Asian students Provides accessible explanations of key studies that are supplemented with real life case examples **What We Owe Children** Caleb Gattegno,2010 How do children learn How are they taught These are two fundamental questions in education Caleb Gattegno provides a direct and lucid analysis and concludes that much current teaching far from feeding and developing the learning process actually stifles it Memory for instance the weakest of the mental powers available for intelligent use is almost the only faculty to be exploited in the educational system and holds little value in preparing a student for the future Gattegno s answer is to show how learning and teaching can properly work together what schools should achieve and what parents have a right to expect The Pedagogy of Consciousness Nadira Jack,2020-04-14 Integrating experience and observations with theoretical ideologies and philosophical dispositions the author provides a refreshing methodology and vision to the development of curriculum and instruction for administrative leaders educators and policymakers in an urban education setting Collectively combing her administrative and instructional experience as an educator principal and superintendent she shares with readers a new pedagogical approach that emphasizes principles of collaboration and co investigation among educators and students to explore universal life lessons and confront systemic oppression that impact urban youth The Pedagogy of Consciousness is one that emphasizes a humanizing approach to education with balanced partnerships and shared connections among educators and students The promise of this compelling model is that it collectively revitalizes a broken disenfranchised system while demonstrating the capacity to revolutionize urban education and transform lives The book opens up with a historical analysis of education beginning with its inception and culminating with its present state of affairs confronting systemic inequities and modes of standardization that still permeate today The author provokes administrative leaders and educators to value student diversity and rethink the architecture of the traditional school systems by placing students at the forefront of their education through the co development of curriculum and learning themes that impact their lives on a daily basis The Pedagogy of Consciousness provides innovative measures for educators and students alike to recognize the excellence that they were born with The model which is based on the dynamic disposition of education as a fluid organic process highlights relationship building among educators and students as a core element necessary to create a classroom culture based upon facets of loyalty trust and mutual respect To this end educators and students investigate issues that affect their lives on a daily basis to experience self growth and liberation that ultimately transcends into a shift in perception thoughts and action Embedded in the model is also the use of coping mechanisms and daily affirmations that allow students to recognize the highest form of one s inner consciousness The author demonstrates the importance of leading educational reform through teaching students that they are pillars of their own success
