Educating for Intelligent Belief Or Unbelief Nel Noddings,1993 **Educating for Intelligent Belief or Unbelief** Nel Noddings,1993 One of the most enduring and controversial issues in American education concerns the place of individual beliefs and moral standards in the classroom Noddings argues that public schools should address the fundamental questions that teenagers inevitably raise about the nature value and meaning of life and death and to do so across the curriculum without limiting such existential and metaphysical discussions to separate religion philosophy or even history classes Explorations of the existence of a God or gods and the value and validity of religious belief for societies or individuals she writes whether they are initiated by students or teachers should be part of the free exchange of human concerns a way in which people share their awe doubts fears hopes knowledge and ignorance Such basic human concerns Noddings maintains are relevant to nearly every subject and should be both non coercive and free from academic evaluation Nel Noddings probes the many ways in which children's questions about God and gods existence and the meaning of life can and should be integrated into life in classrooms and the real world of the public schools From the Foreword This is a rich and sensitive book that will give teachers administrators parents philosophers of education any concerned citizen the basis for more substantial discussion and concrete proposals Free Inquiry Impressive in its sweep of possibilities for exploration in the school curriculum and teacher education Educational Theory *Moral Questions in the Classroom* Katherine G. Education for Knowing Paul A. Wagner, Frank K. Fair, 2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of thing Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students

Educating for Meaningful Lives Scott Webster, 2009-01-01 Why are students becoming disengaged from schooling Many teachers administrators and designers of policy and curriculum are expressing concern over this issue Current approaches to schooling are dominated by a perceived need to enable learners to particulate in the knowledge economy Both knowledge and learning how to learn knowledge have become the primary discourses in schooling rather than education School curricula rarely offer any sense of personal significance and for many learners such an approach to the curriculum is meaningless Educating for meaningful lives must be a central aim for educative curricula This book offers curriculum designers and teachers a greater understanding of this relation that education has with living significantly meaningful lives and it does so through the notion of existential spirituality Spirituality is not to be reduced to something religious but rather pertains to how a life is lived An existential perspective enables the meaningfulness of life to provide the necessary significance which is required of a curriculum if it is to be understood as offering personal meaning for learners Approaching the design and teaching of curricula through this perspective of existential spirituality enables learners to live a meaningful
