construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries
