Educating the Tudors Amy McElroy, 2023-02-16 Education during the Tudor era was a privilege and took many forms including schools colleges and apprenticeships Those responsible for delivering education came from a variety of backgrounds from the humble parish priest to the most famed poet laureates of the day Curriculums varied according to wealth gender and geography The wealthy could afford the very best of tutors and could study as much or as little as they chose while the poorer members of society could only grasp at opportunities in the hopes of providing themselves with a better future The Tudors were educated during a time when the Renaissance was sweeping across Europe and Henry VIII became known as a Renaissance Prince but what did his education consist of Who were his tutors How did his education differ to that of his elder brother Prince Arthur and how did Henry s education change upon the death of his brother There is no doubt Henry was provided with an excellent education particularly in comparison to his sisters Margaret and Mary Henry s own education would go on to influence his decisions of tutors for his own children Who had the privilege of teaching Henry s children and did they dare to use corporal punishment Educating the Tudors seeks to answer all of these questions delving into the education of all classes the subjects they studied educational establishment and those who taught them

The Rise of Character Education in Britain Lee Jerome, Ben Kisby, 2019-08-20 What is character education Why has it risen up the

political agenda in the UK in recent years And what does it mean in pedagogical practice This book addresses these questions challenging the individualistic and moralistic ideas underlying the clamour amongst politicians educators and authors to promote grit resilience and character in schools Closely examining a range of teaching resources the book shows that the development of character is wrongly presented as the solution to a wide variety of social problems with individual citizens expected to accommodate themselves to the realities of the contemporary economic context rather than enhancing their capacities to engage in civic and political activities to bring about changes they wish to see The book argues that there is a tried and tested alternative to character education which is far more likely to strengthen British democracy namely citizenship education

The Education of Blacks in the South, 1860-1935 James D. Anderson, 2010-01-27 James Anderson critically reinterprets the history of southern black education from Reconstruction to the Great Depression By placing black schooling within a political cultural and economic context he offers fresh insights into black commitment to education the peculiar significance of Tuskegee Institute and the conflicting goals of various philanthropic groups among other matters Initially ex slaves attempted to create an educational system that would support and extend their emancipation but their children were pushed into a system of industrial education that presupposed black political and economic subordination This conception of education and social order supported by northern industrial philanthropists some black educators and most southern school officials conflicted with the aspirations of ex slaves and their descendants resulting at the turn of the century in a bitter national debate over the purposes of black education Because blacks lacked economic and political power white elites were able to control the structure and content of black elementary secondary normal and college education during the first third of the twentieth century Nonetheless blacks persisted in their struggle to develop an educational system in accordance with their own needs and desires

The Handbook of Philosophy of Education is a comprehensive guide to the most important questions about education that are being addressed by philosophers today. Authored by an international team of distinguished philosophers, its thirty-five chapters address fundamental, timely, and controversial questions about educational aims, justice, policy, and practices. Part I: Fundamental Questions addresses the aims of education, authority to educate, the roles of values and evidence in guiding educational choices, and fundamental questions about human cognition, learning, well-being, and identity. Part II: Virtues of Mind and Character is concerned with the educational formation of personal attributes that are often seen as essential to flourishing individuals and societies. This section includes chapters on the cultivation of intellectual and character virtues, the nature and formation of expertise, Stoic virtues and intellectual vices. Part III: Education and Justice addresses fundamental and emerging issues of educational justice, from equal educational opportunity, racial domination, and linguistic justice in education to educational problems of mass migration, global educational justice, the education of working children around the world, and the costs of higher education and upward mobility. Part IV: Educational Practices addresses controversial aspects of contemporary education, pedagogical, curricular, and managerial practices that deserve careful examination. These include controversies surrounding free speech and instruction in controversial issues, anti-racism, sustainability, and sex education, and the unfulfilled promises and demoralizing impact of high-stakes accountability schemes.
