Education and Development Simon McGrath,Qing Gu,2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period It is deliberately divergent in its approach recognising the major ideological and epistemological divides that characterise a field that draws on many traditions Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts The Handbook is divided in four parts and book ended by an introduction and a conclusion the latter oriented towards the implications that the volume has for future research agendas The first part explores major strands of debates about education s place in development theory The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development Part three looks beyond schools to consider early years adult and vocational education but focuses particularly on the return to thinking about higher education s role in development The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries Featuring over thirty chapters written by leading international and interdisciplinary scholars the Routledge Handbook of International Education and Development offers the first comprehensive and forward looking resource for students and scholars International Handbook on Education Development in the Asia-Pacific Wing On Lee,Phillip

Development ,2008-01-01 The role of education in the development of societies is an important life perspective that is

promoted by families institutions and governments In today s globalized world this reality may presume a worldwide platform where what is termed knowledge societies could gain at the expense of the educationally less endowed There is also the case where postcolonial systems of education in Africa Asia Latin America and other places did not lead to the expected social and technological progress that was promised with independence The 17 chapters in this volume attempt to analyze these complex and interlinked contexts of education and development The book contains important criticisms of the historical developments of education the meanings and changing intersections of development schooling citizenships and their exclusions and the important interplays of globalization knowledge culture and languages Beyond the theoretical focus the book examines learning systems and possibilities in specific regions and countries of the world These include Africa with a specialized focus on women s education and advancement as well as individual country studies on Ghana Burkina Faso Zimbabwe and Somalia In the Asian context the specific chapters analyze the training of teachers in China and women s education and education and the caste system in India These are complemented by select treatments of education and social development in Chile in South America postcolonial post communist Europe Russia and the Caribbean region Together the book s contents should selectively respond to some of the most important social and educational development ideas and debates in our world today

The Progress of Educational Development Henry Philip Tappan, 1855

The Role of Education in Enabling the Sustainable Development Agenda Stephanie E.L. Bengtsson, Bilal Barakat, Raya Muttarak, 2018-03-05

The Role of Education in Enabling the Sustainable Development Agenda explores the relationship between education and other key sectors of development in the context of the new global Sustainable Development Goals SDG agenda While it is widely understood that there is a positive relationship between education and other dimensions of development and populations around the world show a clear desire for more and better education education remains an under financed and under prioritised sector within development When education does make it onto the agenda investment is usually diverted towards increasing access to formal schooling without focusing on the intrinsic value of education as a tool for development within the international development community more broadly The authors explore these tensions through a review of literature from a range of disciplines providing a clearer picture of the relationship between education and other development sectors The book challenges silo thinking in the SDGs by exploring how achieving the SDG education targets can be expected to support or hinder progress towards other targets and vice versa Drawing on examples from both low and high income countries the book demonstrates how good education functions as an enabling right impacting positively on many other areas The book's scope ranges across education and development studies economics geography sociology and environmental studies and will be of interest to any researchers and students with an interest in education and the SDGs
