Educational Leadership In An Age Of Accountability The Virginia Experience:

Educational Leadership in an Age of Accountability Daniel L. Duke, Margaret Grogan, Pamela D. Tucker, Walter F. Heinecke, 2012-02-01 The insistence by policymakers and politicians that educators be held accountable for student outcomes has resulted in dramatic shifts in the responsibilities of department chairs principals and superintendents Educational Leadership in an Age of Accountability explores these changes in Virginia following its implementation of an ambitious accountability plan that called for standards of learning statewide high stakes tests standards of accreditation and annual school performance report cards This book examines factors such as the fate of students who fail state tests achievement differences between black and white students ethical issues surrounding accountability measures and the increasing politicization of local schooling Educational Leadership in an Age of Accountability shows that accountability pressure has done more than previous reforms to foster instructional leadership Wise Social Studies in an Age of High-Stakes Testing Elizabeth Anne Yeager, O. L. Davis, 2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences Measuring History S. G. Grant, 2009-03-01 Measuring History complements the cases presented in Wise Social Studies Practices Yeager Davis 2005 Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state level testing In this book the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them At the heart of Measuring History are cases of classroom teachers in seven states Florida Kentucky Michigan New York Texas Mississippi and Virginia where new social studies standards and new and generally high stakes state level history tests are prominent In these chapters the authors describe and analyze the state s testing efforts and how those efforts are being interpreted in the context of classroom practice The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform Catherine Horn University of Houston and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment the research literature and the technical qualities of history tests *Urban Educational Leadership for Social Justice* Jeffrey S. Brooks, Melanie C. Brooks, 2015-06-01 The chapters in Urban Educational Leadership

for Social Justice International Perspectives constitute a collection of works that explore dynamics related to equity in multiple contexts. Authors examined these issues in Turkey, Egypt, the United States, Thailand, and at a global level by comparing and contrasting school leadership practice across borders. Considered as a whole, these papers explore various topics that will be at the forefront of educational research for years to come. Increasingly, educational leadership understands that there are important lessons to be learned internationally and globally. This book includes important research conceived from these perspectives. Our hope is that individually and collectively they might contribute to our understanding of international and global issues in educational leadership and that they will extend, challenge, and deepen extant lines of inquiry and begin others.

Teaching Leaders to Lead Teachers Saran Donahoo, Richard C. Hunter, 2007-08-20

TEACHING LEADERS TO LEAD TEACHERS: EDUCATIONAL ADMINISTRATION IN THE ERA OF CONSTANT CRISIS In the 21st century, the perceived crisis in how schools educate students significantly influences the decision of teachers to move into administrative positions as well as their ability to succeed once they take on these positions. Influenced by the media, the community, and the teacher's lounge, many good educators are increasingly unwilling or simply unprepared to make the jump into school leadership and management. This book addresses some of the issues that affect school leadership by providing insights into the current state of educational administration in the hope of demystifying or dismissing some of the popular assumptions regarding what really takes place in the administration office. In doing so, this text examines topics related to the preparation and training of prospective administrators, factors that affect the process of leading in learning environments, and perspectives on the state and structure of school leadership research and development.

Building the Federal Schoolhouse Douglas S. Reed, 2014-05-29 Over the past fifty years, the federal government's efforts to reform American public education have transformed U.S. schools from locally run enterprises into complex systems jointly constructed by federal, state, and local actors. The construction of this federal schoolhouse, an educational system with common national expectations and practices, has fundamentally altered both education politics and the norms governing educational policy at the local level. *Building the Federal Schoolhouse* examines these issues through an in-depth, fifty-year examination of federal educational policies in the community of Alexandria, Virginia, a wealthy yet socially diverse suburb of Washington, D.C. The epochal social transformations that swept through America in the past half century hit Alexandria with particular force, transforming its Jim Crow school system into a new immigrant gateway district within two generations. Along the way, the school system has struggled to provide quality education for special needs students and has sought to overcome the legacies of tracking and segregated learning while simultaneously retaining upper middle class students. Most recently, it has grappled with state and federally imposed accountability measures that seek to boost educational outcomes. All of these policy initiatives have contended with the existing political regime within Alexandria at times forcing it to a breaking point and at other times reconstructing it. All the while, the local expectations and governing realities of administrators, parents, and politicians

and voters have sharply constrained federal initiatives limiting their scope when in conflict with local commitments and amplifying them when they align Through an extensive use of local archives contemporary accounts school data and interviews Douglas S Reed not only paints an intimate portrait of the conflicts that the federal schoolhouse s creation has wrought in Alexandria but also documents the successes of the federal commitment to greater educational opportunity In so doing he highlights the complexity of the American education state and the centrality of local regimes and local historical context to federal educational reform efforts *JSL Vol 24-N3 JOURNAL OF SCHOOL LEADERSHIP*,2014-05-22 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement *Critical Curriculum Leadership* Rose M.
