material reform in church architecture as an expression of the evolving identity of the churches across the world from North America to Mongolia and the South Pacific. Architecture in Transition Kelly Crossman, 1987-11-01. However behind the public face of design architectural life in Canada during the 1880s and 1890s was in turmoil. The Canadian public had lost confidence in its designers, students were forced to study abroad to secure a first class education, professional rivalry was unscrupulous, architectural competitions a scandal. American architects and their architecture were the fashion. These things changed but not before the world of the Canadian architect had been turned on its head, replaced by one which resembled the world of contemporary architects with professional organisations, regulated standards, formalised education centred in the universities and the belief that Canadian architecture should reflect local climates, culture and geography. Kelly Crossman provides the first analysis of this period. Beginning with a review of the architectural milieu in Toronto and Montreal in the 1880s, he traces the rise of professionalism as an idea and architectural nationalism as a goal. His analysis is more a history of architectural ideas than a survey of forms. It places the architecture of these years in an historical and ideological context, demonstrating that it developed with its own logic in response to national and international factors. During the two decades after 1885 Canadian architects grappled with problems whose long term implications they could not have foreseen: the role of the architect in industrialised society, the need to accommodate and integrate applied science and the need to express their own and their country's personality in architectural form. By the beginning of this century they had begun to find their own

voice The story of this process will be of interest not just to students and scholars but to anyone interested in the development of Canada and its architecture
