insights of anthropology and sociology and by examining an earlier period than usually considered Concentrating not only on a decline of religious belief which is the last aspect of secularization this study shows that a transformation of England's cultural grammar had to precede that loosening of belief and that this was largely accomplished between 1500 and 1700 Only when definitions of space and time changed and language and technology were transformed as well as art and play could a secular world view be sustained As aspects of daily life became divorced from religious values and controls religious culture was supplanted by religious faith a reasoned rather than an unquestioned belief in the supernatural Sommerville shows that this process was more political and theological than economic or social

History of Psychiatry and Medical Psychology Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Mora's Marx's D B Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 *Short History of Psychiatry* discussed below Ackerknecht pp xi xii

references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
