The book is intended for parents seeking to provide STEM activities for their children at home and in playgroups; citizen scientists seeking guidance to provide children with quality educational activities; daycare practitioners providing educational structures for young children from birth to formal education; primary school teachers and preservice teachers seeking to teach preschool kindergarten or children typically aged 5-8 years old in grades 1-3 as well as researchers and policy makers working in science didactics with small children. **Piaget and Vygotsky in XXI century**

Nikolay Veraksa, Ingrid Pramling Samuelsson, 2022-08-18. The book provides a comprehensive analysis of Vygotsky's and Piaget's theories implementation in modern preschool education. It analyzes the problem of the relationship between the natural and the cultural in the context of Vygotsky and Jean Piaget theories. Their discourses complemented each other whereas Vygotsky developed his theory in the direction from society/culture to the individual child, Piaget's movement was the opposite from individual child to society. These two approaches confront modern world with the need to analyze the problem of childhood: is childhood a period of cultural exploration or is it a special form of relationship in which both the egocentrism and consciousness of the child and the egocentrism and consciousness of culture are represented. Readers will gain insight into the methodology that makes possible to unite up-to-date views based on Vygotsky and Piaget theories on child development and education. **Early Childhood Education**
