Leadership for Change and School Reform Kathryn A. Riley, Karen Seashore Louis, 2000
 School reform is a top priority for governments today
 This timely and challenging book edited by leading international researchers Kathryn Riley and Karen Seashore Louis offers a rich comparative perspective on leadership for change and school reform
 Contributors from North America Europe and Australia demonstrate how school leadership is influenced by global pressures differing national and state contexts and local concerns
 They illustrate the limitations of reform initiatives which focus on school leaders to the exclusion of the many other organisations which affect school such as national and local governments professional associations and school communities
 This book raises some important questions such as
 How can school leaders create intelligent thinking schools
 How can leadership and learning be linked together
 What are the characteristics of effective local education authorities and school districts
 What is the role of teacher organisations in educational reform and change
 What happens if businesses teachers parents and local communities have different views of what makes a good school
 The text illustrates the ways in which leadership is rooted in learning and identifies new directions for school leadership
 It challenges conventional notions of leadership offering an expanded view which sees leadership just as an individual role based function but as a network of relationships among people structures and cultures
 This lively and provocative book should be read by all those interested in education reform

Change and Secondary School Administration Glen F. Ovard, 1968

Democratic Leadership Thomas A. Mulkeen, Nelda H. Cambron-McCabe, Bruce J.

Anderson,1994 Almost a decade ago a national commission formally announced a time of crisis in American education Since then Americans have been engaged in a debate about the purpose and organization of tomorrow s schools While the early reform reports were silent on the preparation of school administrators recent reports have focused on the failure to turn out well prepared administrators The National Commission on Excellence in Educational Administration 1987 and the National Policy Board for Educational Administration 1989 called for sweeping changes in the recruitment preparation regulation and evaluation of school administrators It was argued that raising standards for admission to educational administration programs more courses adding more rigor to existing courses tighter certification requirements competency based licensing and supervised school site internships would address the concerns raised by practitioners and numerous other critics Educational reforms directed toward raising the quality of our schools require administrators who are collaborative dynamic and innovative problem solvers administrators who can guide the educational enterprise to higher achievement provide individuals with aspirations and dreams and critically inculcate the young into a political democracy
