*e-Development Toward the Knowledge Economy* E. Carayannis, C. Sipp, 2005-12-15 Profiling Smart Development A thorough comparative empirical review of real and best e Development policies and practices towards the Knowledge Economy Based on the analysis of policies practices and empirical development case studies this book provides a methodology for matching development stage and development strategy identifying best and real policies and practices for the most appropriate use of information and communication technologies ICT and knowledge to foster innovation and entrepreneurship and trigger catalyze and accelerate sustainable development

Enabling Enterprise Transformation Nagy K. Hanna, 2009-12-11 Private enterprises in advanced economies have been learning to use information and communication technology ICT to innovate and transform their processes products services and business models significantly improving productivity and competitiveness Moreover the ICT industry itself has become a major source of job creation and a contributor to economic growth and business transformation A key question today is whether and how developing countries can learn to benefit from the ICT revolution and what roles the government and private sector can play Already a number of

developing countries have been inspired by the example of India and China and are now seeking to jump on the outsourcing bandwagon. Nevertheless, with few exceptions in the developing world, little attention has been paid by policymakers and practitioners to invest systematically and proactively in ICT-enabled growth, poverty reduction, and grassroots innovation. Most communities and small and medium-sized enterprises in developing countries, for example, face multiple constraints to adopting and leveraging this general-purpose technology and lack the capabilities for maximizing its potential.

In *Enabling Enterprise Transformation*, Nagy Hanna draws on his rich experience of over 35 years at the World Bank and other aid agencies as a development strategist and ICT policy expert to present the most current research and best practices from around the world to provide practical tools for promoting economic and social transformation through ICT. He assesses various initiatives to develop and diffuse ICT, such as innovation funds, incubators, parks, public-private partnerships, and comprehensive promotion programs. He argues for the strategic options now open for developing countries to participate in ICT production, to deploy ICT to transform industries and services, and to leverage ICT as a new national infrastructure for improving the business environment and enhancing the competitiveness of the whole economy. The challenge for leaders in developing countries is to create such social and institutional dynamics for learning about ICT use and adaptation at many levels. Lessons gained so far from programs to build these social learning and innovation capabilities at the institutional and grassroots levels should be shared among developing countries, and a dialogue among business leaders, policymakers, development agencies, educational institutions, and the general citizenry must be advanced.

e-Transformation: Enabling New Development Strategies Nagy K. Hanna, 2009-11-11

Could information and communication technology (ICT) become the transformative tool for a new style of global development? Could ICT promote knowledge-based innovation-driven and smart adaptive participatory development? As countries seek a way out of the present period of economic contraction, they are trying to weave ICT into their development strategies in the same way organizations have learned to use ICT to transform their business models and strategies. This integration offers a new path to development that is responsive to the challenges of our times.

In *e-Transformation*, Nagy Hanna identifies the key ingredients for the strategic integration of ICT into national development, with examples from around the world. He draws on his rich experience of over 35 years at the World Bank and other aid agencies to outline the strategic options involved in using ICT to maximize developmental impact, transforming public service institutions, networking businesses for innovation and competitiveness, and empowering communities for social inclusion and poverty reduction. He identifies the key interdependencies in e-transformation and offers a holistic framework to tap network effects and synergies across all elements of the process, including leadership, cyber policies, institutions, human resources, technological competencies, information infrastructure, and ICT uses for government, business, and society. Integrating analytical insights and practical applications across the fields of development, political economy, public administration, entrepreneurship, and technology management, the author candidly argues that e-transformation, like all bold

ideas faces implementation challenges In particular the aspiration reality gap needs to be systematically addressed if ICT enabled innovation and transformation is to become a development practice E transformation is first and foremost about thinking strategically and creatively about the options made possible by the information technology revolution in the context of globalization To this end the author provides tools and best practices designed to nurture innovation select entry points prioritize among competing demands and sequence and scale up He outlines the roles of all participants political managerial entrepreneurial social and technical whose leadership is essential for successful innovation

**Financial Engineering in Sustainable Funding of Urban Development in the EU** Piotr Idczak, Ida Musiałkowska, 2022-08-22 This theoretically rooted and research based book provides insights on the JESSICA funding model which unlike the traditional non repayable aid focuses on supporting sustainable urban development projects in a repayable and recyclable way Looking through the lens of the JESSICA financial engineering mechanism used in urban transformation it examines the functioning and performance thereof and formulates policy recommendations for the future The aim of this volume is to contribute to a deeper understanding of the JESSICA sustainable funding model by exploring its repayable assistance mechanism to support sustainable urban development projects The authors make several noteworthy contributions to the literature on EU cohesion policy and shed light on the use of the repayable instruments within public interventions while providing for the first time a critical analysis of the JESSICA sustainable funding model from the holistic perspective which is especially relevant for supporting sustainable urban development Financial Engineering in Sustainable Funding of Urban Development in the EU provides policy significant findings that are important for EU cohesion policy in the field of repayable assistance to be reinvested in the long term in urban and regional transformation

*Science and Technology Based Regional Entrepreneurship* Sarfraz A. Mian,2011 Providing a global survey of public policies and programs for building national and regional ecosystems of science and technology based entrepreneurial development this book provides a unique analysis of the advances over the last several decades and in light of the experiential knowledge gained in various parts of the world in the understanding of innovation systems in the pursuit of developing these economies Presenting nineteen case studies of diverse developed and emerging economy nations and their regions more than thirty expert authors describe an array of policy and program mechanisms that have been implemented over the years The in depth analyses of the worldwide

efforts featured in this volume provide the reader with several valuable lessons. There are clear indications of a trend toward better cohesion and coordination of national efforts to improve innovation but also a trend toward the broadening of regional agendas to address technology, talent, capital, innovation, infrastructure, and entrepreneurship culture issues considered essential for knowledge-based entrepreneurial growth. The book also offers a unique treatment of grassroots-level programmatic aspects of these efforts, including some novel entrepreneurial mechanisms employed for policy implementation. The book's blend of theory and practice provides valuable insights to the reader, particularly government, academic, and private sector policymakers and scholars researching or involved directly with efforts to build and support the development of science and technology-based entrepreneurial regions.

### **Business and Technology Incubators and Their Role in Europe in Comparison to the GCC Countries**

Thomas Hedner, Hanadi Mubarak Al-Mubarak, Michael Busler, Adli Abouzeedan, 2010. Business and technology incubators are seen as important actors for the development of dynamic start-up companies in national economies. The way such incubators function and the impact they have on regional development may vary from one region to another. In this paper, we survey and discuss the roles played by business and technology incubators in two different regions of the world: namely the Nordic region with countries like Sweden, Norway, and Finland, and the Gulf Cooperation Council (GCC) countries such as Kuwait, Bahrain, Qatar, UAE, and Saudi Arabia. The business and technology incubators were assessed in terms of perspective, Logics and Function, Strategy and Planning, Policies and Practices, Role and Impact, Output and Outcome, as well as stage of development: Inception, Implementation, Consolidation, and Renewal. Etzkowitz and Klofsten (2005) The paper analyzes the role of business incubators from functional and longitudinal perspectives. In the two regions, we have also analyzed the strength and impact of actors and institutions involved in the development of incubator systems such as academic, business, and governmental institutions.

*Technology Business Incubation* Lalkaka, Rustam, UNESCO, 2006-01-03. Many businesses around the world use technology as a means to set up, run, and improve their commercial performance, but not all countries have sufficient access to technology. In fact, the digital divide between rich and poor countries is one of the major international challenges facing our society. Technology Business Incubation describes a concept whereby technological support and services are offered to start-up companies in the fields of engineering, science, and technology to help them further their own research and develop viable businesses. Aimed at developed and developing countries, this concept could provide a solution in bridging the knowledge gap. Written by Rustam Lalkaka, a well-known expert in the field, the toolkit provides invaluable information for carrying out feasibility studies, preparing business plans, choosing a location, finding sponsors, selecting managers and tenants, and monitoring a technology business incubator. Annexes contain checklists and report pro formas to help prepare relevant documents based on local needs.
