Critical Times in Curriculum Thought Marcella L. Kysilka, 2011-05-01 This book is designed to be used at a master's level for a degree in curriculum and instruction teacher education or educational leadership. It could be used as a primary or a supplementary text. The book is divided into three parts. The first section focuses on the contributions of noted educators to the field of education: Florence Stratemeyer, Haberman and Corrigan, Hilda Taba, Barbara Stern, Alice Miel, Jennifer Deets, Booker T. Washington, Karen Riley, Ralph Tyler, Gerald Ponder, and Dixie Massey, and John Dewey, William Schubert, and Heidi Schubert. The authors of these chapters focused on contributions that were less known but particularly important in thinking about education. The second section of the book focuses on curriculum movements that were politically motivated and their impact on curriculum applications in the schools: Cold War, Sputnik, Peggy Moch, Civil Rights, William Ayers, Women's Rights, Susan Brown, Bilingual/multicultural education, Gloria Contreras, and Ron Wilhelm, and the growing economic divide, William Watkins. The last section of the book provides perspectives on factors that affected curriculum implementation as seen through the eyes of authors who have done considerable research in these areas: Social Justice, William Gaudelli, and Dennis Urban, Integrated Curriculum, Lynne Bailey, The Comprehensive High School, Marcella Kysilka, Technology in the Curriculum, Gretchen Schwarz, and Janet Dunlop, and Inclusive Curriculum, Allison Dickey. The book could be used in Alternative Certification Programs as well as the chapters focus on issues that are common in the public school sector. The chapters are short and meaty and provide a thorough understanding of the people, politics, and perspectives of the times. Paul Diederich and the Progressive American High School Robert L. Hampel, 2014-04-01 Paul Diederich worked in five new organizations dedicated to transforming American schools: the Ohio State University lab school, the Eight Year Study, a Harvard institute to revamp English language instruction, the University of Chicago's Board of Examiners, and the Educational Testing Service. Throughout his career, he wrote critiques of American high schools and set forth many proposals to make them more flexible without sacrificing academic excellence. This anthology resurrects 14 Diederich essays, eight of them never before published. The scope ranges from visions of social justice to the details of the daily schedule. Like his

heroes Benjamin Franklin and Thomas Jefferson he combined a passion for utopian speculation with a fascination for practical problems a combination that is rare in the world of school reform today

Grading the College Scott M. Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate

focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

David Riesman and Critical Theory Amirhosein Khandizaji, Mary Caputi, 2021-08-17 Although David Riesman wrote over half a century ago his concept of autonomy as presented in *The Lonely Crowd* 1950 speaks directly to the intellectual and emotional disarrangements of the twenty first century The current malaise produced by the excesses of commodity culture information technology the hyperreal and fake news militate against our ability to think critically about contemporary society And while postmodern authors insist that this bewildering situation weakens and assails our critical thinking skills Riesman's notion of autonomy refuses to capitulate to such a somber interpretation Rather he is convinced that individuals have the intellectual and emotional mettle to think for themselves and not be drawn into the demands of a commercialized culture and a

commodity driven lifestyle As we pick and choose the terms of our engagement we can remain aloof from society s engulfing influence and preserve the oppositional thinking needed for democracy To illustrate this point most clearly this book puts Riesman into conversation with the writings of Theodor Adorno whose evaluation of the critical faculty s ability to withstand the culture industry is famously pessimistic Handbook of Education Policy Studies Guorui Fan,Thomas S.

The Lost Black Scholar David A. Varel, 2018-04-13 Allison Davis 1902-83 a preeminent black scholar and social science pioneer is perhaps best known for his groundbreaking investigations into inequality Jim Crow America and the cultural biases of intelligence testing Davis one of America s first black anthropologists and the first tenured African American professor at a predominantly white university produced work that had tangible and lasting effects on public policy including contributions to Brown v Board of Education the federal Head Start program and school testing practices Yet Davis remains largely absent

from the historical record For someone who generated such an extensive body of work this marginalization is particularly surprising But it is also revelatory In *The Lost Black Scholar* David A Varel tells Davis s compelling story showing how a combination of institutional racism disciplinary eclecticism and iconoclastic thinking effectively sidelined him as an intellectual A close look at Davis s career sheds light not only on the racial politics of the academy but also the costs of being an innovator outside of the mainstream Equally important Varel argues that Davis exemplifies how black scholars led the way in advancing American social thought Even though he was rarely acknowledged for it Davis refuted scientific racism and laid bare the environmental roots of human difference more deftly than most of his white peers by pushing social science in bold new directions Varel shows how Davis effectively helped to lay the groundwork for the civil rights movement **The University of Chicago Magazine** ,2004 *American Book Publishing Record* ,2003
